Sociodynamic Counselling A Constructivist Perspective For The Practice Of Counselling In The 21st Century

Clemens Wendtner

Sociodynamic Counselling A Constructivist Perspective For The Practice Of Counselling In The 21st Century:

Career Development and Systems Theory Wendy Patton, Mary McMahon, 2006 The Systems Theory Framework was developed to produce a metatheoretical framework through which the contribution of all theories to our understanding of career behaviour could be recognised In addition it emphasises the individual as the site for the integration of theory and practice Its utility has become more broadly acknowledged through its application to a range of cultural groups and settings qualitative assessment processes career counselling and multicultural career counselling For these reasons the STF is a very valuable addition to the field of career theory In viewing the field of career theory as a system open to changes and developments from within itself and through constantly interrelating with other systems the STF and this book are adding to the pattern of knowledge and relationships within the career field The contents of this book will be integrated within the field as representative of a shift in understanding existing relationships within and between theories In the same way each reader will integrate the contents of the book within their existing views about the current state of career theory and within their current theory practice relationship Back cover ed

Career Counselling Mary McMahon, 2016-07-18 Due to the increasing demand for career guidance in recent years career counsellors have been challenged to modernise their practice As a response to the rapidly changing world of work with more diverse client groups and more complex and challenging issues facing career counsellors the field has moved strongly towards the greater adoption of constructivist approaches The 2nd edition of this ground breaking book is a forward looking guide giving further insight into the constructivist approach for the 21st century by providing a theoretical background to constructivism alerting readers to a range of cultural considerations related to constructivist career counselling outlining a range of constructivist approaches to career counselling providing examples of practical applications of the constructivist approaches presented in the book and assisting career counsellor educators practitioners and students understand and implement constructivist approaches into their work With contributions from an internationally recognised panel of authors from ten different countries Career Counselling Constructivist Approaches treats career as a holistic concept in which work and personal life are inseparably intertwined and individuals as experts in their own lives and in actively constructing their careers Structured into four logical sections this 2nd edition attests to the ongoing influence of constructivism internationally and the continued development and refinement of constructivist approaches to career counselling Career Counselling Constructivist Approaches is essential reading for career counsellor educators practitioners researchers and students who want a refreshing insight into constructivist career counselling

Career Assessment Mary McMahon, Mark Watson, 2015-07-21 Career Assessment Qualitative Approaches will assume a seminal place in the field of career development as the first book to focus solely on qualitative approaches to career assessment This book represents a timely and important contribution to career development as it seeks to meet the needs of increasingly diverse client groups Part 1 Foundations strongly positions qualitative career assessment in its historical

philosophical theoretical and research contexts The book is innovative by considering qualitative career assessment through the lens of learning Part 2 Instruments presents the first collation of chapters on a comprehensive range of qualitative career assessment instruments and processes written to a standard format to enable readers to compare contrast and evaluate approaches Part 3 Using quantitative career assessment qualitatively mitigates against depicting an unnecessary divide in the field between quantitative and qualitative career assessment by considering their complementarities Part 4 Diverse Contexts considers qualitative approaches to career assessment in contexts other than able western middle class settings Part 5 Future Directions reflects on the chapters and poses suggestions for the future With high profile authors from nine different countries the book represents a truly international contribution to the field of career development In its focus on qualitative career assessment this book holds a unique position as the only such text and will therefore assume an important place in the libraries of researchers academics and career practitioners *Narrative Career Counselling* Mary

McMahon, Peyman Abkhezr, 2024-09-27 Both accessible and comprehensive *Narrative Career Counselling* bridges the gap between theory and practice to allow a full understanding of the topic and allow confident implementation within professional settings This new edition offers updated chapters showcasing an increased focus on diverse contexts and cultures It brings together 33 high profile international experts from 10 countries to share perspectives on theory and provide practical ideas about how to implement narrative career counselling Fully updated to reflect changes in the field including the growth of narrative counselling it provides a foundation for narrative career counselling by considering its philosophical and theoretical background presents a range of approaches that demonstrate the integration of theory and practice studies the application of narrative career counselling in a range of cultures and contexts and provides examples of practical application This resource is essential reading for anyone who wants to learn more about narrative career counselling including beginners to the field experienced researchers career counsellor educators career counsellors and practitioners and students studying in this field **Career Development as a Partner in Nation Building Australia**

Wendy Patton, 2019-07-15 Despite examples of vocational guidance practice being evident in Australia since the mid 1800s there remains a spasmodic and patchwork approach to practice across the country For decades it is a field which has been paradoxically boosted and challenged by changing economic and political agendas Repeated international national and State reviews emphasise the vital nature of a systemic national approach to career development however authors repeatedly lament the lack of a sustained focus on career activity as a major national priority There is no broad comprehensive historical reckoning of the history of career development theory and practice in Australia since this early period Career development theory and practice in Australia has been forged in partnership with developments in an international context In documenting the shared history with other countries the author significantly adds to the body of knowledge on career development as a field in Australia and internationally The book provides new understandings about the historical

development of this field of knowledge and in particular the challenging and cyclical nature of its policy history *Timely Psychosocial Interventions in Dementia Care* Jill Manthorpe, Esme Moniz-Cook, 2020-03-19 This new edited volume seeks to meet the growing need for ways to support people with dementia across the whole course and trajectory of dementia care with a wide scope of expertise The book addresses how practitioners and carers can apply psychosocial interventions which take into consideration the individual social and environmental aspects of a person's life across this trajectory right from the earliest stages through to practice in care home settings Divided into four sections each covers a different context in which people with dementia can be supported at home in community settings family and carer support and those in care homes and hospitals In addition there is a distinct focus throughout on evidence based practice and its implementation in real world settings This book is essential reading for any practitioner and caregiver wanting to support people with dementia **Youth on the Move** Kristiina Brunila, Lisbeth Lundahl, 2020-02-03 The book addresses one of the most urgent social problems in many countries the uncertain school to work transitions of young people As a result a transition machinery has been created consisting of various education and training measures realised by e g teachers and youth workers The volume demonstrates that discourses related to youth transitions do not simply describe young adults but create them For example young people are expected to be active citizens who make themselves attractive to employers and those who fail in doing so may be labelled having psychological deficiencies When failing transitions resulting in lack of higher education or unemployment are treated as individual's problems rather than rising from structural factors the solutions are likewise individualized The book thus underlines the importance of analysing power relations reflected by gender health social class and ethnicity The articles of the book combine perspectives from young people policymakers teachers and youth workers in Iceland Finland Sweden and England *Shaping the Story*, 2019-04-09 Current career counselling needs a shift away from the practice of modern counselling approaches and narrative therapy is likely to be particularly appropriate since it is part of the culture and way of life of the majority of our clients For the very first time current approaches have been brought together in one publication Eminent scholars including Larry Cochran Mark Savickas and Norm Amundson Paul Hartung and John Winslade contributed to the publication Personal narratives of some exceptionally eminent people including Robert Sternberg are also included The publication is concluded by Reuven Bar On and Maurice Elias who delineate the connection between storied counselling and social and emotional learning This book provides a priceless resource for scholars academics researchers psychologists teachers and clients It critically analyses germane questions such as How vital and feasible is it to build on life stories in career counselling examines the theoretical underpinnings and practical applications of hermeneutic narrative postmodern and constructivist approaches to career counselling provides practical guidelines on the practice of narrative counselling in different contexts presents ideas on how to engage clients actively suggests ways of using life story counselling including the Career Story Interview to produce new identities for career practice *Transitions and Transformations in Learning and*

Education Päivi Tynjälä, Marja-Leena Stenström, Marjatta Saarnivaara, 2012-03-28 The breakneck speed of change in today's societies creates enormous challenges for educational institutions at all levels This volume explores ways how to manage change in educational processes and contexts focusing in particular on the concepts of transition and transformation How do we educate a skilled workforce sensitive professionals and responsive citizens who are able not only to cope with change but also to adopt required roles as agents of change How do we prepare students and employees to cope adequately with changes and transitions in their careers and personal lives The first of this book's three sections deals with the conceptual and theoretical aspects of transition transformational processes and human development It defines these concepts and examines the ways in which educational theory and praxis understand concepts of change and development The second section presents empirical studies that offer differing perspectives on educational transitions covering the lifespan from early years education to lifelong learning The third part of the volume focuses on issues of learning and pedagogy and argues that educational practices should change with the changing world With numerous concrete examples included in the analysis and with studies taking a range of forms from personal histories to large scale surveys this new book is a major addition to the literature in a field that has key implications for our future The first of this book's three sections deals with the conceptual and theoretical aspects of transition transformational processes and human development It defines these concepts and examines the ways in which educational theory and praxis understand concepts of change and development The second section presents empirical studies that offer differing perspectives on educational transitions covering the lifespan from early years education to lifelong learning The third part of the volume focuses on issues of learning and pedagogy and argues that educational practices should change with the changing world With numerous concrete examples included in the analysis and with studies taking a range of forms from personal histories to large scale surveys this new book is a major addition to the literature in a field that has key implications for our future

Vocational Psychological and Organisational Perspectives on Career, 2009-01-01 It has long been lamented that although several disciplines contribute to career scholarship they work in isolation from one another thus denying career theory research and practice the benefits that multidisciplinary collaboration would bring This constitutes a lost opportunity at a time when new understandings and approaches are needed in order to respond effectively to global changes in society and work This book takes a major step towards remedying this situation by bringing together two key perspectives on career the vocational psychological and the organisational interpreted broadly to include organisation behaviour and human resource management Written by international experts the book opens by identifying some of the tributaries that flow into the great delta of careers scholarship and noting the need to link what are at present separate islands of scholarship It is structured to allow comparison between the ways in which the two perspectives address career development and career management theory research and interventions It concludes by pointing to the possibilities for dialogue and even collaboration between these perspectives and suggesting ways in which these could

be brought about The book will be essential reading for career scholars because with its potential to stimulate new thinking and developments in theory and research and also importantly in practice with beneficial spin offs for policy makers this dialogue could open a new phase in career scholarship With its overviews of the history theory research and practice of both perspectives the book will also be a valuable resource for students of both perspectives
