The Economics of Planning R. Kerry Turner, Clive Collis, 1977

Democratic Economic Planning Robin Hahnel, 2021-05-31 Democratic Economic Planning presents a concrete proposal for how to organize carry out and integrate comprehensive annual economic planning investment planning and long run development planning so as to maximize popular participation distribute the burdens and benefits of economic activity fairly achieve environmental sustainability and use scarce productive resources efficiently The participatory planning procedures proposed provide workers in self managed councils and consumers in neighbourhood councils with autonomy over their own activities while ensuring that they use scarce productive resources in socially responsible ways without subjecting them to competitive market forces Certain mathematical and economic skills are required to fully understand and evaluate the planning procedures discussed and evaluated in technical sections in a number of chapters These sections are necessary to advance the theory of democratic planning and should be of primary interest to readers who have those skills However the book is

written so that the main argument can be followed without fully digesting the more technical sections Democratic Economic Planning is written for dreamers who are disenchanted with the economics of competition and greed want to know how a system of equitable cooperation can be organized and also for sceptics who demand hard proof that an economy without markets and private enterprise is possible **Urban Planning During Socialism** Jasna Mariotti, Kadri Leetmaa, 2023-10-30

Planning Theory Robert Burchell, 2017-09-04 Theory and practice in city planning have never been known for their compatibility The planner dealing with stresses such as the personalities at work in a board meeting and coping with the realities of fund raising political realities and the like can find little guidance in the theory of the trade The issues of poverty groups whether rural or urban the provision of services and the packaging of them are seemingly insuperable The sheer frustration in the inability to deliver which so many planners feel can result in considerable impatience and a questioning of the relevance of theory The editors argue that this state of affairs though understandable is unacceptable While short range meliorism without sense of perspective may be good for the practitioner's individual psyche the cost may be borne by the long run best interests of the groups to be served The risks of a lack of perspective and the experiences generated by this phenomenon are too serious in their implications to permit the process to continue In this new age of anxiety it is essential for both planners and theorists to understand their roles as well as provide guidance in shaping them Burchell and Sternlieb have thus gathered here a variety of individuals all of whom in their separate and distinct fashions are seasoned both in

practice and in theory The book is divided into five sections Physical Planning in Change Social Planning in Change Public Policy Planning in Change Economic Planning in Change and a final section detailing the roles of planners and who they are These shared puzzlements and insights will prove useful to all practitioners and theorists in the planning field *Spatial Governance and Planning in Latin America* Juan E. Cabrera, Francesca Blanc, Giancarlo Cotella, 2025-10-31 This book is the first to provide an in depth discussion of spatial governance and planning systems SGPSSs in Latin America with analysis and comparison across 10 different countries Argentina Bolivia Brazil Chile Colombia Cuba Ecuador Mexico Peru and Uruguay The primary function of SGPSSs is to empower the public sector to exert control over spatial development Originally understood mainly through a legal paradigm it is now acknowledged that a range of informal institutions also play a role responding to societal and community needs that the state or market is unable to address This collection teases out these contrasting influences highlighting the role of indigenous culture in certain contexts and the increase of participatory processes in others The book features not only individual country case studies but also chapters discussing the broader themes as well as how the Latin American context compares to the European one A timely contribution to this evolving topic the book will appeal to students and scholars in the fields of planning urban and regional studies public policy and human geography Problems of planning Rudolf Biani, 2018-11-05 No detailed description available for Problems of planning

Economic Planning and Industrial Policy in the Globalizing Economy Murat Yülek, 2014-09-04 This book discusses national development planning in the context of a globalized world economy National economic development planning the process of defining strategic economic objectives for a country and designing policies and institutional frameworks to attain them was popular in many countries in the 1960s and 1970s Over time it lost its appeal More recently with globalization accelerating and economic competition increasing it is making a comeback in different countries under different forms National planning in this new era is different than the earlier quantitative planning approaches It employs different tools such as strategic visions and action plans revived forms of physical infrastructure planning industrial policy and cluster policy Built on the research of international scholars with firsthand knowledge of the countries in question this volume presents and evaluates current national planning strategies and policy worldwide It will be of interest to both academicians who study and teach globalization and development as well as policy makers who may use it as a reference as they contemplate their own strategies **Planning for Growth** Fulong Wu, 2015-01-09 Planning for Growth Urban and Regional Planning in China provides an overview of the changes in China's planning system policy and practices using concrete examples and informative details in language that is accessible enough for the undergraduate but thoroughly grounded in a wealth of research and academic experience to support academics It is the first accessible text on changing urban and regional planning in China under the process of transition from a centrally planned socialist economy to an emerging market in the world Fulong Wu a leading authority on Chinese cities and urban and regional planning sets up the historical

framework of planning in China including its foundation based on the proactive approach to economic growth the new forms of planning such as the strategic spatial plan and urban cluster plans that have emerged and stimulated rapid urban expansion and transformed compact Chinese cities into dispersed metropolises And goes on to explain the new planning practices that began to pay attention to eco cities new towns and new development areas Planning for Growth Urban and Regional Planning in China demonstrates that planning is not necessarily an enemy of growth and plays an important role in Chinese urbanization and economic growth On the other hand it also shows planning s limitations in achieving a more sustainable and just urban future

Transforming Urban Green Space Governance in China Under Ecological Civilization: An Institutional Analysis Jieliang Liu, 2024-02-08 This book addresses the transdisciplinary subject of urban green space governance in Chinese cities through political sciences organization theory sociology and new institutional economics lenses with urban planning and ecology perspectives as research foundation and the science of climate change on health and wellbeing research background It captivates readers by bringing answers to 1 Why are urban green spaces such a highly contested subject in climate mitigation and adaptation particularly in contexts like Chinese cities 2 Why is it important to govern urban green spaces as common pool resources 3 How to design policies institutions that can maximize the end objectives such as good health wellbeing and climate resilience 4 What can ordinary citizens gain from caring more about greening their cities and contributing to the process Besides the methods used in this research case based study qualitative in depth interviews and qualitative content analysis using the mainstream qualitative data analysis software MaxQDA are valuable learning sources especially for junior graduate students The book features three in depth case studies with rich interview and illustration materials and a range of graphics of higher analytical quality Readers both from research professionals to non academics with a general cultural interest in geography would find this work instructive and informative

Development and Globalization David F. Ruccio, 2012-12-06 Since the mid 1980s David F Ruccio has been developing a new framework of Marxian class analysis and applying it to various issues in socialist planning Third World development and capitalist globalization The aim of this collection is to show through a series of concrete examples how Marxian class analysis can be used to challenge existing modes of thought and to produce new insights about the problems of capitalist development and the possibilities of imagining and creating noncapitalist economies The book consists of fifteen essays plus an introductory chapter situating the author s work in a larger intellectual and political context The topics covered range from planning theory to the role of the state in the Nicaraguan Revolution from radical theories of underdevelopment to the Third World debt crisis and from a critical engagement with regulation theory to contemporary discussions of globalization and imperialism

Communist Planning versus Rationality János Mátyás Kovács, 2022-04-14 This volume examines concepts of central planning a cornerstone of political economy in Soviet type societies It revolves around the theory of optimal planning which promised a profound modernization of Stalinist style verbal planning Encouraged by cybernetic

dreams in the 1950s and supporting the strategic goals of communist leaders in the Cold War optimal planners offered the ruling elites a panacea for the recurrent crises of the planned economy Simultaneously their planning projects conveyed the pride of rational management and scientific superiority over the West The authors trace the rise and fall of the research program in the communist era in eight countries of Eastern Europe including the Soviet Union and China describing why the mission of optimization was doomed to fail and why the failure was nevertheless very slow The theorists of optimal planning contributed to the rehabilitation of mathematical culture in economic research in the communist countries and thus to a neoclassical turn in economics all over the ex communist world However because they have not rejected optimal planning as computopia there is a large space left behind for future generations to experiment with Big Optimal Plans anew based at this time on artificial intelligence and machine learning

Planning in Cold War Europe Michel Christian,Sandrine Kott,Ondrej Matejka,2018-10-08 The idea of planning economy and engineering social life has often been linked with Communist regimes will of control However the persuasion that social and economic processes could and should be regulated was by no means limited to them Intense debates on these issues developed already during the First World War in Europe and became globalized during the World Economic crisis During the Cold War such discussions fuelled competition between two models of economic and social organisation but they also revealed the convergences and complementarities between them This ambiguity so often overlooked in histories of the Cold War represents the central issue of the book organized around three axes First it highlights how know how on planning circulated globally and were exchanged by looking at international platforms and organizations The volume then closely examines specificities of planning ideas and projects in the Communist and Capitalist World Finally it explores East West channels generated by exchanges around issues of planning which functioned irrespective of the Iron Curtain and were exported in developing countries The volume thus contributes to two fields undergoing a process of profound reassessment the history of modernisation and of the Cold War

Planning in the 20th Century and Beyond Santosh Mehrotra,Sylvie Guichard,2020-10-29 The Planning Commission played a crucial role in the type of development that India followed after independence However even though most economic analyses of India mention the five year plans the Planning Commission as an institution remains little studied This is why this book proposes to look backward examining the history of the idea of planning and the history and experience of planning in India It also looks forward trying to evaluate beyond ideologies which role the practice of planning has and should have in contemporary India It then proposes that the NITI Aayog the think tank founded on 1st January 2015 after the demise of the Planning Commission could learn from this experience This book addresses three leading questions why plan economic development How to plan And what exactly can should be planned These questions are interrelated and the contributors of this volume each with their own focus propose elements of replies
