Crane Valve World ,1924      **The Valve World** ,1924      **Metaeconomics** Gary D. Lynne,2020-11-13

This book presents the Metaeconomics Framework and Dual Interest Theory which weave the empathy based moral and ethical dimension back into key economic questions Metaeconomics addresses the problem of placing too much emphasis on the market or the government and thus argues that seeing the link between ego and empathy self and other interest and market and government will lead to a more just fair and sustainable polity The unique Dual Interest Theory proposes that ego based self interest and empathy based other interest are joint and internal to each person it maintains the original proposition from Adam Smith that each person maximizes their own interest which Metaeconomics makes clear involves balancing the two joint interests although self interest is more primal The book begins with an explanation of how Metaeconomics connects the other kinds of economics The book then provides a series of applications of Metaeconomics in heated policy issues such as elections finance family food health natural resources education taxes and extreme inequality among others Finally the book concludes that the only way to save capitalism is to bring empathy into both private and public actions and bring about a more humane balance in market and government
