Social Contexts of Messages E. A. Carswell, Ragnar Rommetveit, 1971 *National Library of Medicine Current Catalog*
National Library of Medicine (U.S.), 1972 First multi year cumulation covers six years 1965 70 *Corpus Linguistics and Textual History* Percy van Keulen, Willem Th. van Peursen, 2018-07-17 Over the years the use of computers for research has become increasingly important in Biblical Studies However a combination of computational linguistics with diachronic text critical and text historical approaches has hardly ever taken place Quite often there is mutual misunderstanding between computational linguistics and more traditional approaches in the field of linguistics and textual analysis For example in computer assisted research of modern text corpora it is common to treat the text as an unequivocal and unidimensional sequence of characters In Biblical Studies however either text is considered an abstraction the result of a scholarly reconstruction based on the extant textual witnesses Here a fundamental difference in approach reveals itself The present volume tries to overcome the misunderstanding between the various disciplines and to establish how a fruitful interaction of information technology linguistics and textual criticism can contribute to the analysis of ancient texts It addresses questions concerning the confrontation between synchronic and diachronic approaches the role of linguistic analysis in the interpretation of texts and the interaction of linguistic theory and the analysis of linguistic data The first section of this volume contains the papers presented at the CALAP seminar 2003 In the second section different aspects of the interdisciplinary analysis are applied to a selected passage from the Peshitta of Kings *The Quarterly Journal of Experimental Psychology*, 1971 **Language Contacts at the Crossroads of Disciplines** Lea Meriläinen, Heli Paulasto, Helka Riionheimo, 2015-01-12 This volume offers a cross disciplinary insight into language contact research bringing together fresh empirical and theoretical studies from various fields concerning different dimensions of language contact and variation second language acquisition and translation In the present day world of globalization population mobility and information technology the themes of multilingualism and contact induced language change are as topical as ever and research on language contacts and cross linguistic influence has expanded rapidly during the last few decades Along with the increasing specialization of related disciplines their research perspectives methods and terminology have become dispersed although language contact phenomena themselves can rarely be confined within the scope of a single discipline This collection of articles creates dialogue between researchers from different scientific backgrounds thus viewing language contact phenomena from a broader perspective When language contact is re defined to include the mental or cognitive level of contact between different languages and varieties in the minds of language learners or translators salient links are created between the different disciplines dealing with this subject matter *The Social and Psychological Contexts of Language* R. N. St. Clair, H. Giles, 2013-05-13 Published in the year 1982 The Social and Psychological Contexts of Language is a valuable contribution to the field of Social Psychology **Handbook of Psychology: Personality and social**
