Freeman,Birgitta Swedenborg,Robert H. Topel,2010-04-15 Over the course of the twentieth century Sweden carried out one of the most ambitious experiments by a capitalist market economy in developing a large and active welfare state Sweden s generous social programs and the economic equality they fostered became an example for other countries to emulate Of late Sweden has also been much discussed as a model of how to deal with financial and economic crisis due to the country s recovery from a banking crisis in the mid 1990s At that time economists heatedly debated whether the welfare state caused Sweden s crisis and should be reformed a debate with clear parallels to current concerns over capitalism Bringing together leading economists *Reforming the Welfare State* examines Sweden s policies in response to the mid 1990s crisis and the implications for the subsequent recovery Among the issues investigated are the way changes in the labor market tax and benefit policies local government policy industrial structure and international trade affected Sweden s recovery The way that Sweden addressed its economic challenges provides valuable insight into the viability of large welfare states and more broadly into the way modern economies deal with crisis *Work and Family Policy* Stephen Sweet,2013-09-13 Numerous challenges exist in respect to integrating work and family institutions and there is remarkable cross national variation in the ways that societies respond to these concerns with policy This volume examines these concerns by focusing on cross national variation in structural cultural arrangements Consistent support is found in respect to the prospects of expanding resources for working families both in the opportunity to provide care as well as to remain integrated in the workforce However the studies in this volume offer qualifiers explaining why some effects are not as strong as might be hoped and why effects are sometimes restricted to particular classifications of workers or families It is apparent that when different societies implement similar policies they do not necessarily do so with the same intended outcomes and

usage is mediated by how policies are received by employers and workers The chapters in this book speak to the merits of international comparative analysis in identifying the strategies challenges and benefits of providing resources to workers and their families This book was originally published as a special issue of *Community Work Family Welfare State Change in Leading OECD Countries* Ingmar Schustereder, 2010-05-30 Ingmar J Schustereder investigates the relative influence of economic globalization and post industrial developments as drivers behind recent welfare state change and examines to what extent different national systems of social protection have preserved their core institutional features over time **Children, Families, and States** Cristina Allemann-Ghionda, Karen Hagemann, Konrad H. Jarausch, 2011-03-01 Due to the demand for flexible working hours and employees who are available around the clock the time patterns of childcare and schooling have increasingly become a political issue Comparing the development of different time policies of half day and all day provisions in a variety of Eastern and Western European countries since the end of World War II this innovative volume brings together internationally known experts from the fields of comparative education history and the social and political sciences and makes a significant contribution to this new interdisciplinary field of comparative study **Human Resource Management in Education** Justine Mercer, Bernard Barker, Richard Bird, 2010-06-10 The study of educational leadership makes little sense unless it is in relation to who the leaders are how they are leading what is being led and with what effect Based on the premise that learning is at the heart of leadership and that leaders themselves should be learners the Leadership for Learning series explores the connections between educational leadership policy curriculum human resources and accountability Each book in the series approaches its subject matter through a three fold structure of process themes and impact Series Editors Clive Dimmock Mark Brundrett and Les Bell The effects of globalization are evident in education policy around the world Governments from the United States to China are driving their education systems to produce more skilled more flexible more adaptable employees The pressure to perform is all pervasive meaning present day leaders have to go beyond the principles of humane and equitable management practice and look for a competitive advantage through strategies that enhance motivation build capacity for organizational improvement and produce better value added performance Human Resource Management in Education debates the fundamental question of how far effective human resource management policies can enable schools and colleges to transcend the paradoxes of the global reform agenda It analyses the relationship between leadership the classroom and results and uses case studies to explore the extent to which performance is enhanced by distributed leadership and constrained by social political and economic contexts The book is divided into three parts examining the current context of human resource management by critically analysing globalization human capital theory and worldwide trends in government legislation societal values and teacher culture s exploring two pairs of contemporary themes in human resource management by comparing the roles of leaders and followers on the one hand and contrasting learning and greedy organizations on the other looking at how the context and the themes impact on

particular contemporary practices in human resource management by analysing the selection and development of professionals the remodelling of school teams and the management of performance The authors carefully blend advocacy with evidence to ensure relevance for both practitioner and academic audiences across the globe The book would be of particular use to students on masters courses in educational leadership

Academic Careers and the Gender Gap Maureen

Baker, 2012-08-31 Women earn nearly half of all new PhDs in Canada the United States Australia New Zealand and the United Kingdom Why then do they occupy a disproportionate number of the junior level positions at universities while their male counterparts continue to snap up 80 percent of the more prestigious jobs In *Academic Careers and the Gender Gap* Maureen Baker explains the reasons behind this inequality drawing on interviews with male and female scholars previous

research and her own thirty eight year academic career Using a feminist political economy and interpretive theoretical framework she argues that current university priorities and collegial relations often magnify the impact of gendered families and identities and perpetuate the academic gender gap Baker sets academia in the wider context of restructuring labour markets and gendered earning patterns within families The result is a revealing portrait of significant and persistent differences in job security institutional affiliation working hours rank salary job satisfaction collegial networks and career length between male and female scholars

Negotiating the Life Course Ann Evans, Janeen Baxter, 2012-10-23 Pathways through the life course have changed considerably in recent decades Many of our assumptions about leaving home starting new relationships and having children have been turned upside down It is now almost as common to have children prior to marriage as afterwards and certainly much more common to live together before marrying than to marry without first living together Women are more likely to remain in the labour force after having children and many families struggle with problems of work family balance at some stage in their lives particularly when they have young children But how much has really changed Is there really more diversity in how individuals transition through these life course stages or just variations at the margin with most people following a standard work and family life course This volume makes use of rich longitudinal data from a unique Australian project to examine these issues Drawing on broader theories of social change and demographic transitions in an international context each chapter provides a detailed empirical assessment of the ways in which Australian adults negotiate their work and family lives In doing so the volume provides important insight into the ways in which recent demographic social and economic changes both challenge and reproduce gender divisions
