Ethical Research with Children Sarah Richards, Jessica Clark, Allison Boggis, 2015-10-26 An increasing interest in children's lives has tested the ethical and practical limits of research Rather than making tricky ethical decisions transparent researchers tend to gloss over stories that do not fit with sanitized narratives This book aims to fill this gap by making explicit the lived experiences of research with children **Library of Congress Catalogs** Library of Congress, 1976

Children and Schooling Philip Gammage, 2012 The book provides a synthesis of a broadly based social psychology of education and bridges the gap between theory and practice in education by emphasising the relationship between research and actuality The author discusses the major issues in childhood socialisation relating to schooling achievement and the curriculum and in so doing makes a sensitive and well argued case for the social psychological perspective He presents a social psychologist's view of the interaction between child school and curriculum and summarises mainstream psychological contributions to current thinking on achievement self esteem and education He covers areas of social learning and attribution theory not commonly dealt with in education texts showing that there are major fields of research which have

until now been neglected Children and Schooling is constructed so that its chapters can be used as independent study guides to specific subjects or read in sequence each subject inter related The text can be treated as an introduction particularly in view of the notes and comprehensive and apposite scholarly apparatus and as a spring board for serious study at advanced level **The Ohio State University Bulletin** Ohio State University,1922 *Monographic Series Library of Congress*,
