Alwin,Diane H. Felmlee,Derek A. Kreager,2018-03-06 This volume engages the interface between the development of human lives and social relational networks It focuses on the integration of two subfields of sociology social science the life course and social networks Research practitioners studying social networks typically focus on social structure or social organization ignoring the complex lives of the people in those networks At the same time life course researchers tend to focus on individual lives without necessarily studying the contexts of social relationships in which lives are embedded and linked to one another through social networks These patterns are changing and this book creates an audience of researchers who will better integrate the two subfields It covers the role of social networks across the life span from

childhood and adolescence to midlife through old age **Identities and Social Change in Britain Since 1940** Michael Savage, 2010-05-13 *Identities and Social Change in Britain since 1940* examines how between 1940 and 1970 British society was marked by the imprint of the academic social sciences in profound ways which have an enduring legacy on how we see ourselves. It focuses on how interview methods and sample surveys eclipsed literature and the community study as a means of understanding ordinary life. The book is the first to draw extensively on archived qualitative social science data from the 1930s to the 1960s which it uses to offer a unique personal and challenging account of post war social change in Britain. It also uses this data to conduct a new kind of historical sociology of the social sciences one that emphasises the discontinuities in knowledge forms and which stresses how disciplines and institutions competed with each other for reputation. Its emphasis on how social scientific forms of knowing eclipsed those from the arts and humanities during this period offers a radical rethinking of the role of expertise today which will provoke social scientists, scholars in the humanities and the general reader alike.

Lawyers, Networks and Progressive Social Change Jacqueline Kinghan, 2021-06-17 Written by a lawyer who works at the intersection between legal education and practice in access to justice and human rights, this book locates, describes and defines a collective identity for social justice lawyering in the UK. Underpinned by theories of cause lawyering and legal mobilisation, the book argues that it is vital to understand the positions that progressive lawyers collectively take in order to frame the connections they make between their personal and professional lives, the tools they use to achieve social change as well as ethical tensions presented by their work. The book takes a reflexive ethnographic approach to capture the stories of 35 lawyers working to positively transform law and policy in the UK over the last 50 years. It also draws on a wealth of primary sources including case reports, historic campaign materials and media analysis alongside wider ethnographic interviews with academics, students and lawyers and participant observation at social justice conferences, workshops and events. The book explains the way in which lawyers' networks facilitate their collective positioning and influence their strategic decision making which in turn shapes their interactions with social activists, with other lawyers and with the state itself.
