Kees Boterbloem, 2018-06-26 This clear and focused text provides an introduction to imperial Russian and Soviet history from the crowning of Mikhail Romanov in 1613 to Vladimir Putin's new term Through a consistent chronological narrative Kees Boterbloem considers the political military economic social religious and cultural developments and crucial turning points that led Russia from an exotic backwater to superpower stature in the twentieth century The author assesses the tremendous price paid by those who made Russia and the Soviet Union into such a hegemonic power both locally and globally He considers the complex and varied interactions between Russians and non Russians and investigates the reasons for the remarkable longevity of this last of the colonial powers whose dependencies were not granted independence until 1991 He explores the ongoing legacies of this fraught decolonization process on the Russian Federation itself and on the other states that succeeded the Soviet Union The only text designed and written specifically for a one semester course on this four hundred year period it will appeal to all readers interested in learning more about the history of the people who have inhabited one sixth of the earth's landmass for centuries [Imperial Russia, 1801-1905](#) Tim Chapman, 2002-09-09 Imperial Russia 1801 1905 traces the development of the Russian Empire from the murder of mad Tsar Paul to the reforms of the 1890s that were an attempt to modernise the autocratic state This is essential reading for all students of the topic and provides a clear and concise introduction to the contentious historical debates of nineteenth century Russia

Beyond the Revolution in Russia: Narratives - Concepts - Spaces Jaromír Mrňka, 2021-09-01 The book sheds light on the preconditions and consequences extending far beyond the event that opened up totally new horizons in 1917 To mark the centennial of the Russian Revolution an international team of both junior and experienced scholars from Austria Belarus Brazil the Czech Republic France Israel Poland Russia and Slovakia brought together contributions from the surprisingly broad interdisciplinary field of comparative economic conceptual and political history human geography and urbanism literature media studies and political science The book explains the Russian revolution in a complex ambiguity between the event and its immediate consequences medium term social and economic transformations and the long term reconfiguration of the spaces of politics and culture

France 1715-1804 Gwynne Lewis, 2018-12-14 Gwynne Lewis history opens with a full analysis of all the components of traditional France including political and religious structures the seigneurial system the bourgeoisie and the poor Part two examines the meaning and challenge of the Enlightenment with particular reference to women and the mass of the poor Part three concentrates upon the relationship between the shift to laissez faire economics popular revolts and government repression providing the essential background to the Revolutionary decade of the 1790s The Revolution witnessed the rise of a politicised Popular Movement that achieved briefly a measure of popular democracy War

and counter revolution blocked the move towards real democracy strengthened the authority of the centralised state and enhanced the credibility of bourgeois political and economic power One of the main contentions of this work is that the failure of both monarchical and Revolutionary regimes to deal with the massive social problem of poverty played a far larger part in explaining the collapse of the Bourbons in 1789 and the failure of democracy during the 1790s than most historians have allowed Likewise the importance of religion in directing the momentous events of this period has also been underestimated

Empowering Interactions Wim Blockmans, Daniel Schläppi, 2017-03-02 The emergence of the state in Europe is a topic that has engaged historians since the establishment of the discipline of history Yet the primary focus of has nearly always been to take a top down approach whereby the formation and consolidation of public institutions is viewed as the outcome of activities by princes and other social elites Yet as the essays in this collection show such an approach does not provide a complete picture By investigating the importance of local and individual initiatives that contributed to state building from the late middle ages through to the nineteenth century this volume shows how popular pressure could influence those in power to develop new institutional structures By not privileging the role of warfare and of elite coercion for state building it is possible to question the traditional top down model and explore the degree to which central agencies might have been more important for state representation than for state practice The studies included in this collection treat many parts of Europe and deal with different phases in the period between the late middle ages and the nineteenth century Beginning with a critical review of state historiography the introduction then sets out the concept of empowering interactions which is then explored in the subsequent case studies and a number of historiographical methodological and theoretical essays Taken as a whole this collection provides a fascinating platform to reconsider the relationships between top down and bottom up processes in the history of the European state
