Critical Strategies for Social Research William K. Carroll,2004 Edited by Canadian sociologist William K Carroll this thought provoking volume is designed for research methods courses in sociology and social sciences Critical Strategies for Social Research explores ways in which several key research strategies bring an emancipatory dimension to social analysis The new approaches recognize that social analysis is a form of knowledge production that takes place in a human constructed world marked by injustice and persistent inequality Carroll considers five influential and productive strategies of inquiry Dialectical Social Analysis Institutional Ethnography Participatory Action Research Critical Discourse Analysis Social Inquiry as Communicative Reason

**Critical Theories of Anti-Semitism** Jonathan Judaken,2024-06-04 Despite its persistence and viciousness anti Semitism remains undertheorized in comparison with other forms of racism and discrimination How should anti Semitism be defined What are its underlying causes Why do anti Semites target Jews In what ways has Judeophobia changed over time What are the continuities and disconnects between medieval anti Judaism and the Holocaust How does criticism of the state of Israel relate to anti Semitism And how can social theory illuminate the upsurge in attacks on Jews today Considering these questions and many more this book is at once a philosophical reflection on key problems in the analysis of anti Semitism and a history of its leading theories and theorists Jonathan Judaken explores the methodological and conceptual issues that have vexed the study of Judeophobia and calls for a reconsideration of the definitions categories and narratives that underpin overarching explanations He traces how

a range of thinkers have wrestled with these challenges examining the theories of Jean Paul Sartre the Frankfurt School Hannah Arendt and Jean Fran ois Lyotard alongside the works of sociologists Talcott Parsons and Zygmunt Bauman and historians L on Poliakov and George Mosse Judaken argues against claims about the uniqueness of Judeophobia demonstrating how it is entangled with other racisms Islamophobia Negrophobia and xenophobia Critical Theories of Anti Semitism not only urges readers to question how they think about Judeophobia but also draws them into conversation with a range of leading thinkers whose insights are sorely needed in this perilous moment

**The State of the American Mind: Stupor and Pathetic Docility Volume Ii** Amechi Okolo, 2010-06-11 This book The State of the American Mind Stupor and Pathetic Docility Volume One begins to unravel some of the most obvious perplexing embarrassing and enduring problems and contradictions of American history and sociology viz how could the American revolution that started with the most ringing and most inspiring Declarations of human equality in world history end up establishing the most vicious exploitative society the world ever knew Black chattel slavery and only ten percent white enfranchisement etc Further how could men of such great wisdom and intellect like George Washington James Madison Thomas Jefferson and others who were Enlightenment scholars and clearly knew that slavery was despicable and evil because they had variously experienced white servitude and slavery themselves collude to establish and institutionalize the horrible system of Negro chattel slavery in America and also disenfranchised over 90 percent of people of their own race actions that racism could not explain The structural institutional slavery system they established and the resultant consequent racism hobbles America today as it did in the past and forced Eric Holder the Attorney General to declare that America is a nation of cowards when it comes to race discussions Thus this book starts with serious critical discussions of race in America and reveals what no textbook has ever done viz that most early American whites and Blacks were slaves an uncomfortable fact that would shock most Americans because it contradicts the orthodoxy or the dominant narrative that only Blacks were brought here in chains Further the book also shows the year Black slavery started something almost all textbooks got wrong It also shows who was the fi rst Black slave in America something no textbook ever mentions It also shows when and how racism started in America and many other very sensitive and embarrassing but necessary issues that America avoids but must be frankly discussed for America to move forward This book therefore shatters the two dominant themes of Americas history and sociology that Blacks were brought into America in chains as slaves while whites came to America in search of freedom as Harvard educated President Obama famously told us in his race speech Thus the crowning lesson of this book in addition to discussing some critical policy issues like education health care etc is that it discovers the centripetal force of the American society that eluded contemporary Americans because American bosses have laboriously concealed the facts from the public the scary but clearly healthy uniting fact that most Americans are united by their common ancestry their universal history and experience of servitude bond indentures and slavery Nothing is more universal more common and more shared in American history and

sociology than the fact that most of our ancestors black and white were servants bond indentures and slaves who were dominated and super exploited by few overlords Colonial America was the preferred dumping ground for British outcasts rejects criminals masterless class vagabonds bond indentures slaves etc until 1776 when Australia replaced America as the British dump for its rejects and surplus citizens Thus that America was a nation founded by British rejects and losers is inherently more rational than the prevailing orthodoxy or the Obama theory of Americas founders that they were great honorable men who journeyed across the ocean for freedom because of the obvious reason that good powerful achieving citizens do not normally emigrate to new uncharted lands

**Critical paediatric bioethics and the treatment of short stature** Maria Cristina Murano, 2019-03-27 Several studies have argued that there is a correlation between short stature and negative experiences and characteristics such as social discrimination economic disadvantage health problems especially for men The idea that short men have a disadvantage in social interactions and in partner choices is also widespread in popular culture and common knowledge It is now possible to use recombinant human growth hormone hGH to treat children with idiopathic short stature ISS namely children who are shorter than average for unknown medical reasons Critics argue that there is a lack of evidence of both psychological distress caused by short stature and the efficacy of the treatment in increasing children s well being This controversy is reflected in international drug evaluations while the Food and Drug Administration FDA in the US granted marketing authorisation for hGH for children with ISS in 2003 the European Medicines Agency EMA refused it in 2007 The research presented here had two aims first to identify and analyse the norms values and assumptions about short stature and the use of hGH treatment for children with ISS found within sociocultural philosophical and regulatory discussions of these and within narrated lived experiences of short stature Second to critically and reflectively discuss how these analyses contribute to bioethical debates on the use of hGH treatment for children with ISS It employs what it calls a critical paediatric bioethics theoretical approach which deems as important to carefully analyse different reasoning conceptualisations and arguments around the object of study through a self reflective analysis that is also sceptical about other forms of problematisation and that combines philosophical analyses while being open to social implications and drawing upon empirical methods The first article proposes a critical understanding of medicalisation as both a concept and a phenomenon and explores what insights such critical understanding brings to ethical discussions about hGH for ISS It argues that three main ethical issues concern the medicalisation of short stature the downplayed role of the qualitative dimension of short stature the justification of the treatment as sometimes based on uncritically assumed social beliefs and unrealistic parental expectations and possible misconduct of stakeholders The second article examines the arguments for and against granting marketing authorisation of hGH treatment for the indication of ISS presented in selected FDA and EMA documents It combines argumentative analysis with an approach to policy analysis called what s the problem represented to be and focuses on underlying assumptions and presuppositions about short stature and hGH treatment for ISS

It then discusses these arguments through the relational experiential and cultural understandings of disability and argues that the choice about whether to give hGH is not merely a choice based on efficacy and safety but requires an examination of the values that we transmit by that choice The third article examines how and why attendance to lived experiences of height is needed in bioethical and biomedical discussions of hGH treatment for children with ISS It first describes what it defines as the problem oriented approach to the debate about hGH treatment for children with ISS It then offers a sociophenomenological analysis of whether and if so when and how height matters to the interviewed people in the Netherlands who are shorter than average without any known medical reasons The sociophenomenological analysis shows the richness of meanings of lived experiences of short stature that cannot be captured by the problem oriented approach and suggests complementing clinical practices with narrative approaches This research contributes to the ethical debate about using hGH for children with ISS setting a critical gaze onto the social perception of short stature highlighting some ethical challenges met by stakeholders involved at different levels such as families medical professionals and policy makers and providing new insights into how to address these ethical issues It is therefore of interest to stakeholders bioethicists and lay people willing to explore alternative ways to address such bioethical dilemmas and other paediatric interventions that aim to normalise children s bodily characteristics      Understanding Justice 2/E Hudson, Barbara,2003-03-01 This revised and updated edition of a highly successful text provides a comprehensive account of the ideas and controversies that have arisen within law philosophy sociology and criminology about the punishment of criminals Written in a clear accessible style it summarises major philosophical ideas retribution rehabilitation incapacitation and discusses their strengths and weaknesses

Mertel,L'ubomír Dunaj,2022-06-02 Providing a comprehensive engagement with the work of Hans Herbert Kögler this is the first volume to expand upon and critique his distinctive approach to critical theory critical hermeneutics In the current climate of crisis the relevance and fruitfulness of Kögler's work has never been greater as he fuses the philosophies of Michel Foucault Hans Georg Gadamer and his mentor Jürgen Habermas to respond to critical international issues surrounding politics agency and society Working towards a truly non
