The New Farm ,1988 Life Science Ethics Gary L. Comstock,2010-08-24 Does nature have intrinsic value Should we be doing more to save wilderness and ocean ecosystems What are our duties to future generations of humans Do animals have rights This revised edition of Life Science Ethics introduces these questions using narrative case studies on genetically modified foods use of animals in research nanotechnology and global climate change and then explores them in detail using essays written by nationally recognized experts in the ethics field Part I introduces ethics the relationship of religion to ethics how we assess ethical arguments and a method ethicists use to reason about ethical theories Part II demonstrates the relevance of ethical reasoning to the environment land farms food biotechnology genetically modified foods animals in agriculture and research climate change and nanotechnology Part III presents case studies for the topics found in Part II

The Final Empire Wm. H. Kötke,2007-11 In spite of its tough message there is much compassion and humanity in The Final Empire Right away as you begin to read this work you sense increasingly the grand perspective in K tke s words He is not speaking of anarchy He is offering vital common sense It s just that his meaning is so unavoidably political And so much against what we have been taught all our lives The materialistic values of civilization teach us that the accumulation of wealth is progress The material wealth of the civilization is derived from the death of the earth the soils the forests the fish stocks the free resources of flora and fauna The ultimate end of this is for all human species to live in giant parasitical cities of cement and metal while surrounded by deserts of exhausted soils The simple polar opposites are the richness and wealth of the natural life of earth versus the material wealth of people living out their lives in artificial environments This amounts to a direct challenge to humankind A demand for radical change A re envisioning of our part in the community of life and the precepts of individuality And Mr K tke provides a strong argument for this case He traces the environmental scars of civilization through the ages Empire after empire desertification of the top soil winds its way around the globe in an erosive helix from China to India to Mesopotamia to Italy to North America As radical as it may seem at first glance The Final Empire is a necessary and sensible primer for the recovery of the planet It blends a critical statistical analysis of our deteriorating environment with a positivism of hope for a post empire age and a new whole human relation to the living community of Earth Dan Armstrong Author of the Novels Prairie Fire and Taming the Dragon **The U.S. Agricultural Policy Debate**
