Social Science In Law Cases And Materials University Casebook Series:

Social Science in Law John Monahan, Laurens Walker, 1990 **Social Science in Law** John Monahan, Laurens Walker, 2006-01-01 *Social Science in Law, Cases and Materials* John Monahan, Christopher Slobogin, 2025-09-12 This title offers an engaging and comprehensive overview of how American courts use research and testimony from the social sciences in reaching their decisions. It is organized around *Daubert v. Merrill Dow Pharmaceuticals Inc.*, the United States Supreme Court's landmark decision on scientific evidence, and the series of recent cases beginning with *Roper v. Simmons* in which the Court explicitly relied on social science evidence to transform the process of criminal sentencing. The eleventh edition offers a completely revised and up-to-date treatment of the increasingly critical role social science research plays in both federal and state judicial opinions. New with this edition are enhanced materials on the usefulness of statistical significance tests, the importance of reference groups, the construction of opinion surveys including Internet surveys, the proper interpretation of *Daubert* as applied to social framework evidence, including a discussion of the Supreme Court's recent decision in *Diaz v. United States*, the relevance of empirical information to constitutional analysis, research on the efficacy of the exclusionary rule, research on the deterrent effect of the death penalty, and the impact of death qualification, the science, ethics, and legality of risk assessment, especially at sentencing, the use of algorithms by the police, the criminal law doctrines governing the relevance of social science information, expert evidence on confessions, research on jury instructions and lay decision making, and the selection and qualifications of expert witnesses. *Social Science in Law* John Monahan, Laurens Walker, 1994

Morality Imposed Stephen E. Gottlieb, 2000-09 We like to think of judges and justices as making decisions based on the facts and the law. But to what extent do jurists decide cases in accordance with their own preexisting philosophy of law and what specific ideological assumptions account for their decisions? Stephen E. Gottlieb adopts a unique perspective on the decision making of Supreme Court justices, blending and re-characterizing traditional accounts of political philosophy in a way that plausibly explains many of the justices' voting patterns. A seminal study of the Rehnquist Court, *Morality Imposed* illustrates how, in contrast to previous courts which took their mandate to be a move toward a freer and/or happier society, the current court evidences little concern for this goal, focusing instead on thinly veiled moral judgments. Delineating a fault line between liberal and conservative justices on the Rehnquist Court, Gottlieb suggests that conservative justices have rejected the basic principles that informed post-New Deal individual rights jurisprudence and have substituted their own conceptions of moral character for these fundamental principles. *Morality Imposed* adds substantially to our understanding of the Supreme Court, its most recent cases, and the evolution of judicial philosophy in the U.S. *Cases and Materials on the International Legal System* Joseph M. Sweeney, Covey T. Oliver, Noyes E. Leech, 1988 *Extending Working Life for Older Workers* Alysia Blackham, 2016-11-03 The UK population is ageing rapidly. While age discrimination laws are seen as having broad potential to address the ageing challenge and achieve instrumental and intrinsic objectives in the context of

employment it is unclear what impact they are having in practice This monograph addresses two overarching research questions in the employment field How are UK age discrimination laws operating in practice How if at all could UK age discrimination laws be improved A reflexive law theoretical standpoint is employed to investigate these issues applying a mixed methods research design that engages qualitative quantitative doctrinal and comparative elements This book demonstrates the substantial limitations of the Equality Act 2010 UK for achieving instrumental and intrinsic objectives Drawing on qualitative expert interviews statistical analysis and organisational case studies it illustrates the failure of age discrimination laws to achieve attitudinal change in the UK and reveals the limited prevalence of proactive measures to support older workers Integrating doctrinal analysis comparative analysis of Finnish law and the Delphi method it proposes targeted legal and policy changes to address demographic change and offers an agenda for reform that may increase the impact of age discrimination laws and enable them to respond effectively to demographic ageing Runner up of the 2017 SLS Peter Birks Prize for Outstanding Legal Scholarship The author was also awarded the 2020 ISA RCSL Adam Podg recki Junior Prize

Silver Fox of the Rockies Daniel Tyler, Delph Carpenter, 2003 Delphus E Carpenter 1877-1951 was Colorado's commissioner of interstate streams during a time when water rights were a legal battleground for western states A complex unassuming man as rare and cunning in politics and law as the elusive silver fox of the Rocky Mountain West Carpenter boldly relied on negotiation instead of endless litigation to forge agreements among states first before federal intervention In *Silver Fox of the Rockies* Daniel Tyler tells Carpenter's story and that of the great interstate water compacts he helped create Those compacts produced in the early

twentieth century have guided not only agricultural use but urban growth and development throughout much of the American West to this day In Carpenter s time most western states relied on the doctrine of prior appropriation first in time first in right which granted exclusive use of resources to those who claimed them first regardless of common needs Carpenter feared that population growth and rapid agricultural development in states sharing the same river basins would rob Colorado of its right to a fair share of water To avoid that eventuality Carpenter invoked the compact clause of the U S Constitution a clause previously used to settle boundary disputes and applied it to interstate water rights The result was a mechanism by which complex issues involving interstate water rights could be settled through negotiation without litigating them before the U S Supreme Court Carpenter believed in the preservation of states rights in order to preserve the constitutionally mandated balance between state and federal authority Today water remains critically important to the American West and the great interstate water compacts Carpenter helped engineer constitute his most enduring legacy Of particular significance is the Colorado River Compact of 1922 without which Hoover Dam could never have been built
