A brief but comprehensive introduction to sociolinguistics: the study of ways in which groups of people use language. It makes links with related disciplines such as history, politics and gender studies. **Handbook of Language & Ethnic Identity** Joshua A. Fishman, Ofelia García, 2010. **Towards a Social Science of Language** Gregory R. Guy, Crawford Feagin, Deborah Schiffrin, John Baugh, 1996-08-19. This is a two-volume collection of original research papers designed to reflect the breadth and depth of the impact that William Labov has had on linguistic science. Four areas of Labovian linguistics are addressed. First is the study of variation and change: the papers in sections I and II of the first volume take this as their central theme, with a focus on either the social context and uses of language I or on the internal linguistic dynamics of variation and change II. The study of African American English and other language varieties in the Americas spoken by people of African descent and influenced by their linguistic heritage is the subject of the papers in section III of the first volume. The third theme is the study of discourse: the papers in section I of the second volume develop themes in Labovian linguistics that go back to Labov's work on narrative, descriptive and therapeutic discourse. Fourth is the emphasis on language use: the search for discursive, interactive and meaningful determinants of the complexity in human communication. Papers with these themes appear in section II of the second volume.
