Social Stress In The United States Links To Regional Patterns In Crime And Illness:

Social Stress in The United States Arnold Linsky, Murray Arnold Straus, 1986-10-30 In this pioneering study sociologists develop a State Stress Index that provides a quantitative measure of stress for each state and region in the United States

Social Stress in the United States Arnold Stanley Linsky, 1986 *Stress, Culture, and Aggression* Arnold Stanley Linsky, Ronet Bachman, Murray Arnold Straus, 1995-01-01 Is life in the United States becoming more stressful Are levels of stress related to residence in a particular state or region Is stress in a society associated with aggression In this important book the authors report on a major research project that establishes a link between stress and aggression in the United States They first update the standard State Stress Index which evaluates statistics on business failure unemployment divorce abortion illegitimate birth disaster assistance welfare and school dropout rate for the fifty states Using these current indexes they are able to compare differences among states in the stressfulness of life They then present new data on violence both violence directed at others homicide intrafamily assault and rape and self destructive violence suicide and substance abuse The authors make a compelling case that stress leads to widespread and often lethal aggression In addition they consider cultural norms of various groups within states relating to drinking the use of violence for socially legitimate purposes the status of women and readership of pornography in an effort to explain geographic differences in the manifestations of violence Linsky Bachman and Straus conclude by outlining the policy implications of their findings *Social, Ecological and Environmental Theories of Crime* Jeffery T. Walker, 2017-07-05 One of the oldest and most extensive forms of criminology falls within what is referred to among other names as social ecology Beginning with the work of Guerry and Quetelet this theory became the dominate paradigm in explaining crime with the work of the Chicago School in the early 1900s social disorganization theory and neighborhood research attempting to deal with crime in deteriorating cities Social ecology is also the basis for the research being conducted in environmental criminology This volume offers a selection of the most influential works in social ecology and environmental criminology It begins with research from human ecology and the Chicago School extending through some of the research in social disorganization theory It encompasses some of the major journal articles from the 1980s and 1990s in neighborhoods and crime and then addresses some of the quintessential works in environmental criminology It ends with groundbreaking work in this area that may indicate the future direction of the field This valuable collection includes an excellent introduction by Jeff Walker *Classics in Environmental Criminology* Martin A. Andresen, Paul J. Brantingham, J. Bryan Kinney, 2010-05-25 A careful analysis of environmental factors is key to understanding the causes of crime to solving crimes and eventually helping to predict and prevent them Classics in Environmental Criminology is a comprehensive collection of seminal pieces from legendary contributors who focus on the role that the immediate environment plays in the occurrence of a crime Defines the field Divided into three parts the book begins by highlighting the development of environmental criminology as a discipline through its origins in spatial criminology It

examines social disorganization theory which explains criminal activity with reference to the characteristics of the community that delinquents live in. It then discusses the ecology of crime with reference to macroenvironments and microenvironments. The next section introduces concepts such as routine activity theory, the geometric theory of crime, the rational choice theory of offending, and crime pattern theory. Offers perspectives on prevention. The last part focuses on the concept of crime prevention, examines the idea of altering the environment in order to prevent crime, and discusses situational crime factors and efforts to reduce the opportunities for crimes to be committed. It considers the impact of routine activities on crime prevention initiatives and advocates a flexible approach to crime prevention based on the dynamic nature of our environment. The book concludes with a chapter outlining how environmental criminology has evolved in recent years and provides a future outlook on where it may be headed. Invaluable as a textbook and as a professional reference, this volume is a comprehensive survey of a critical field in contemporary criminological theory. Offering insight assembled by top academic figures within the criminology community, this work is destined to provoke further inquiry and research.

Family Policies and Family Well-Being Shirley L. Zimmerman, Shirley Zimmerman, 1992-07-20 Exploring the connections between family policies, individual and family well-being, and political culture, this volume examines several research projects and concludes that their results challenge the view that governmental social programmes in the United States have been detrimental to family life. The results also clarify the relationship between states' political cultures and the kinds of family policies enacted. Additionally, Zimmerman provides guidelines to aid the development of a policy agenda designed to enhance the well-being of individuals and families regardless of where they live.

Encyclopedia of Policy Studies, Second Edition, Stuart Nagel, 1994-01-27 This entirely updated and enlarged Second Edition of a landmark reference text continues to provide comprehensive coverage of every important aspect of policy studies, discussing concepts, methods, utilization, formation, and implementation both internationally and across each level of government.

Persuasive Communication and Drug Abuse Prevention Lewis Donohew, Howard E. Sypher, William J. Bukoski, 2012-12-06 The history of drug abuse prevention campaigns suggests limitations in producing measurable changes in behavior. In the past, there was concern over the possibility of such publicity actually encouraging interest in drug use rather than discouraging such behavior. Although little or no scientifically sound empirical evidence has been found to support such a view, several social science textbooks still refer to this as something of which to be wary. Reviews of early research appear to indicate inadequate methods and a lack of rigor in theory testing. In recent years, however, research in communication and its uses in drug abuse prevention has become considerably more sophisticated, and communication is being used far more effectively. In this book, the editors bring together some of the most successful drug abuse prevention researchers in the country along with other experts in this field or in persuasive communication to address use and effects of both mass media and interpersonal strategies. This collection illustrates just how far the study of public influence through mass media has come, especially regarding such a vital, relevant

issue as drug abuse prevention **Biobehavioral Resilience to Stress** Brian J Lukey, Victoria Tepe, 2008-03-19 Military service involves exposure to multiple sources of chronic acute and potentially traumatic stress especially during deployment and combat Notoriously variable the effects of stress can be subtle to severe immediate or delayed impairing individual and group readiness operational performance and ultimately survival A comprehensive co **The Science of Crime Measurement** Martin A. Andresen, 2014-01-03 Crime statistics are ubiquitous in modern society but how accurate are they This book investigates the science of crime measurement focussing on four main questions how do we count crime How do we calculate crime rates Are there other measurements of crime What are the issues surrounding crime statistics All too often we take the measurement of crime at face value when there is in fact a science behind it This book specifically deals with issues related to spatially referenced crime data that are used to analyse crime patterns across the urban environment The first section of the book considers alternative crime rate calculations The second section of the book contains a thorough discussion of a measure of crime specialisation Finally the third section of the book addresses a number of aggregation issues that are present with such data crime type aggregations temporal aggregations of crime data the stability of crime patterns over time and the importance of spatial scale This book builds on a growing body of literature on the science of crime measurement and offers a comprehensive account of this growing subfield of criminology The book speaks to wider debates in the fields of crime analysis environmental criminology and crime prevention and will be perfect reading for advanced level undergraduate and graduate students looking to find out more about the measurement of crime *Region and Regionalism in the United States* Michael C.
