Social Creatures

Pasquale De Marco

Social Creatures:

Social Creatures Clifton P. Flynn, 2008 Other than human animals are an overwhelming presence in our collective and individual lives and at the same time are taken for granted by human animals Sociologists have neglected the study of human animal interaction and the role of animals in society This is true despite the fact that animals are an integral part of our lives in our language food families economy education science and recreation In more than thirty essays *Social Creatures* examines the role of animals in human society Collected from a wide range of periodicals and books these important works of scholarship examine such issues as how animal shelter workers view the pets in their care why some people hoard animals animals and women who experience domestic abuse philosophical and feminist analyses of our moral obligations toward animals and many other topics *Social Creatures* includes work by Peter Singer Tom Regan Carol J Adams Josephine Donovan Barbara Noske Arnold Arluke Ken Shapiro and many leading scholars anthropologists and psychologists The book also comes with an extensive bibliography of hundreds of articles and books

Social Beings Susan T. Fiske, 2018-08-14 It is a nearly universal truth that people need people humans have adapted to life with other humans and the interactions and relationships that result are the most relevant adaptation environment This book explores the core motives and goals that shape these interactions with others with the self and collectively as a group in other words Why do people do what they do A brief overview of the field's unifying themes belonging understanding controlling enhancing self and trusting gives way to a detailed exploration of the human condition as well as the techniques used to study and understand it By delving into the motivations behind attraction helping bias persuasion aggression and more this book helps students grasp the complex interplay of internal and external cues and influences that inform every interaction An emphasis on real world applications relates social psychology principles to everyday life and this latest revision has been updated with the most recent research and trends to provide an accurate picture of the state of the field Blending traditional topics with new developments in an informal readable style makes this the ideal text to ignite students deeper interest and full engagement with social psychology concepts

Cultural Beings Yuval Lurie, 2021-12-28 Human beings are a cultural species This predicament enables them to take on many different cultural identities all of which transcend the bounds of natural behavior of other species To contemplate this predicament through philosophy is to reflect on such questions as What makes cultural forms of life possible What is encompassed in them What lies at their core What distinguishes them from natural forms of life What brings them about sustains and causes them to change Philosophical answers to these questions predate abstract ways of thinking as they are sometimes embedded in ancient mythical and religious narratives Such is the story told in the first three chapters of the book of Genesis in the Bible revealing how human beings became the cultural beings that they are This study suggests how that ancient and most celebrated story in the literature of the West may be read as harboring insightful philosophical observations on the cultural nature of human beings It first focuses on the very concept of cultural forms of life

revealing its complicated conceptual links to natural forms of life It then offers an interpretive framework for reading mythical symbolic narratives Using these ideas it provides a philosophical reading of the Biblical narrative disclosing it to harbor a metaphysically oriented conception of nature and two insightful philosophical overviews of the cultural nature of human beings Both overviews endow human beings with an ability to manipulate nature but in different ways the first by subjugating parcels of nature to human will the second by subjugating human beings themselves to a value laden conception of things and ethical forms of life Thus human beings are portrayed as natural creatures possessed of a cultural nature that enables them to transform nature and recreate themselves through their unique cultural predicament **The Social**

Animal Walter Garrison Runciman, 2000 What kind of social animal are we A provocative and stimulating answer **On Earth as It Is in Heaven** David Vincent Meconi S.J., 2016 With the recent publication of Pope Francis's encyclical *Laudato Si* many people of faith have found themselves challenged to seek new ways of responding to serious ecological questions essential to the flourishing of all creatures *On Earth as It Is in Heaven* brings together fifteen top scholars to consider pressing contemporary environmental concerns through the lens of Catholic theology Drawing from ancient Christian sources the contributors delve into such diverse topics as equitable food distribution responsible procreation land stewardship evolutionary theodicy and poverty and providence A concluding essay addresses the liturgy as the space in which all creation is consecrated before the cross of Christ Allowing the earliest Church Fathers and voices from the Christian tradition to speak to our unique circumstances today this engaging volume shows that ancient creedal Christianity contains important insights into caring for God's creation *Evolution and the Foundations of Ethics* John

Mizzoni, 2017-02-03 If human biological evolution is part of our worldview then how do commonplace notions of ethics fit in To ask the question what does evolution imply about ethics we must first be clear about what we mean by evolution *Evolution and the Foundations of Ethics* discusses four models of evolution represented by Darwin Dawkins Gould and Haught We must also be clear about what we mean by ethics Do we mean metaethics If so which variety With metaethical theories such as Error Theory Expressivism Moral Relativism and Moral Realism theorists are attempting to explain the general nature status and origins of ethics In the first four chapters of this book Part I John Mizzoni examines how metaethical theories fit with evolution Next in asking about the implications of evolution for ethics do we mean normative ethics Theorists who work with normative ethical theories such as Virtue Ethics Natural Law Ethics Social Contract Ethics Utilitarian Ethics Deontological Ethics and Ethics of Care articulate and defend a normative ethics that people can and do use in a practical way when deliberating about specific actions rules and policies The next six chapters Part II look at how normative ethical theories fit with evolution A full reckoning of ethics and evolution demands that we consider the range of ethical elements both metaethical and normative Thus this book looks at what several different models of evolution imply about four metaethical theories and six normative ethical theories This book will be of interest to scholars interested in the intersection of

evolutionary theory and ethical theory

Healthy Ways of Animals Pasquale De Marco, Animals have developed a remarkable array of strategies to maintain their health in the wild From self medication and social support to the healing power of nature animals have a profound understanding of their own bodies and the environment around them In this comprehensive guide we will embark on a journey to uncover the secrets of animal health and explore how we can learn from their wisdom to improve our own well being In the first chapter we will delve into the fascinating world of animal self medication Animals have been observed using a wide variety of plants animals and minerals to treat their ailments From chimpanzees eating bitter tasting leaves to counter intestinal parasites to elephants ingesting clay to neutralize toxins animals have an innate ability to select the right remedies for their health problems We will explore the science behind animal self medication and discuss how we can apply these insights to our own healthcare practices The second chapter delves into the healing power of nature We will explore the plants and animals that have medicinal properties and how animals use them for healing From the antibacterial properties of honey to the pain relieving effects of willow bark nature s pharmacy is filled with remedies that can benefit both animals and humans We will also discuss the role of the environment in animal health and the importance of biodiversity for maintaining a healthy ecosystem In the third chapter we will explore the social side of health Animals are social creatures and their interactions with each other play a vital role in their health and well being We will examine how animals cooperate to stay healthy the benefits of social grooming and the effects of isolation on animal health We will also discuss the importance of social support for human health and explore ways to foster stronger social connections in our communities The fourth chapter investigates the mind body connection in animals Stress can have a profound impact on an animal s health both physically and mentally We will explore the role of stress in animal health how animals cope with stress and the effects of stress on the immune system We will also discuss the importance of mental health for animal health and the link between physical and mental health in animals By understanding the mind body connection in animals we can gain insights into our own health and well being If you like this book write a review

Model Animals in Neuroendocrinology Mike Ludwig, Gil Levkowitz, 2018-08-20 Model Animals in Neuroendocrinology From Worm to Mouse to Man offers a masterclass on the opportunities that different model animals offer to the basic understanding of neuroendocrine functions and mechanisms of action and the implications of this understanding The authors review recent advances in the field emanating from studies involving a variety of animal models molecular genetics imaging technologies and behavior assays These studies helped unravel mechanisms underlying the development and function of neuroendocrine systems The book highlights how studies in a variety of model animals including invertebrates fish birds rodents and mammals has contributed to our understanding of neuroendocrinology Model Animals in Neuroendocrinology provides students scientists and practitioners with a contemporary account of what can be learnt about the functions of neuroendocrine systems from studies across animal taxonomy This is the seventh volume in the Masterclass in

Neuroendocrinology Series a co publication between Wiley and the INF International Neuroendocrine Federation that aims to illustrate highest standards and encourage the use of the latest technologies in basic and clinical research and hopes to provide inspiration for further exploration into the exciting field of neuroendocrinology **The Enlightenment's Animals** Nathaniel Wolloch,2025-10-01 In *The Enlightenment's Animals* Nathaniel Wolloch takes a broad view of changing conceptions of animals in European culture during the long eighteenth century Combining discussions of intellectual history the history of science the history of historiography the history of economic thought and not least art history this book describes how animals were discussed and conceived in different intellectual and artistic contexts underwent a dramatic shift during this period While in the seventeenth century and the first half of the eighteenth century the main focus was on the sensory and cognitive characteristics of animals during the late Enlightenment a new outlook emerged emphasizing their conception as economic resources Focusing particularly on seventeenth century Dutch culture and on the Scottish Enlightenment Wolloch discusses developments in other countries as well presenting a new look at a topic of increasing importance in modern scholarship *HUMAN(e)* Rachele Bensoussan,2024-08-16 Written by a Queer woman of North African and Middle Eastern descent *Human e* takes a radically non pathology based approach to grief and loss In this intimate and reflective auto ethnographic book Bensoussan asserts that grief is a biological imperative a life sustaining necessity that is vital to our survival *Human e* explores how our species has been living with and metabolizing loss well before there were licensed professionals and accredited institutions Bensoussan examines the inadequacy of the idea that grief is normal as grief goes well beyond the Western colonial binary of normal and abnormal Grief is human and to grieve is to be human Rachele seamlessly and beautifully weaves together her vast professional expertise on grief with her own personal lived experiences of loss *Human e* is a must read for anyone learning to live without *The Complete Works of Aristotle* Aristotle,2014-09-21 This digital edition combines for the first time both volumes of *The Complete Works of Aristotle* The Revised Oxford Translation which is universally recognized as the standard English version The Oxford Translation of Aristotle was originally published in twelve volumes between 1912 and 1954 The revised edition contains the substance of the original translation slightly emended in light of recent scholarship three of the original versions have been replaced by new translations and a new and enlarged selection of fragments has been added The aim of the translation remains the same to make the surviving works of Aristotle readily accessible to English speaking readers *The History and Philosophy of Science: A Reader* Daniel McKaughan,Holly VandeWall,2018-01-11 *The History and Philosophy of Science: A Reader* brings together seminal texts from antiquity to the end of the nineteenth century and makes them accessible in one volume for the first time With readings from Aristotle Aquinas Copernicus Galileo Descartes Newton Lavoisier Linnaeus Darwin Faraday and Maxwell it analyses and discusses major classical medieval and modern texts and figures from the natural sciences Grouped by topic to clarify the development of methods and disciplines and the unification of theories each section includes an

introduction suggestions for further reading and end of section discussion questions allowing students to develop the skills needed to read interpret and critically engage with central problems and ideas from the history and philosophy of science understand and evaluate scientific material found in a wide variety of professional and popular settings appreciate the social and cultural context in which scientific ideas emerge identify the roles that mathematics plays in scientific inquiry Featuring primary sources in all the core scientific fields astronomy physics chemistry and the life sciences The History and Philosophy of Science A Reader is ideal for students looking to better understand the origins of natural science and the questions asked throughout its history By taking a thematic approach to introduce influential assumptions methods and answers this reader illustrates the implications of an impressive range of values and ideas across the history and philosophy of Western science

Dominance and Aggression in Humans and Other Animals Henry R. Hermann, 2017-01-05 Dominance and Aggression in Humans and Other Animals The Great Game of Life examines human nature and the influence of evolution genetics chemistry nurture and the sociopolitical environment as a way of understanding how and why humans behave in aggressive and dominant ways The book walks us through aggression in other social species compares and contrasts human behavior to other animals and then explores specific human behaviors like bullying abuse territoriality murder and war The book examines both individual and group aggression in different environments including work school and the home It explores common stressors triggering aggressive behaviors and how individual personalities can be vulnerable to or resistant to these stressors The book closes with an exploration of the cumulative impact of human aggression and dominance on the natural world Reviews the influence of evolution genetics biochemistry and nurture on aggression Explores aggression in multiple species including insects fish reptiles birds and mammals Compares human and animal aggressive and dominant behavior Examines bullying abuse territoriality murder and war Includes nonaggressive behavior in displays of respect and tolerance Highlights aggression triggers from drugs to stress Discusses individual and group behavior including organizations and nations Probes dominance and aggression in religion and politics Translates the impact of human behavior over time on the natural world

Animal Studies Paul Waldau, 2013-03-28 The field requires both learning and unlearning to develop forms of critical thinking that are scientifically informed and ethically sensitive A Psychological Approach to Ethical Reality K. Hillner, 2000-11-16 The pre eminent 19th century British ethicist Henry Sidgwick once said All important ethical notions are also psychological except perhaps the fundamental antitheses of good and bad and wrong with which psychology as it treats of what is and not of what ought to be is not directly concerned quoted in T N Tice and T P Slavens 1983 Sidgwick s statement can be interpreted to mean that psychology is relevant for ethics or that psychological knowledge contributes to the construction of an ethical reality This interpretation serves as the basic impetus to this book but Sidgwick s statement is also analyzed in detail to demonstrate why a current exposition on the relevance of psychology for ethical reality is necessary and germane Aristotle on Truth, Dialogue, Justice and Decision Liesbeth Huppel-Cluysenaer, Nuno M.M.S.

Coelho,2023-12-27 In this thought provoking book you ll find timeless questions explored through a fresh lens First delving into the profound significance of Socrates dialogical method and the inescapable nature of conflict it ponders the rational capacities of humanity in terms of establishing harmonious communities But this isn t merely a philosophical debate it s a pragmatic exploration of real world challenges No longer limiting itself to abstract theories the book then seeks to navigate the practical terrain of science and politics Drawing inspiration from Aristotle renowned for his investigations into the intricate connections between theory technology ethics and politics it tackles the essential question How can we reconcile divergent views At the book s core lies Aristotle s revolutionary concept of dialogue which portrays truth as a delicate equilibrium between opposing forces transcending the rigid boundaries of true and false Join this captivating journey as the author reveals the hidden paths to meaningful coexistence in a world filled with conflicting perspectives **Critters in Jars:**

are the main messages we're sending to one another and all that logical language is just window dressing. Over billions of years of evolution, animals have become increasingly sophisticated and increasingly sentient. In the process, they evolved emotions which helped improve their odds of survival in complex situations. These emotions were at first purely internal. But at some point, social animals began expressing their emotions in increasingly dramatic ways. These emotional expressions could accurately reflect internal emotions, smiling to express happiness, or they could be quite different, smiling to cover up that you're actually furious but can't tell your boss that. Why did once stone-faced animals evolve to be so emotionally expressive to be us? The answer, as evolutionary neurobiologist Mark Changizi and mathematician Tim Barber reveal, is that emotional expressions are our first and most important language, one that allows us as social animals to engage in highly sophisticated communications and negotiations. Expressly Human introduces an original theory that explains from first principles how the broad range of emotional expressions evolved and provides a Rosetta Stone for human communication. It will revolutionize the way you see every social interaction, from deciding who gets the last slice of pizza to multimillion-dollar business negotiations and change your definition of what makes us human. *Unlocking The Secrets To Growing Younger: A Lifelong Handbook* Sarah Barakat, 2021-08-28. Do you sometimes feel older than you really are? Do you wish you could grasp on to some aspects of youth for as long as you can? Once I thought living healthy was just about eating and exercising right. Turns out there is more to it. There is having a social life, landing the right career, managing your finances, and more. This book will hand you 4 main keys to unlocking the secrets to growing younger. The 2nd key unlocks how to optimize your physical health, the 3rd key unlocks how to optimize your mental health, and the 4th key unlocks how to optimize your spiritual health. The 1st key is the one that you simply can't do without; it's a must for all the other keys to operate. It's a lifelong handbook that accompanies you on your life journey, guiding you with every step along the way on how to perfect the art of living by keeping your body, mind, and soul in a healthy, balanced state for optimal performance. It's a guide to living your life in the best possible way that would make you grow younger. America's Sex Culture Ernest J. Zarra III, 2020-08-04. America's Sex Culture: Its Impact on Teacher-Student Relationships analyzes recent trends. It includes teacher arrests and student false allegations and why this culture has ensnared teachers and students and why it is one of the causes leading to arrests. This second edition adds new material, including an analysis of sex trafficking and how this has impacted high schools and colleges, sex addiction and pornography, and the effect each has on today's students and teachers. Social media and how it has eased its way into the lives of many. Furthermore, sex and pornography are being debated at the state level. States are trying to determine whether teachers in their off hours can do whatever they want and still keep their teaching jobs. Anecdotal evidence concerning teacher arrests and why our nation is more sexualized than ever. The impact of America's sex culture and its impact upon the developing brains of students and how they relate to teachers.
