threatening at worse Precisely because it is so difficult to conceal our faces the disfigured face compromises appearance status and perhaps our very way of being in the world In *Saving Face* sociologist Heather Laine Talley examines the cultural meaning and social significance of interventions aimed at repairing faces defined as disfigured Using ethnography participant observation content analysis interviews and autoethnography Talley explores four sites in which a range of faces are repaired face transplantation facial feminization surgery the reality show *Extreme Makeover* and the international charitable organization Operation Smile Throughout she considers how efforts focused on repair sometimes intensify the stigma associated with disfigurement Drawing upon experiences volunteering at a camp for children with severe burns Talley also considers alternative interventions and everyday practices that both challenge stigma and help those seen as disfigured negotiate outsider status Talley delves into the promise and limits of facial surgery continually examining how we might understand appearance as a facet of privilege and a dimension of inequality Ultimately she argues that facial work is not simply a conglomeration of reconstructive techniques aimed at the human face but rather that appearance interventions are increasingly treated as lifesaving work Especially at a time when aesthetic technologies carrying greater risk are emerging and when discrimination based on appearance is rampant this important book challenges us to think critically about how we see the human face
