 the portion of Black Americans has improved in recent years the widespread enthusiasm for the Civil Rights movement has
 waned Why has progress slowed What makes racial problems in America so difficult to solve A principal cause according to
The Anatomy of Racial Attitudes is the way in which white Americans explain or account for the social conditions in which
 most black Americans find themselves A substantial proportion of whites believe that stereotypes that Black Americans are
 relatively less well off because blacks do not try hard enough to better themselves or because of the difference due to
 genetics or to God s plan Whites who hold such views have relatively little sympathy for programs designed to improve the
 social conditions In contrast whites who believe that Black Americans are kept back either by deliberate discrimination or by
 the accumulated social results of past discrimination are much more receptive to policies designed to help blacks Using
 qualitative and quantitative data this book explores the variety and extent of these explanations for social differences it also
 describes how each explanation or combination of explanations influences a person s views on policies designed to bring
 about greater racial equality This study promises to influence not only the course of future academic research on race
 relations but also the formulation of public policy to deal with racial problems It reveals that the resistance of many whites to
 policies favorable to racial equality are not isolated phenomenon but instead is part of a comprehensive view of how society
 works If strides toward racial equality are to be made in the foreseeable future the insights provided here must be
 considered seriously by policy makers and be incorporated into their strategies This title is part of UC Press s Voices Revived
