Solo The Story Of An African Wild Dog:

Solo Hugo van Lawick,1973 **Solo ; the Story of an African Wild Dog Puppy and Her Pack** Hugo van Lawick,1973
Jane Goodall Dale Peterson,2008 Peterson shows clearly and convincingly how truly remarkable Goodall's accomplishments were and how unlikely it is that anyone else could have duplicated them This biography details how Goodall helped set radically new standards and a new intellectual style in the study of animal behavior **Solo** Hugo van Lawick,1973 *The African Wild Dog* Joshua Ross Ginsberg,David Whyte Macdonald,IUCN/SSC Canid Specialist Group,1997 Over the last 30 years the African wild dog population has declined dramatically Dogs have disappeared from 25 of the 39 countries where they were previously found and only 6 populations are believed to number more than 100 Today it is believed that only between 3 000 5 500 dogs remain in 600 1 000 packs with most to be found in eastern and southern Africa The dramatic reduction in their population is attributed to a number of factors including human population growth and activities deterioration of habitat and contact with domestic dogs and their diseases This Action Plan explores some of the reasons behind their disappearance and provides a number of proposed solutions split into 3 priority areas ranging from habitat management and conservation to monitoring domestic dogs **Wildlife 2001: Populations** D.R. McCullough,R.H. Barrett,2012-12-06 In 1984 a conference called Wildlife 2000 Modeling habitat relationships of terrestrial vertebrates was held at Stanford Sierra Camp at Fallen Leaf Lake in the Sierra Nevada Mountains of California The conference was well received and the published volume Verner J M L Morrison and C J Ralph editors 1986 Wildlife 2000 modeling habitat relationships of terrestrial vertebrates University of Wisconsin Press Madison Wisconsin USA proved to be a landmark publication that received a book award by The Wildlife Society Wildlife 2001 populations was a followup conference with emphasis on the other major biological field of wildlife conservation and management populations It was held on July 29 31 1991 at the Oakland Airport Hilton Hotel in Oakland California in accordance with our intent that this conference have a much stronger international representation than did Wildlife 2000 The goal of the conference was to bring together an international group of specialists to address the state of the art in wildlife population dynamics and set the agenda for future research and management on the threshold of the 21st century The mix of specialists included workers in theoretical as well as practical aspects of wildlife conservation and management Three general sessions covered methods modelling and conservation of threatened species **The Woman That Never Evolved** Sarah Blaffer Hrdy,1999-12-20 What does it mean to be female Sarah Blaffer Hrdy a sociobiologist and a feminist believes that evolutionary biology can provide some surprising answers Surprising to those feminists who mistakenly think that biology can only work against women And surprising to those biologists who incorrectly believe that natural selection operates only on males In *The Woman That Never Evolved* we are introduced to our nearest female relatives competitive independent sexually assertive primates who have every bit as much at stake in the evolutionary game as their male counterparts do These females compete among themselves

for rank and resources but will bond together for mutual defense They risk their lives to protect their young yet consort with the very male who murdered their offspring when successful reproduction depends upon it They tolerate other breeding females if food is plentiful but chase them away when monogamy is the optimal strategy When promiscuity is an advantage female primates like their human cousins exhibit a sexual appetite that ensures a range of breeding partners From case after case we are led to the conclusion that the sexually passive noncompetitive all nurturing woman of prevailing myth never could have evolved within the primate order Yet males are almost universally dominant over females in primate species and *Homo sapiens* is no exception As we see from this book women are in some ways the most oppressed of all female primates Sarah Blaffer Hrdy is convinced that to redress sexual inequality in human societies we must first understand its evolutionary origins We cannot travel back in time to meet our own remote ancestors but we can study those surrogates we have the other living primates If women and not biology are to control their own destiny they must understand the past and as this book shows us the biological legacy they have inherited

The Biology of African Savannahs Bryan Shorrocks, 2007-08-30 Savannah habitats comprise an ecologically important but ultimately fragile ecosystem They constitute one of the largest biomes on Earth covering about twenty percent of the land surface and can be simply described as tropical and subtropical grasslands with scattered bushes and trees Most savannahs occur in Africa with a smaller amount in South America India and Australia which is the region that this book concentrates on Savannahs form a rich mosaic of diverse ecosystems and *The Biology of African Savannahs* offers a concise but comprehensive introduction to their ecology It describes the major plants grasses and trees such as *Acacia* and animals mainly large mammals that live in this habitat and examines the biological and ecological factors that influence their population size interactions such as predation and community composition Conservation issues such as climate change hunting and conflict between wildlife and domestic animals are also discussed This accessible text is suitable for both senior undergraduate and graduate students taking courses in savannah and tropical ecology as part of a wider ecology and or conservation biology degree programme It will also be of relevance and use to the many professional ecologists and conservation practitioners requiring a concise but authoritative overview of the topic

Africana Scandinavica, 1969-1974, 1996 *The Black-Tailed Prairie Dog* John L. Hoogland, 1995-04 In *The Black Tailed Prairie Dog* John L. Hoogland draws on sixteen years of research at Wind Cave National Park South Dakota in the United States to provide this account of prairie dog social behavior Through comparisons with more than 300 other animal species he offers new insights into basic theory in behavioral ecology and sociobiology Hoogland documents interactions within and among families of prairie dogs to examine the advantages and disadvantages of coloniality By addressing such topics as male and female reproductive success inbreeding kin recognition and infanticide Hoogland offers a broad view of conflict and cooperation Among his surprising findings is that prairie dog females sometimes suckle and at other times kill the offspring of close kin Enhanced by more than 100 photographs this book illuminates the social organization of a burrowing mammal

and raises fundamental questions about current theory As the most detailed long term study of any social rodent The Black Tailed Prairie Dog will interest not only mammalogists and other vertebrate biologists but also students of behavioral and evolutionary ecology

The Langurs of Abu Sarah Blaffer Hrdy, 1980 The Langurs of Abu will for many years remain one of the major studies of wild primates both for its observational and theoretical content Alison Jolly Sexual combat is not a monopoly of the human species As Sarah Blaffer Hrdy argues in this spellbinding book war between male and female animals has deep roots in evolutionary history Her account of family life among hanuman langurs the black faced gray monkeys inhabiting much of the Indian subcontinent is written with force wit and at times sorrow Male hanumans in pursuit of genetic success routinely kill babies sired by their competitors The mothers of endangered infants counter with various stratagems to deceive the males and prevent destruction of their own offspring Competition and selfishness are dominant themes of langur society Competition among males for access to females competition among females for access to food resources and disregard by one female for the well being of another's infant these are some very common examples Yet there are also moments of heroic self sacrifice as when an elderly female rushes to defend her troop and its babies from an invading infanticidal male The Langurs of Abu is the first book to analyze behavior of wild primates from the standpoint of both sexes It is also a poignant and sophisticated exploration of primate behavior patterns from a feminist point of view This book may inspire controversy it will certainly be read with pleasure by anyone interested in animal behavior Richly illustrated with photographs seven in full color
