The Theory of Communicative Action Jürgen Habermas, 2015-10-07 Here for the first time in English is volume one of Jürgen Habermas's long awaited magnum opus *The Theory of Communicative Action*. This pathbreaking work is guided by three interrelated concerns: 1 to develop a concept of communicative rationality that is no longer tied to the subjective and individualistic premises of modern social and political theory; 2 to construct a two level concept of society that integrates the lifeworld and system paradigms; and 3 to sketch out a critical theory of modernity that explains its sociopathologies in a new way. Habermas approaches these tasks through a combination of conceptual analyses, systematic reflections, and critical reconstructions of such predecessors as Marx and Weber, Durkheim and Mead, Horkheimer and Adorno, Schutz and Parsons. *Reason and the Rationalization of Society* develops a sociological theory of action that stresses not its means/ends or teleological aspect but the need to coordinate action socially via communication. In the introductory chapter Habermas sets out a powerful series of arguments on such foundational issues as cultural and historical relativism, the methodology of *Verstehen*, the inseparability of interpretation from critique. In addition to clarifying the normative foundations of critical social inquiry, this sets the stage for a systematic appropriation of Weber's theory of rationalization and its Marxist reception by Lukács, Horkheimer and Adorno. This is an important book for degree students of philosophy, sociology and related subjects.

Economics as a Social Science Raimund

Dietz,2024-09-30 This book explores the separation of economics from the social sciences Raimund Dietz attributes this development to the adoption of a too narrow instrumentalist perspective and demonstrates how close the mainstream is to the idea of a socialist planned economy despite all its liberal phraseology The book attempts to comprehensively reconstruct economics as catallactics explicitly including and assigning a central role to liberal forms of socialization such as exchange and money an approach that it argues is the only way to overcome the methodological deficits of the mainstream It allows monetary theory to be integrated into economic theory Further the book shows that modern societies have no choice but to organize themselves as capitalist market economies For good economic reasons money has lost its physical value over the course of time and is now merely symbolic As a result the importance of the state has also grown The author proposes that the power to create money should be consistently placed in the hands of the central bank The book offers a transformative perspective that addresses the urgent need for sustainable resource management worldwide It invites social scientists policymakers and especially economists to rethink economics and pursue a holistic approach to a more sustainable future

Family Ties and Psychosocial Processes in an Ageing Society Alejandro Klein,2024-05-10 This book contributes to the discussion on the ageing society by addressing the new psycho social structures of the ageing society the problems around family bonds and ties and the structures of care and protection The book sheds light on the new roles of grandparents and new grandparents and the empowerment and resilience initiatives thereby providing a broad discussion of what the ageing society implies in psychosocial terms These issues are addressed in an interdisciplinary way but also in an approach that is also rare comparing different realities between Europe and Latin America The basis of the English translation of this book from its Spanish original manuscript was done with the help of artificial intelligence A subsequent human revision of the content was done by the author

The Perils of the One Stathis Gourgouris,2019-07-30 From the earliest times societies have been seduced by the temptation of unitary thinking Recognizing the vulnerability of existence people and cultures privilege regimes that confer authority on a single entity a sovereign ruler a transcendental deity or an Event which they embrace with unquestioned devotion Such obsessions precipitate contempt for the worldliness of real bodies in real time and refusal of responsibility and agency In The Perils of the One Stathis Gourgouris offers a philosophical anthropology that confronts the legacy of monarchical thinking the desire to subjugate oneself to unitary principles and structures whether

political moral theological or secular In wide ranging essays that are at once poetic and polemical intellectual and passionate Gourgouris reads across politics and theology literary and art criticism psychoanalysis and feminism in a critique of both political theology and the metaphysics of secularism He engages with a range of figures from the Apostle Paul and Trinitarian theologians to La Bo tie Schmitt and Freud to contemporary thinkers such as Clastres Said Castoriadis i ek Butler and Irigaray At once a broad perspective on human history and a detailed examination of our present moment The Perils of the One offers glimpses of what a counterpolitics of autonomy would look like from anarchic subjectivities that refuse external ideals resist the allure of command and obedience and embrace otherness

Spaces and Identities in Border Regions

Christian Wille,Rachel Reckinger,Sonja Kmec,Markus Hesse,2015-11-17 Spatial and identity research operates with differentiations and relations These are particularly useful heuristic tools when examining border regions where social and geopolitical demarcations diverge Applying this approach the authors of this volume investigate spatial and identity constructions in cross border contexts as they appear in everyday institutional and media practices The results are discussed with a keen eye for obliquely aligned spaces and identities and relinked to governmental issues of normalization and subjectivation The studies base upon empirical surveys conducted in Germany France Belgium and Luxembourg

Challenging Conventions Christiane Czygan,Hatice Aynur,2025-06-30 As the core theme of Early Modern Ottoman poetry love inspired a plethora of Turkish research the most enlightening of which explored questions of terminology semantics and mystic dimensions Internationally however there have been few publications on this subject This book closes this gap by investigating in different genres and contexts Whereas the terms ubb and ma abbet point to comfort and care the term denotes passionate love often laced with mystical connotations Through this lens we show that Ottoman lyrical realities transgressed the rules burgeoning beyond conventional settings and giving voice to vivid creativity Large parts of urban society indulged in poetry and thereby challenged certain norms
