Birkbeck Joanna Bourke, 2022 In 2023 Birkbeck University of London celebrates 200 years of educating working people in central London. It was founded in 1923 as the London Mechanics Institution and from its inception was a pioneering and radical institution. This history is animated by the conviction that Birkbeck is its people. Their thoughts and ambitions, hopes and dreams, labour and laughter are what this book describes, celebrates and occasionally laments. It explores the history of education as well as the history of place, politics, radicalism, class, race, gender, disciplinarity, theatre, food, leisure, war and everyday encounters. Most of all, this book is about ideas. What does it mean to be educated? How have these meanings changed over time? What makes Birkbeck students unique? What does it mean to be fully human, exploiting our faculties in order to become better people? **The Everyday Lives of Gay Men** Edgar Rodríguez-Dorans, Jason Holmes, 2021-10-06 The

Everyday Lives of Gay Men draws on the expertise of 12 contributors from different countries and fields, writing from an autoethnographic first-person approach. Putting the power of personal stories at the centre of the construction of sophisticated narratives of gay men's lives, the accounts draw attention to the limits of traditional perspectives to gay men's studies that look at gayness through a sexualised lens and explore how gay men make sense of their identity in their everyday lives. Together, they present a complex, nuanced understanding of gayness and challenge the conception of being gay as a sexual orientation because it describes in sexual terms an identity that is not only not always and not predominantly sexual. The authors come from a variety of fields including counselling studies and sociology to communication, religion and education. The innovative approach of *The Everyday Lives of Gay Men* makes it ideal for students and scholars in gender studies, sexuality studies, sociology, mental health and research methods. Queer Data Kevin Guyan, 2022-01-13 Data has never mattered more. Our lives are increasingly shaped by it and how it is defined, collected, and used. But who counts in the collection, analysis, and application of data? This important book is the first to look at queer data defined as data relating to gender, sex, sexual orientation, and trans identity history. The author shows us how current data practices reflect an incomplete account of LGBTQ lives and helps us understand how data biases are used to delegitimise the everyday experiences of queer people. Guyan demonstrates why it is important to understand, collect, and analyse queer data, the benefits and challenges involved in doing so, and how we might better use queer data in our work. Arming us with the tools for action, this book shows how greater knowledge about queer identities is instrumental in informing decisions about resource allocation, changes to legislation, access to services, representation, and visibility.

Proceedings of the 2023 2nd International Conference on Social Sciences and Humanities and Arts (SSHA 2023) Mohd Fauzi bin Sedon, Intakhab Alam Khan, Mehmet CÜNEYT BİRKÖK, KinSun Chan, 2023-06-29 This is an open access book. With the progress of social civilization, social science and its research are becoming more and more important. Theoretically and practically, the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings. At present, social science research and its results can hardly meet the needs of social development, especially the unscientific evaluation of social science results, which has aroused great concern from all walks of life and has produced dirt and questions on social science, thus affecting the proper development of social science. Max Weber once said that the most

important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc
