**Street-Level Bureaucracy, 30th Anniversary Edition** Michael Lipsky, 2010-04-08 First published in 1980 Street Level Bureaucracy received critical acclaim for its insightful study of how public service workers in effect function as policy decision makers as they wield their considerable discretion in the day to day implementation of public programs Three decades later the need to bolster the availability and effectiveness of healthcare social services education and law

enforcement is as urgent as ever In this thirtieth anniversary expanded edition Michael Lipsky revisits the territory he mapped out in the first edition to reflect on significant policy developments over the last several decades Despite the difficulties of managing these front line workers he shows how street level bureaucracies can be and regularly are brought into line with public purposes Street level bureaucrats from teachers and police officers to social workers and legal aid lawyers interact directly with the public and so represent the frontlines of government policy In *Street Level Bureaucracy* Lipsky argues that these relatively low level public service employees labor under huge caseloads ambiguous agency goals and inadequate resources When combined with substantial discretionary authority and the requirement to interpret policy on a case by case basis the difference between government policy in theory and policy in practice can be substantial and troubling The core dilemma of street level bureaucrats is that they are supposed to help people or make decisions about them on the basis of individual cases yet the structure of their jobs makes this impossible Instead they are forced to adopt practices such as rationing resources screening applicants for qualities their organizations favor rubberstamping applications and routinizing client interactions by imposing the uniformities of mass processing on situations requiring human responsiveness Occasionally such strategies work out in favor of the client But the cumulative effect of street level decisions made on the basis of routines and simplifications about clients can reroute the intended direction of policy undermining citizens expectations of evenhanded treatment This seminal award winning study tells a cautionary tale of how decisions made by overburdened workers translate into ad hoc policy adaptations that impact peoples lives and life opportunities Lipsky maintains however that these problems are not insurmountable Over the years public managers have developed ways to bring street level performance more in line with agency goals This expanded edition of *Street Level Bureaucracy* underscores that despite its challenging nature street level work can be made to conform to higher expectations of public service

that the democratic political stake today is not our security but preventing insecurity from becoming the organising principle of political and social life *Women's Imprisonment and the Case for Abolition* Linda Moore, Phil Scraton, Azrini Wahidin, 2017-11-20 In 2007 the Corston Report recommended a far reaching radical women centred approach to women s imprisonment in England and Wales It suggested a fundamental re thinking about how services to support women in conflict with the law are delivered in custody and in the community recommending the development and implementation of a decarceration strategy This argued for appropriate treatment programmes in the community reserving prison for only those women who commit serious and violent offences Ten years on what progress has been made What is the relationship between Corston s vision and a more radical abolitionist agenda Drawing on a range of international scholarship this book contributes to the critical discourse on the penal system human rights and social injustice revealing the consequences of imprisonment on the lives of women and their families A decade on from Corston s publication it critically reviews her report revealing the slow progress in meeting the reforms it proposed Identifying the significant barriers to change it questions the failure to reverse the unrelenting growth of the women s prison population or to transform state responses to women s offending Reflecting the global expansion of women s imprisonment particularly marked in advanced democratic societies the chapters include comparative contributions from jurisdictions where Corston s recommendations have relevance It concludes with a critical appraisal of reformism and the case for penal abolition Essential for applied and theory courses on prisons punishment and penology social justice and the criminology of human rights gender and crime and feminist criminology

*Regulation and Regulators after Global Financial Crises* Aleksandra Jordanoska, 2024-12-31 This book provides an original theoretically and empirically grounded analysis of regulatory enforcement activism in post crisis periods and the ensuing regulatory interactions It critically addresses the more regulation enforcement agenda relating to financial misconduct in the aftermath of the 2008 financial crisis showing how misconduct was constructed through the enforcement policies and practices of the powerful UK financial conduct regulator and its interactions with the subjects of enforcement proceedings and their legal representatives during a tumultuous time in the financial markets Drawing from interviews with regulators professional intermediaries and markets participants documentary analysis of enforcement decisions and speeches and observations the volume adopts an interdisciplinary approach grounded in social constructivist perspectives on compliance and deviance regulation theory and socio legal research Through a multi dimensional analytical framework of regulatory enforcement activism that links shifts in regulatory policymaking experimentations with legal powers in information gathering legal and extra legal penalties and individual accountability and the use of enforcement tools in micro level interactions the book documents a more interventionist and punitive post crisis enforcement agenda The findings challenge current thinking in the scandal and reform literature The work argues that despite the increased focus on enforcement it is not necessarily the case that the power has tilted more towards the regulator This fine grained socio legal

enquiry makes innovative and timely theoretical contributions to our understanding of the limitations of regulatory activism and regulatory control regulatory relationships the governance of financial markets and broader thinking on regulating corporations and the individuals within them It will appeal to academics researchers regulators and policymakers working in regulation across law criminology sociology and politics
