Situated Meaning Inside And Outside In Japanese Self Society And Language:

Situated Meaning Jane M. Bachnik, Charles J. Quinn Jr., 2019-01-15 Situated Meaning adds a new dimension both literal and metaphoric to our understanding of Japan. The essays in this volume leave the vertical axis of hierarchy and subordination an organizing trope in much of the literature on Japan and focus instead on the horizontal interpreting a wide range of cultural practices and orientations in terms of such relational concepts as uchi inside and soto outside. Evolving from a shared theoretical focus, the essays show that in Japan the directional orientations inside and outside are specifically linked to another set of meanings denoting self and society. After Donald L. Brenneis's foreword, Jane M. Bachnik, Charles J. Quinn Jr., Patricia J. Wetzel, Nancy R. Rosenberger, and Robert J. Soble discuss Indexing Self and Social Context. Failure to Index Boundary Disintegration and Social Breakdown is the topic of Dorinne K. Kondo. Matthews M. Hamabata, Michael S. Molasky, and Jane Bachnik. Finally, Charles Quinn explores Language as a Form of Life. Jane M. Bachnik is Associate Professor of Anthropology at the University of North Carolina at Chapel Hill. She is presently pursuing research in Japan under a Senior Fellowship Grant from the Japan Foundation. Charles J. Quinn Jr. is Associate Professor of East Asian Languages and Literatures at the Ohio State University. Life in a Japanese Women's College Brian J. McVeigh, 2013-09-13 One third of the Japanese female workforce are office ladies and their training takes place in the many women's junior colleges. Office ladies are low wage, low status secretaries who have little or no job security. Brian J. McVeigh draws on his experience as a teacher at one such institution to explore the cultural and social processes used to promote femininity in Japanese women. His detailed and ethnographically informed study considers how the students of these institutions are socialized to fit their future dual roles of employees and mothers and illuminates the sociopolitical role that the colleges play in Japanese society as a whole. **An Emerging Non-Regular Labour Force in Japan** Huiyan Fu, 2013-03-01 Like many industrialised nations, the current employment trend in Japan centres on diversification of the labour market with an increased use of temporary labour. Among a wide range of non-regular labour arrangements, haken are a newly legalised category of non-regular workers who are typically employed by the employment agency while working at the facilities of and being under the authority of the client firm. They have recently expanded exponentially under the state's deregulation policy and assumed considerable significance in political debate, especially with regard to the nation's widening gaps known as kakusa. This is the first anthropological study of haken and temporary agency work (TAW) in Japan which combines both macro and micro level analyses. At the macro level, haken are

explored from a historical perspective with a view to showing the changing state policy and public perception of haken At the micro level how TAW is experienced by real people in concrete situations is extremely varied and complex often depending on intersecting structural variables including gender age and class The book therefore provides insight into the gap between powerful discourses and everyday life as well as a better understanding of personhood in Japan s shifting landscape of employment This book will be of interest to students and scholars of Japanese Studies Japanese Business Asian Business and Asian Anthropology

Politeness in East Asia Dániel Z. Kádár, Sara Mills, 2011-09-08 We use politeness every day when interacting with other people Yet politeness is an impressively complex linguistic process and studying it can tell us a lot about the social and cultural values of social groups or even a whole society helping us to understand how humans encode states of mind in their words The traditional stereotypical view is that people in East Asian cultures are indirect deferential and extremely polite sometimes more polite than seems necessary This revealing book takes a fresh look at the phenomenon

showing that the situation is far more complex than these stereotypes would suggest Taking examples from Japanese Korean Chinese Vietnamese and Singaporean Chinese it shows how politeness differs across countries but also across social groups and subgroups This book is essential reading for those interested in intercultural communication linguistics and East Asian languages

Schooling Selves Peter Cave, 2016-06-07 Balancing the development of autonomy with that of social interdependence is a crucial aim of education in any society but nowhere has it been more hotly debated than in Japan where controversial education reforms over the past twenty years have attempted to reconcile the two goals In this book Peter Cave explores these reforms as they have played out at the junior high level the most intense pressure point in the Japanese system a time when students prepare for the high school entrance exams that will largely determine their educational trajectories and future livelihoods Cave examines the implementation of relaxed education reforms that attempted to promote individual autonomy and free thinking in Japanese classrooms As he shows however these policies were eventually transformed by educators and school administrators into curricula and approaches that actually promoted social integration over individuality an effect opposite to the reforms intended purpose With vivid detail he offers the voices of teachers students and parents to show what happens when national education policies run up against long held beliefs and practices and what their complex and conflicted interactions say about the production of self and community in education The result is a fascinating analysis of a turbulent era in Japanese education that offers lessons for educational practitioners in any country

Roadblocks on the Information Highway Jane Bachnik, 2003-01-01 Although Japanese universities have relied on information technology to resolve numerous problems their high expectations are undermined by lags in implementing that technology This innovative edited volume argues that lags in IT implementation in Japanese education are created by contradictory and challenging responses of the social environment If this dialectic can be visualized as having hands the right avidly promotes IT while the left hand simultaneously blocks it The result of course is an impasse The issues central to this stalemate are significant because they point beyond the schools to a broader set of problem areas in Japanese society The contributors to Roadblocks on the Information Highway discover and discuss the contradictions inherent in Japanese society and culture as they are played out in the social contexts of IT service providers web masters and classroom teachers who implement IT They then show how these contradictions indicate broader structural problems that pervade the dynamic between Japanese education and the state and business sectors Ultimately in a reach that goes beyond Japan this book examines relationships between technology and society persuasively convincing readers that the modern age has created an inextricable link between the two
