**Selected Water Resources Abstracts**, 1974

Water, Energy, Food and People Across the Global South Larry A. Swatuk, Corrine Cash, 2017-10-16 This collection critically engages the resource use nexus Clearly a nexus approach to resource policy planning and practice is essential if sustainable development goals are to be met In particular in an era of climate change an integrated approach to water energy and agriculture is imperative Agriculture accounts for 70% of global water withdrawals food production accounts for 30% of global energy use and a rising global population requires more of everything As shown in this collection scholars of resource development governance and management are nexus sensitive utilizing a sort of nexus sensibility in their work as it focuses on the needs of people particularly but not only in the global South Importantly a nexus approach presents academics and practitioners with a discursive space in which to shape policy through research to deepen and improve understandings of the interconnections and impacts of particular types of resource use and to critically reflect on actions taken in the name of the nexus

*Soil Management of Smallholder Agriculture* Rattan Lal, B.A. Stewart, 2014-11-24 Nearly two billion people depend on hundreds of millions of smallholder farmers for food security Yet these farmers' lives also hang in the balance due to their extreme vulnerability to the risks of soil degradation and depletion soil exhaustion climate change and numerous biotic and abiotic stresses *Soil Management of Smallholder Agriculture* explores the potential smallholder agriculture hold for advancing global food security and outlines the challenges to achieving this goal The book addresses the challenges and opportunities that resource poor and small landholders face and provides recommended management practices to alleviate soil related constraints and increase and sustain crop yield and production It discusses the cultural economic social and technological aspects of sustainable soil management for smallholder farmers It then examines soil related and institutional constraints principles of sustainable agriculture soil quality improvement nutrient and soil fertility management soil carbon sequestration soil security efficient use of resources and agronomic production Edited by experts the book makes the case for

the adoption of proven technologies of sustainable intensification producing more from less both for advancing agronomic production and adapting to changing climate It outlines a strategy that will usher in a soil based Green Revolution by increasing the use efficiency of energy based inputs such as fertilizers pesticides and irrigation to restore soil quality and sequestering carbon in the terrestrial ecosystems This strategy helps small farms narrow the gap between the actual and attainable crop yield
