Campbell, 1999-04-13 Carole Campbell examines the position of women in the AIDS epidemic women living with HIV and women caring for HIV infected family members in a sociocultural context Campbell draws a connection among women's risk of AIDS gender roles particularly adolescent gender role socialization and male sexual behavior demonstrating that efforts to contain the spread of the disease to females must also target the male behavior that puts women at risk This study concludes that compared with men HIV infected women face unequal access to care and unequal quality of care Informed by the moving personal accounts of eleven HIV infected men and women this book offers a rare broad picture of the sociocultural causes and the impact on American society of AIDS among women *Readings in the Sociology of AIDS* Anthony J.

Psychology and Sociology Applied to Medicine Beth Alder, Edwin van Teijlingen, MA, MEd, PhD, Michael Porter, BA, MPhil, 2009-06-17 This textbook in the Illustrated Colour Text series offers an integrated treatment of sociology and psychology for medical students It is presented in a much more colourful and graphic format than is usual for books on these two subjects This integration reflects the tendency to teach these two subjects together as behavioural science with an increased stress on the place of medicine in society and on illness as a product of psychological and social circumstances rather than merely a biological phenomenon The book reflects these trends and has been successful and popular with students An integrated treatment of psychology and sociology for medical students in line with the trend towards teaching these subjects as behavioural sciences Use of case studies and Stop Think boxes encourages critical thinking and discussion Graphic Illustrated Colour Text presentation style enlivens a subject which most medical students are not keen on This third

Meddling with Mythology Rosaline S. Barbour,Guro Huby,2005-08-04

Meddling with Mythology examines the role of research in the construction of modern mythology or folklore surrounding HIV/AIDS. Researchers from a variety of disciplines reflect on the insights gained and the impact of their work in light of the initial panic surrounding the prediction of an AIDS epidemic. Issues discussed include power representation, the politics of text, understanding research relationships, impact of research on researchers and responders, potential for change. Meddling with Mythology takes the reader from the theoretical to the practicable and from the public to the personal in the representations of AIDS. The issues raised here also have great significance for those concerned with the social construction of knowledge, theory building, and the research process more generally.

Understanding the HIV/AIDS Epidemic in the United States Eric R. Wright, Neal Carnes, 2016-07-30. This book examines the HIV/AIDS epidemic in the United States using the concept of syndemics to contextualize the risk of both well-known and a few lesser-known subpopulations that experience disproportionately high rates of HIV and/or AIDS within the United States. Since discovery, HIV/AIDS has exposed a number of social, psychological, and biological aspects of disease transmission. The concept of syndemics or synergistically interacting epidemics has emerged as a powerful framework for understanding both the epidemiological patterns and the myriad of problems associated with HIV/AIDS around the world and within the United States. The book considers the disparities in HIV/AIDS in relation to social aspects, risk behavior, and critical illness comorbidities. It updates and enhances our understanding of the HIV/AIDS epidemic in the United States and contributes to the expanding literature on the role of syndemics in shaping the public's health.

The Endangered Self Gill Green, Elisa Janine Sobo, 2000. The Endangered Self focuses on how the discovery of an HIV-positive status affects the individual's sense of identity, on the experience of living with HIV, and its effects on the individual's social relationships.
