Societe Industrielle De Mulhouse 18261876 Ses Membres Son Action:

Free Trade and its Enemies in France, 1814-1851 David Todd, 2015-04-30 In the aftermath of the French Revolution advocates of protection against foreign competition prevailed in a fierce controversy over international trade This groundbreaking study is the first to examine this protectionist turn in full Faced with a reaffirmation of mercantile jealousy under the Bourbon Restoration Benjamin Constant Jean Baptiste Say and regional publicists advocated the adoption of the liberty of commerce in order to consolidate the new liberal order But after the Revolution of 1830 a new generation of liberal thinkers endeavoured to reconcile the jealousy of trade with the discourse of commercial society and political liberty New justifications for protection oscillated between an industrialist reinvention of jealousy and an aspiration to self sufficiency as a means of attenuating the rise of urban pauperism A strident denunciation of British power and social imbalances served to defuse the internal tensions of the protectionist discourse and facilitated its dissemination across the French political spectrum

The Savant and the State Robert Fox, 2012-09-01 How scientific discoveries and practice were integrated into nineteenth century French culture and thought Winner of the Sarton Medal for Lifetime Scholarly Achievement of the History of Science Society There has been a tendency to view science in nineteenth century France as the exclusive territory of the nation s leading academic centers and the powerful Paris based administrators who controlled them Ministries and the great savants and institutions of the capital seem to have defined the field while historians have ignored or glossed over traditions on the periphery of science In *The Savant and the State* Robert Fox charts new historiographical territory by synthesizing the practices and thought of state sanctioned scientists and those of independent communities of savants and commentators with very different political religious and cultural priorities Fox provides a comprehensive history of the public face of French science from the Bourbon Restoration to the outbreak of the Great War Following the Enlightenment many different interests competed to define the role of science and technology in French society Political and religious conservatives tended to blame the scientific community for upsetting traditional values and implicitly delivering France into the hands of revolutionary extremists and Napoleonic bureaucrats Scientists for their part embraced the belief that observation and experimentation offered the surest way to the knowledge and wisdom on which the welfare of society depended This debate Fox argues became a contest for the hearts and minds of the French citizenry

A Human Garden Paul-André Rosental, 2019-12-01 Well into the 1980s Strasbourg France was the site of a curious and little noted experiment Ungemach a garden city dating back to the high days of eugenic experimentation that offered luxury living to couples who were deemed biologically fit and committed to contractual childbearing targets Supported by public authorities Ungemach aimed to accelerate human evolution by increasing procreation among eugenically selected parents In this fascinating history Paul Andr Rosental gives an account of Ungemach s origins and its perplexing longevity He casts a troubling light on the influence that eugenics continues to exert even decades after being discredited as a pseudoscience in realms as diverse as developmental psychology

 Cabanel,2012-08-22 Non seulement le plus grand et le plus radical des réformateurs a été un Français Calvin mais encore le
 protestantisme a eu dans notre pays un très vif succès notamment auprès des lites avant que le pouvoir loin de basculer dans
 la religion nouvelle ne décide de rester fidèle Rome et les Français avec lui firent ce contre leur gré. S'ensuivra une longue et
 inexpiable guerre civile l'intervention des puissances étrangères. Jamais un protestant n'a joui en France des mêmes droits de la
 même bienveillance que les catholiques même entre l'édit de Nantes 1592 et sa révocation 1685. Y compris lorsqu'il n'est pas
 persécuté il se trouve persécuté. La Réforme n'en imprime pas moins une forte marque sur la société française elle touche peu près

L'identité économique de la France David Todd,2008-10-15 La France n'aime pas le libre change. À gauche comme
 droite tous les sondages le montrent les Français préfèrent le protectionnisme. L'ouverture au commerce international est
 source de malaise politique. L'identité économique de la France décrite l'émergence de cette culture protectionniste entre la Révolution
 de 1789 et celle de 1848. Au centre droit de l'échiquier politique le protectionnisme français s'est développé successivement la
 droite nationaliste la gauche patriotique et les premiers mouvements socialistes. Le caractère démocratique et national des
 valeurs véhiculées par le discours protectionniste expliquent ce succès partagé entre les producteurs solidaires face à la concurrence
 internationale et rejet du modèle économique anglais industrialiste et individualiste. En Grande Bretagne libéralisme économique et
 libéralisme politique restent liés face à l'éclosion d'une même idéologie. En France après le milieu du XIXe siècle libéralisme
 économique et libéralisme politique se sont séparés pour souvent s'opposer. S'appuyant sur des sources originales françaises
 britanniques et allemandes l'identité économique de la France restitue l'intensité dramatique de ces débats qui ont contribué
 à forger le paysage idéologique français contemporain. L'histoire jette un éclairage saisissant sur la tension qui monte aujourd'hui
 entre la mondialisation économique et la culture démocratique française *Un regard croisé d'experts et chercheurs sur*
