Citizen Media and Practice Hilde Stephansen, Emiliano Treré, 2019-10-28 This groundbreaking collection advances understanding of the concept of media practices by critically interrogating its relevance for the study of citizen and activist media Media as

practice has emerged as a powerful approach to understanding the media's significance in contemporary society. Bringing together contributions from leading scholars in sociology, media and communication, social movement and critical data studies, this book stimulates dialogue across previously separate traditions of research on citizen and activist media practices and stakes out future directions for research in this burgeoning interdisciplinary field. Framed by a foreword by Nick Couldry and a substantial introductory chapter by the editors, contributions to the volume trace the roots and appropriations of the concept of media practice in Latin American communication theory, reflect on the relationship between activist agency and technological affordances, explore the relevance of the media practice approach for the study of media activism, including activism that takes media as its central object of struggle, and demonstrate the significance of the media practice approach for understanding processes of mediatization and datafication. Offering both a comprehensive introduction to scholarship on citizen media and practice and a cutting edge exploration of a novel theoretical framework, the book is ideal for students and experienced scholars alike.

Not Ever Absent: Storytelling in Arts, Culture and Identity Formation, 2019-01-04 This volume was first published by Interdisciplinary Press in 2015. Storytelling has always played a central role in the formation of cultures and communities. All cultures define themselves and their place in the world through their stories. Similarly, our identities are largely constructed as narratives, and it is with the aid of storytelling that we manage to conceive of ourselves as meaningful wholes. Thus, storytelling is not ever absent; it is to be found in literature, social life, in the places we visit and the buildings we live in. This volume presents storytelling in various appearances, from ancient myths and oral history to transmedia narratives and digital stories. Different forms of narrative are analysed, as is the use of storytelling as a method for e.g. counselling, education and research. Throughout twenty-five chapters, a compelling overview of recent research on the topic is provided, both stressing the omnipresence of storytelling and exploring what storytelling is and isn't.

Historical Developments and Theoretical Approaches in Sociology - Volume I Charles Crothers, 2010-11-30 *Historical Developments and Theoretical Approaches in Sociology* in two volumes is a component of *Encyclopedia of Social Sciences and Humanities* in the global *Encyclopedia of Life Support Systems (EOLSS)*, which is an integrated compendium of twenty Encyclopedias. There is a broad congruence between the objective configurations of social life and the components of the disciplines studying them: the body of sociological knowledge is socially constructed, and the pathways to its gaining of knowledge influenced by a variety of factors. Moreover, since social life is ever changing, sociology often has to scramble to catch up with the changing social world. This work is built up around four

broad topics the first providing important shared contextual material and then followed by three broad levels of social analysis with each of these four parts containing a number of chapters with more specific and in depth information The theme essay provides a general introduction and overview of the theme as a whole In total the work holds 40 contributions written by a selection of many international renowned specialists from 12 countries It was important to obtain a wide range of viewpoints giving the ways in which social issues arise quite differently in a range of countries These two volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs
