*Repression in Marx, Weber and Freud* Dewan S Arefin, 2016-06-16 Sigmund Freud is widely known for his extraordinary contribution to the world of psychology especially to the domain of psychoanalysis But he is less known as a social theorist His contribution in this area is quite extensive important and relevant for understanding of many social facts including the delicate process of social change His utterings are worthwhile reasonable and scientific to a great extent Freud is not valuable only for his theoretical activities but he is also inevitable for locating a better profile of human behavior society culture and civilization By exhibiting the fact that neither the unconscious was absolute eternal or unalterable nor the conscious he emphasized the idea that the reality and psyche were interdependent Social circumstances and psyche shaped and conditioned each other neither could grow in isolation Freud pointed out that there was a conflict within each individual and that was the fundamental feature of socialization into every society an unavoidable Repression characterizing human life Repression occupies a major area in Freudian literature so does the idea of social distance Social distance according to Freud is not only a biological entity but also is a functional entity Social distance as is adhered to by the Marxian dialectical materialists as being the creation of private property and its disproportionate ownership identified as a symbol of superiority

Farmer, 2014-11-01 For many people the world of politics is defined by ideologies The average voter rarely takes time to research a policy issue thoroughly relying instead on a set of beliefs set forth by his or her chosen political organization to make important decisions These publicly promoted ideologies play an important role in international as well as domestic political development yet many adherents to a particular belief may have a poor understanding of competing ideologies From right wing to the far left this text dissects eight prominent political ideologies traditional conservatism classic liberalism libertarianism conservative extremism contemporary liberalism communism dependency theory and Islamism In plain terms it describes the basic doctrine and inherent contradictions of each creed along with its particular relevance to today's political landscape An in depth discussion of the political socialization processes that form and perpetuate ideologies is also included Instructors considering this book for use in a course may request an examination copy here

**The Dynamics of Modern Society** William Goode, 2017-09-05 Social research efforts are often more concerned with basic social processes or patterns than with the dynamic relationship between social processes and social institutions In this classic collection contributors posit generalizations drawn from contemporary sociology Their analyses go beyond elementary principles they interpret them qualify them or state them more precisely Each of the contributors focuses on the modern American social structure and they are either explicitly comparative or have made observations that clearly are meant to apply to many countries This volume both embodies and draws attention to newer developments in sociology Like most steps forward in an advancing science this orientation does not reject the older knowledge accumulated during earlier generations but incorporates and expands upon it The differences are in emphasis rather than any denial of the main body of accepted theory On the other hand the collection may be said to represent a response to the many criticisms by humanists and sociologists alike of the mainstream of contemporary sociology as it existed at the time of original publication in the late 1960s Inquiries into social changes like sociological studies of historical phenomena may be viewed as modes of a comparative sociology They permit us to test more fully sociological generalizations The emphasis in this volume on historical and comparative studies and on social change parallels the growing attention of sociology to these problems During the 1960s social science turned from a nearly exclusive preoccupation with middle class populations to a concern with social relations in other societies past as well as present In addition to enriching our knowledge this broader view has increased both the precision and generalizing power of sociological principles      *Deepening Democracy Latin America* Kurt Von Mettenheim, James Malloy, 1998-07-15 Ten leading scholars of the region present original research to argue that theories of democratic consolidation or institutionalization are too often Euro and ethno centric that simple appeals for greater participation are insufficient and that recent critics of populism patronage and presidentialism fail to capture new opportunities for democracies in the region      **Theology of the People** Scannone, Juan Carlos, SJ, 2021 Theology of the People presents and studies the influence of liberation theology on Jorge Mario Bergoglio Scannone s former teacher who lived with him for many years and who is cited in Pope Francis s first encyclical Laudato S
