Tierney, 1996 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company **The Social Role of Higher Education** Ken Kempner, William G Tierney, 2018-10-10 Originally published in 1996 The Social Role of Higher Education is an anthology of nine papers it presents cases studies showing how culture influences the social role of higher education in various nations It examines how environments get defined and how they shape universities and how knowledge and academic work interact in national contexts This book focuses on how both developed and developing countries systems of higher education are affected by their own culture and their place within the larger global context **Rethinking Universities** Sally Baker, Brian J. Brown, 2007-09-14 Most people who work and study in universities will be aware that they are changing Yet few have so far grasped the extent of this change or have attempted to put it in a coherent intellectual framework This volume provides new ways to understand how the university workforce in developed nations is being encouraged to change itself and how the social role of these institutions has shifted from places of higher learning toward being agents for social change and the promotion of human welfare Moreover the demands that are being placed on institutions and the kinds of graduates they are required to produce has changed too with the emphasis on a new brand of vocationalism and a reinvigorated focus on skills and employability This volume provides a theoretically informed philosophically sophisticated account of what universities in developed nations are being encouraged to do and the impact this has on their staff students and the societies of which they are a part **University and Society** Martin A. Trow, Thorsten Nybom, 1991 This collection of essays addresses the question of the role of research and higher education in society both today and in a historical perspective **Universities with a Social Purpose** Kerry Shephard, V. Santhakumar, 2024-01-05 This book is a narrative of conversations between two professors with different backgrounds academic disciplines life experiences and from different continents It shows how their discourse has brought them to a single destination defined by a mutual interest in the social purposes of universities and a hope in common that their academic efforts will somehow do good in the world The seventeen internationally agreed Sustainable Development Goals SDGs provide focus for aspirations and plans regarding sustainability but notably the SDGs targets and indicators rarely provide detailed accounts of who is expected to enact change This book addresses the role of higher education in this context and explores the social purposes of universities and their relation to the Sustainable Development Goals It presents an academic analysis of this complex situation based on insights from published literature on higher education and the personal but very different experiences of two professors with this shared interest **Higher Education in a Globalising World** J. Europe and beyond Not only has he dedicated his professional career to studying a large number of higher education topics through national and international research projects He was also in the fore front of the efforts to strengthen the structure and profile of higher education research for example through his involvement in the establishment of the Consortium of Higher Education Researchers CHER In addition he has contributed to many important scholarly works reflecting on the state of the art and the nature of the field The conventional wisdom is that working in a university or college makes you an expert on higher education Consequently while academics like to do research on every possible topic they are in general reluctant to examine their own social institution Within the European context Ulrich Teichler is one of the main exceptions to this rule Already in his student days he has recognised the unique characteristics of higher education institutions and systems and he understood that special efforts are needed to improve our knowledge on higher education
