Social Interaction And Organisational Change Aston Perspectives On Innovation Networks:

Social Interaction And Organisational Change, Aston Perspectives On Innovation Networks Steve

Conway,Oswald Jones,Fred Steward,2001-04-01 This book provides a detailed multi disciplinary analysis of innovation networks in a variety of organisational settings All the contributors are employed at Aston Business School which is one of the UK s foremost institutions in terms of both teaching and research The book illustrates the way in which innovation networks are formed and sustained in a variety of organisational settings the public sector public private collaboration national policy level inter organisational credit links as well as the more traditional focus on manufacturing firms The strength of the network approach is that it encourages detailed analyses of the dyadic links which must be mobilised in the innovation process At the same time networks provide a framework for exploring the multiple sources and pluralistic patterns of communication typical of innovatory activity Therefore in contrast to much of the innovation network research undertaken in recent years the focus of this book is as much on notions of network as method as on network as phenomenon

Knowledge Networks and Craft

Traditions in the Ancient World Katharina Rebay-Salisbury, Ann Brysbaert, Lin Foxhall, 2014-08-07 This edited volume investigates knowledge networks based on materials and associated technologies in Prehistoric Europe and the Classical Mediterranean. It emphasises the significance of material objects to the construction, maintenance and collapse of networks of various forms which are central to explanations of cultural contact and change. Focusing on the materiality of objects and on the way in which materials are used adds a multidimensional quality to networks. The properties, functions and styles of different materials are intrinsically linked to the way in which knowledge flows and technologies are transmitted. Transmission of technologies from one craft to another is one of the main drivers of innovation whilst sharing knowledge is enabled and limited by the extent of associated social networks in place. Archaeological research has often been limited to studying objects made of one particular material in depth, be it lithic materials, ceramics, textiles, glass, metal, wood or others. The knowledge flow and transfer between crafts that deal with different materials have often been overlooked. This book takes a fresh approach to the reconstruction of knowledge networks by integrating two or more craft traditions in each of its chapters. The authors, well known experts and early career researchers, provide concise case studies that cover a wide range of materials. The scope of the book extends from networks of craft traditions to implications for society in a wider sense. Materials, objects and the technologies used to make and distribute them are interwoven with social meaning. People make objects but objects make people; the materiality of objects shapes our understanding of the world and our place within it. In this book, objects are treated as clues to social networks of different sorts that can be contrasted and compared both spatially and diachronically.

A Risk-Benefit Perspective on Early Customer Integration Christoph Kausch, 2007-08-02 Customer integration in the early innovation phase has been considered the method of choice in theory and practice. Growing experience with the concept has shown unexpected side effects that may even outweigh its recognized advantages. Therefore, management needs to be able to assess in advance whether the involvement of customers will add overall value to each particular innovation project. To support but not to replace the final managerial decision, a mathematical formula is developed. It can be applied to all kinds of process structures, takes into account the risks and benefits contingent on a company's situation as well as risk-reducing and benefit-increasing measures and translates them into numerical values. The resulting figure indicates the prospective value of customer integration in a specific project.
