Social Horizon Of Knowledge:

Worldviews, Science And Us: Redemarcating Knowledge And Its Social And Ethical Implications Diederik Aerts,Nicole Note,Bart D'hooghe,2005-07-18 This publication features an interdisciplinary group of contributors which questions aspects of today s worldviews and science that are often taken for granted and tacitly determine the boundaries of what is generally conceived of as the world and science Some authors stress that existing demarcations are obsolete and often prevent new insights Others show how they influence the way people perceive themselves and believe the world ontologically to be determining people s actions and the social fabric There are yet others who point out how a redemarcation may stimulate the development of knowledge acquisition and social well being Examples of how bridging knowledge between different fields leads to new crucial insights while identifying the pattern of too strict a demarcation preventing such insights are also analyzed in this volume

Everyday Knowledge, Education and Sustainable Futures Margaret Robertson,Po Keung Eric Tsang,2016-06-01 Everyday knowledge offers opportunities for better understanding of significant issues of our times Reflecting these themes this book places emphasis on community wisdom The underpinning argument is that our instinctive urge for survival may not be enough if we do not share our collective knowledge and learn more about the everyday habits beliefs and actions of communities spread across the region Contributions from researchers active within local communities help build knowledge capacity and support for collaborative research

Knowledge Horizons Charles Despres,Daniele Chauvel,2012-05-23 Knowledge Horizons charts the feasible future for knowledge management This practical and provocative resource presents the work of many of the leading voices in knowledge management and related disciplines who explore the current trends and offer pragmatic and authoritative thinking on applied knowledge management from a variety of positions Knowledge management is the new frontier for businesses organizations and institutions of all kinds For those that hope to conquer this new territory establishing a better understanding of current and future knowledge management trends and adoption of the most effective practices is imperative There are numerous options for executives intranets extranets groupware and core competencies are continually being refined New entitites and rules in terms of intellectual capital and the Chief Knowledge Officer are emerging Knowledge Horizons addresses these issues by exploring current and future knowledge management trends gauging the future value of knowledge management investments and how they will drive new business initiatives and integrates the experience and insights of managers and cutting edge research from experts in the field

New Horizons for Policy Practice Richard Hoefer, 2013-09-13 This book provides fresh perspectives on the state of policy practice Leading scholars explore such vital conceptual topics such as how to impact social justice what the strengths based perspective means to policy practitioners and how to bridge the all too common gap between community organizing and direct practice in social work Other esteemed academics address topics including how to use technology to impact social justice what the impacts of the recent changes in the United States Supreme Court will be how to conceptualize the impact of ex prisoners re entry into society and how to better include marginalized populations in the policy practice The volume closes with two pieces relating to students using service learning to increase knowledge of macro interventions and integrating social capital analysis into policy practice Each topic is thoroughly covered by experts using the latest scholarly material available The reader will come away with a new perspective on the many areas where social work is involved needed and effective in making positive change in the world This book was published as a special issue of the Journal of Policy Practice

The Global and the Local Arndt Sorge, 2005-03-17 there is no lack of ambition in this book And yet unlike much of what today comes as sociology it is fun to read written in a way that combines the very abstract and the very concrete the principles of general theories and the anecdotes of specific histories in ways that are enlightening and entertaining at the same time Those who take the book to heart will find themselves in possession of a language that can speak about globalization in a non sensationalist manner

without however in any way detracting from its significance in fact quite to the contrary They will much better and more systematically understand the lasting significance of the local in a world whose horizons of action are expanding From the Foreword by Wolfgang Streeck Max Planck Institute for the Study of Societies Cologne The rhetoric of internationalization and globalization often suggests an inexorable move away from domestic cultural and institutional differences Yet the development of internationalization within individual nations has been shaped by those very domestic institutions and cultures as best practice or other kinds of international learning have been translated into established practice and knowledge In this important study Arndt Sorge presents a sociological theory of the development of human societies to explain how business systems evolve and change and how internationalization works to specify and change societal identities within nations Examining changes in work organization corporate governance and human resources Sorge shows how this interaction is a pattern that has been followed over centuries Indeed amongst the cases Sorge presents he concentrates on the example of Germany a supposedly highly homogeneous and closed society as evidence for the universality of shifting borders expanding horizons local adoption and adaptation of global practices and the hybridization of systems and standards as the normal course of social evolution Arndt Sorge s analysis of globalization combines rigorous theoretical reasoning with empirically grounded analysis and deliberately adopts a general social science approach drawing on research from Business and Management Studies Sociology Political Science and History

Digital Geographies—Theory, Space, and Communities Abdul Shaban, 2025-01-02 This machine generated volume with chapter introductions by the human expert showcases how digital technologies are having deep transformative impacts on geographies and temporalities of social political economic and personal lives They are altering perceptions and physicality of space and time They are giving birth to digital communities and societies where distance remains of little significance Virtual spaces and ICT have disrupted state sovereignties often liquidating their physical national boundaries The rise of the digital economy shows that new important raw materials for the future are information rather than coal oil and minerals Digitalisation is also leading to several contradictory processes of democratisation rising welfare of the citizens as well as surveillance peripheralisation and exclusion States are taking pride in digitalising their services to the citizens with massive consequences on the welfare of those facing digital divides As a departure to and in addition to the usual understanding of digitalisation society and space the present volume engages with some of the critical questions while reviewing existing literature What are the space relations of digital technologies What are the forms and consequences of changing physical space human relations to digital space human relations How is the sense of time and space changing with pervasive performatives of in real time and virtual realities or with perceptible or portable spaces In what ways does digitalisation relate to knowledge and power Why and how must we theorise the digitalisation led transformative processes of sociality materiality and their spatialities The book will be useful for teachers researchers and students engaged in this new area of digital geography especially in social science and its

subfields of sociology economics political sciences anthropology psychology development studies policy studies social work urban studies and planning For the full picture the volume can be read in combination with its companion volume on Digital Geographies Urbanisation Economy and Modelling

Segregation and Singularity Peter Stewart, 2021-11-15 As a political sociology of whites in the last years of apartheid in South Africa this book provides an analysis of the social origins and social context of political attitudes among a sample of middle class English speaking whites in selected suburbs in the city of Johannesburg Gauteng Province It reveals that such attitudes emanated in the context of acute and continuing political polarisation principally between black and white in the twilight of apartheid and before the first democratic elections The book adds another dimension to the interpretation of class dynamics in the study of apartheid South Africa In contrast to other studies that have concentrated on the working class and on very restricted political and economic elites which gives an incomplete picture of class dynamics this book considers the impact of the middle classes in shaping the history of apartheid South Africa

Biotechnology in the Public Sphere Martin W. Bauer, John Durant, George Gaskell, 1998 A comprehensive assessment of European public opinion and biotechnology It brings together comparative research on policy making media coverage and public perceptions This book is the major output from a three year research initiative undertaken by an international multidisciplinary team of social scientists Following an introductory conceptualisation of biotechnology in the public sphere Part Two brings together information on the policy activity media coverage and public perceptions of biotechnology in European countries Part Three is a detailed analysis of a major European survey of public perceptions Part Four brings together the three elements of the research and provides a synthetic overview of the development of public perceptions of biotechnology in Europe
