Social Foundations Of Postindustrial Economies:

Social Foundations of Postindustrial Economies Gøsta Esping-Andersen, 1999 The Golden Age of postwar capitalism has been eclipsed and with it seemingly also the possibility of harmonizing equality and welfare with efficiency and jobs Most analyses believe that the emerging postindustrial society is overdetermined by massive convergent forces such as tertiarization new technologies or globalization all conspiring to make welfare states unsustainable in the future Social Foundations of Postindustrial Economies takes a second more sociological and more institutional look at the driving forces of economic transformation What as a result stands out is postindustrial diversity not convergence Macroscopic global trends are undoubtedly powerful yet their influence is easily rivalled by domestic institutional traditions by the kind of welfare regime that some generations ago was put in place It is however especially the family economy that hold the key as to what kind of postindustrial model will emerge and to how evolving tradeoffs will be managed Twentieth century economic analysis depended on a set of sociological assumptions that now are invalid Hence to better grasp what drives today s economy we must begin with its social foundations

How Welfare States Care Monique Kremer, 2007 Though women s employment patterns in Europe have been changing drastically over several decades the repercussions of this social revolution are just beginning to garner serious attention Many scholars have presumed that diversity and change in women s employment is based on the structures of welfare states and women s responses to economic incentives and disincentives to join the workforce How Welfare States Care provides in depth analysis of women s employment and childcare patterns taxation social security and maternity leave provisions in order to show this logic does not hold Combining

economic sociological and psychological insights Kremer demonstrates that care is embedded in welfare states and that European women are motivated by culturally and morally shaped ideals of care that are embedded in welfare states and less by economic reality *Themes in Modern European History Since 1945* Rosemary Wakeman, 2003 Twelve chapters consider the key political cultural and economic changes of post 1945 Europe **Social Stratification** David B. Grusky, 2018-05-04 The book covers the research on economic inequality including the social construction of racial categories the uneven and stalled gender revolution and the role of new educational forms and institutions in generating both equality and inequality

Postindustrial Germany Claire Annesley, 2004 This book is about the state of the German model of capitalism today It is the first book to offer an integrated analysis of the political economy of unified Germany rather than dealing with east and west as separate entities It challenges the standard view that Germany is lagging behind other capitalist states in the transition to a postindustrial economy and looks in detail at the expansion of the service sector the transformation of the industrial sector and the development of the knowledge economy in unified Germany The book finds that Germany is indeed becoming postindustrial but that it is not developing in any single direction Rather the research outlined in this book suggests that some regions perform well in services or the production of knowledge while others have successfully transformed industrial production This variation it is argued is the consequence of unification as well as older economic traditions which pre date the industrial revolution *The Oxford Handbook of the Welfare State* Francis G. Castles, Stephan Leibfried, Jane Lewis, Herbert Obinger, Christopher Pierson, 2012-09-06 The Oxford Handbook of the Welfare State is the authoritative and definitive guide to the contemporary welfare state In a volume consisting of nearly fifty newly written chapters a broad range of the world's leading scholars offer a comprehensive account of everything one needs to know about the modern welfare state The book is divided into eight sections It opens with three chapters that evaluate the philosophical case for and against the welfare state Surveys of the welfare state's history and of the approaches taken to its study are followed by four extended sections running to some thirty five chapters in all which offer a comprehensive and in depth survey of our current state of knowledge across the whole range of issues that the welfare state embraces The first of these sections looks at inputs and actors including the roles of parties unions and employers the impact of gender and religion patterns of migration and a changing public opinion the role of international organisations and the impact of globalisation The next two sections cover policy inputs in areas such as pensions health care disability care of the elderly unemployment and labour market activation and their outcomes in terms of inequality and poverty macroeconomic performance and retrenchment The seventh section consists of seven chapters which survey welfare state experience around the globe and not just within the OECD Two final chapters consider questions about the global future of the welfare state The individual chapters of the Handbook are written in an informed but accessible way by leading researchers in their respective fields giving the reader an excellent and truly up to date knowledge of the area under discussion Taken together they constitute a

comprehensive compendium of all that is best in contemporary welfare state research and a unique guide to what is happening now in this most crucial and contested area of social and political development **Replacing the Dead** Mie Nakachi,2021 In 1955 the Soviet Union became the first country in the world to re legalize abortion on the principle of women s rights to abortion How could this happen in Stalinist society which prohibited feminist movements Replacing the Dead finds an answer in previously secret archives that document the difficult decade after World War II which killed 27 million Soviet citizens and the government s policy to increase fertility by promoting out of wedlock births The result was an abortion battle between women government and Soviet legal and medical professionals that has continued for decades
