Bruey, 2021-03-25 This timely and expansive multidisciplinary and transdisciplinary collection dissects precolonial colonial and post independence issues of male dominance power and control over the female body in the legal socio cultural and political contexts in Africa Contributors focus on the historical theoretical and empirical narratives of intersecting perspectives of gender and patriarchy in at least ten countries across the major sub regions of the African continent In these

well researched chapters authors provide a deeper understanding of patriarchy and gender inequality in identifying misogyny resisting male supremacy reforming discriminatory laws embracing human centered public policies expanding academic scholarship on the continent and more Women Miners in Developing Countries Martha Macintyre,2017-05-15 Contrary to their masculine portrayal mines have always employed women in valuable and productive roles Yet pit life continues to be represented as a masculine world of work legitimizing men as the only mineworkers and large mechanized and capitalized operations as the only form of mining Bringing together a range of case studies of women miners from past and present in Asia the Pacific region Latin America and Africa this book makes visible the roles and contributions of women as miners It also highlights the importance of engendering small and informal mining in the developing world as compared to the early European and American mines The book shows that women are engaged in various kinds of mining and illustrates how gender and inequality are constructed and sustained in the mines and also how ethnic identities intersect with those gendered identities **International Business, Trade and Institutional Sustainability** Walter Leal Filho,Paulo R. Borges de Brito,Fernanda Frankenberger,2019-10-25 This book addresses the gap between innovative technologies and their adoption It showcases research feasibility studies and projects that demonstrate a variety of ways to implement environmental sustainability in globally operating firms as well as best practices in areas such as international management adoption of cleaner technologies global supply chains greenhouse gas emission reduction and transportation The book provides state of the art information on issues including Global sustainable management practices Global sustainable food and agricultural markets Global responsible mining and energy Global sustainable sourcing Global sustainable transportation Global conservation innovations and investments Presenting expert contributions from industry government and academia discussing a variety of themes and perspectives on the topic international business as a positive force of environmental sustainability it is a vital resource for stakeholders in the international business community **Fairness and Justice in Natural Resource Politics** Melanie Pichler,Cornelia Staritz,Karin Küblböck,Christina Plank,Werner Raza,Fernando Ruiz Peyré,2016-08-05 As demand for natural resources increases due to the rise in world population and living standards conflicts over their access and control are becoming more prevalent This book critically assesses different approaches to and conceptualizations of resource fairness and justice and applies them to the analysis of resource conflicts Approaches addressed include cosmopolitan liberalism political economy and political ecology These are applied at various scales local national international and to initiatives and instruments in public and private resource governance such as corporate social responsibility instruments certification schemes international law and commodity markets In doing so the contributions contrast existing approaches to fairness and justice and extend them by taking into account the interplay between political scales regions resources and power structures in globalized resource politics Various case studies are included concerning agriculture agrofuels land grabbing water resources mining and biodiversity The volume adds to the academic and policy

debate by bringing together a variety of disciplines and perspectives in order to advance both a research and policy agenda that puts notions of resource fairness and justice center stage Poverty Alleviation Pathways for Achieving Sustainable Development Goals in Africa Thokozani Simelane, 2020-10-28 The inability to eradicate poverty among societies demands a synergistic approach This calls for the development of multi pronged pathways for transitioning towards sustainable development goals Many of these have been developed and tested across the world Some have proved to be effective in illuminating the underlying cause of the world s inability to eradicate poverty This is being driven by the fact that sustainable development as a global development concept represents a multidimensional phenomenon that includes many different indicators of human development This volume which derives from the papers presented at the seventh Africa Unity for Renaissance Conference that was held at Freedom Park Pretoria South Africa seeks to supplement existing pathways by highlighting Africa s approach to poverty alleviation which can possibly be attained through enhanced nutrition food security energy and gender equity Evidence presented reflects strengths weaknesses and opportunities on how Africa can transition towards sustainable development goals The information provided is useful to countries interested in assisting Africa to develop pathways for achieving sustainable development goals within the scope of Agenda 2063 The book is a good reference for policy makers academics government authorities and students interested in research and developmental studies

Contemporary Customary Land Issues in Africa J. Oloka-Onyango, Bridget Bwalya Umar, 2018-07-26 This book examines current trends in customary land issues in Africa focusing on the practice of converting customary land into leasehold tenure particularly in Zambia Since the enactment of the 1995 Lands Act No 29 in Zambia conversion of customary land has become a controversial policy raising questions about the future of customary land and rural communities and the role of traditional authorities in a changing environment Alienating customary land into leasehold tenure has serious implications for local and national politics and gender dynamics Analysis of these trends suggests that the policy of creating land markets on customary land is subjecting customary systems to the forces of change However governments that have adopted this policy have not by and large adopted measures to respond to these challenges Although customary tenure is widely believed to be resilient it is not clear how the customary system will navigate the current winds of change Chapters in this book draw from the Land Use and Rural Livelihoods in Africa Project LURLAP a collaborative research project undertaken by staff and students at the University of Cape Town and the University of Zambia

The Untold Story of Zama Zama Miners in South Africa Vidette Bester, 2025-04-30 This book results from a decade of in depth research on the complexities of Zama Zama mining in South Africa which has become a pressing issue of late It critiques the overly simplistic portrayal of the miners negatively and as illegal immigrants Through a sociological lens this book explores the broader socio economic conditions the profound impact of South Africa s mining history particularly the migrant labor system on today s Zama Zama miners and the role of women in the sector This book is not just about mining it interrogates issues around language poverty

and power. It challenges dominant societal narratives and examines how labels can further marginalize vulnerable groups. Inspired by the works of Pierre Bourdieu and Michel Foucault on classification and language, the book questions who holds the power to label and shape mainstream discourses. Amplifying the voices of the Zama Zamas themselves, the book transforms the conversation around Zama Zama mining in South Africa and beyond, providing fresh insights into this complex and marginalized sector. This book is more than an original and insightful study on informal mining; it offers practical initiatives for businesses, government, and civil society to engage with and address this marginalized sector more sustainably.

Mining, Materials, and the Sustainable Development Goals (SDGs) Cristian Parra, Brandon Lewis, Saleem H.

Ali, 2020-10-13 *Mining Materials and the Sustainable Development Goals: SDGs 2030 and Beyond* provides a systematic assessment of how the mining and materials sector contributes to the 17 sustainable development goals (SDGs) set forth by the United Nations in 2015. While the target date of 2030 is considered a benchmark for reaching these goals, the book looks beyond this date and considers a longer term vision. **FEATURES** Written by a consortium of authors from developing and developed countries. Offers coverage of environmental, economic, and social dimensions of the SDGs. Follows the 17 SDGs and includes a short chapter on each, followed by a case example. Includes longer conceptual chapters that consider cross-cutting issues as well. Aimed at those working in minerals, mining, and materials, this work offers readers a practical vision of how these sectors can have a positive impact on meeting these vital global targets. **Gold** Michael John Bloomfield, Roy

Maconachie, 2021-02-04 *Gold* remains a highly prized and impactful resource within the global economy. From the insatiable demand for gold in the electronics that permeate our day-to-day lives to the environmental desolation driven by gold mining in the Amazon, the gold trade continues to touch the lives and livelihoods of people across the world. Bloomfield and Maconachie tell the intriguing story of the yellow metal, tracing the seismic shifts in the industry over the past few decades. They show how huge purchases of gold reserves by BRICS countries mark the shifting balance of power away from the West and how rising affluence in India and China has led to a surging demand for gold jewellery, calling into question current approaches to make supply chains more responsible. Explaining why gold is so difficult to regulate and why it is only becoming more so, the authors suggest ways we could collectively make practices work better for the countless workers and communities who suffer at the producer end of the supply chain. Linking local to global, producer to consumer, and gold's extraction from the Earth to the financial centres that fuel it, this book offers a probing analysis that reveals who wins and who loses and what this means for the future of gold. **Critical Minerals, Sustainability, and the Energy Transition in**

the Global South Susan Nakanwagi, 2024-11-14 This book addresses the relationship between efficient management of critical minerals and sustainability in the Global South, including Sub-Saharan Africa. Critical minerals are essential raw materials for the technologies that are pivotal in today's energy transition. However, critical mineral host states and communities face social, economic, ecological, political, technological, and governance injustices. The book contends that the

criteria currently used in assessing criticality and critical mineral development do not fulfil the sustainable development ambitions of developing countries and that broader considerations must be taken into account to include the stakeholders involved as well as the spatial dimension of the critical mineral value chain. In particular, the book argues that the law must consider the broader context in which minerals become critical to particular processes. It positions this argument within the current context of climate change, the just energy transition, the minerals energy nexus and geopolitical tensions. By analysing the copper cobalt value chain through case studies on DRC, Zambia, China and the EU, the book provides new avenues for critical mineral development and acknowledges the necessity for sustainability amidst the exacerbated impacts of climate change. Addressing a key challenge of the global energy transition, the book argues for a just holistic framework which includes parameters such as domestic value addition, human rights in business development, environmental sensitivity, the development of communication channels from remote marginalised communities to international policymakers and the redesigning of criticality considerations beyond supply and economic aspects.
