

SOCIAL STRUCTURES

social structures in sociology are the relationships or interactions between groups of different people in a society.

IN SOCIOLOGICAL ANALYSIS

The analysis of social structures often occurs on three levels:

1. **Macro analysis** – looks at broad categories and systems like large populations and groups like entire countries or economic systems.
2. **Meso analysis** – studies communities or certain groups in a society.
3. **Micro analysis** – observes patterns and collects data from smaller groups like families, or individuals (DeCarlo, 2018).

EXAMPLES

- 1 Nations
- 2 Economies
- 3 Racial groups
- 4 Religions
- 5 Legal systems
- 6 Political parties

Goffman and Social Organization Greg Smith, 2002-11-01 Erving Goffman is considered by many to have been one of the most important sociologists of the post war era His close observation of everyday life and his concern with the ways in which people play roles and manage the impressions they present to each other led to his pioneering creation of a new dramaturgical perspective for sociology His later analysis explored the field of deviance and many of his works in this area are now considered as sociological classics including *Asylums* *The Presentation of the Self in Everyday Life* and *Stigma* This collection brings together many of today's leading sociologists to pursue and build upon the diverse aspects of Goffman's legacy The contributors present chapters on key topics of Goffman's work Issues covered include mental illness and institutionalism the incorporation of literary intertexts in Goffman's writings Goffman's relationship to ethnomethodology the singularity of Goffman's ethnography Ranging from his critique of institutionalization to his understanding of the minute details of face to face interaction this collection reveals the richness of Goffman's own work as well as his contribution to sociology today and will be essential reading for students and academics alike

Anthropology and Political Science Myron J. Aronoff, Jan Kubik, 2013 What can anthropology and political science learn from each other The authors argue that collaboration particularly in the area of concepts and methodologies is tremendously beneficial for both disciplines though they also deal with some troubling aspects of the relationship Focusing on the influence of anthropology on political science the book examines the basic assumptions the practitioners of each discipline make about the nature of social and political reality compares some of the key concepts each field employs and provides an extensive review of the basic methods of research that bridge both disciplines ethnography and case study Through ethnography participant observation reliance on extended case studies and the use of anthropological concepts and sensibilities a greater understanding of some of the most challenging issues of the day can be gained For example political anthropology challenges the illusion of the autonomy of the political assumed by political science to characterize so called modern societies Several chapters include a cross disciplinary analysis of key concepts and issues political culture political ritual the politics of collective identity democratization in divided societies conflict resolution civil society and the politics of

post Communist transformations **Russian Studies and Comparative Politics** Frederic J. Fleron Jr., 2016-12-27 This book brings together several of the author's empirical studies that demonstrate the strength and utility of sociologist Robert Merton's classic middle range theory for understanding aspects of both Soviet and post Soviet Russian politics. Some of those studies demonstrate that testing middle range social science theory could take place even in the Soviet era when there were significant limitations of access to empirical data and meaningful field research in the USSR was all but impossible. In the introductory chapter the author explains the need for and advantages of studying Russian and Soviet politics from the perspective of middle range social science theory. Then follow three chapters analyzing methodological issues in Soviet post Soviet studies. The author presents his six empirical studies employing middle range social science theories to explore in Russia USSR dimensions of organizations ideology and decisionmaking technology transfer and cultural diffusion political culture public opinion and democratization and congruence of authority patterns in state society relations. The book concludes with a chapter arguing the advantages of thinking theoretically about Russian and Soviet politics with the establishment of a new epistemic community organized around studies employing middle range theory. This book presents examples of solutions to long standing debates between area studies and the academic disciplines and between idiographic and nomothetic approaches to knowledge in the social sciences. In contrast to the tradition of Carnivals and Cockfights in Russian Soviet area studies since the mid 20th Century the book offers a new way of approaching the study of Russian politics for the 21st Century.

Studies in Tudor and Stuart Politics and Government: Volume 3, Papers and Reviews 1973-1981 G. R. Elton, Geoffrey Rudolph Elton, 2003-02-13 This volume continues the publication of Professor Elton's collected papers on topics in the history of Tudor and Stuart England. All appeared between 1973 and 1981. As before they are reprinted exactly as originally published with corrections and additions in footnotes. They include the author's four presidential addresses to the Royal Historical Society and bring together his preliminary findings in the history of Parliament and its records. Several of them which appeared in various collections and *Festschriften* have been difficult to find and some are taken from locations in Germany and the United States unfamiliar to English readers. The eight lengthy reviews here republished examine some of the major questions in the history of the age and throw light on the principles of investigation which underlie the author's own research.

This book is an analysis and exploration of the relationship between peasants and policies within the process of reform in China. After examining the long term rural policies either before or after the reform, it was found that all these policies have been expected to promote peasants' interests and claimed to take enhancing peasants' happiness as their goal. Nonetheless, the history and current reality of rural development have demonstrated that the same policy starting point had led to very different policy designs. Even today, quite a few institutional arrangements with good intentions have ended up with opposite results and have even become bad policies that do harm to people. This book argues that the reason for such serious deviation between political intentions and institutional arrangements as well as between policy goals and its results is as a political force, the peasantry itself has not effectively engaged with the political process of the country. **The State and**
