Sociology An Interactive Approach:

Sociology Nik Jorgensen, 1997 A sociology textbook for the 1997 AEB A Level syllabus this text offers complete coverage of all AS and A Level topic areas for examination by the AEB board in 1998 including chapters on culture and identity and world sociology It features a carefully constructed introduction aimed at encouraging students to questions the hows and whys of studying sociology and aims to generate an appreciation of the subject s engagement with the wider social and political issues of today While each chapter comprehensively covers one topic at time the themes of age class gender and ethnicity are not compartmentalized but interwoven within the chapters In this way students are made aware of the more complex interaction that exists between different areas of study The text includes such features as practical exercises research activities discussion ideas project suggestions and structured examination questions **Sociology** MaryKris Mcilwaine, Kimberly Alexander, Nili Kirschner, Janine Schipper, 2012 *A Beginner's Guide to Social Theory* Shaun Best, 2003-02-24 Best offers a comprehensive overview of social theory from classical sociology to the present day The reader is guided through the work of Durkheim Marx and Weber and contemporary thinkers like Anthony Giddens Michel Foucault Jurgen Habermas Judith Butler Gilles Deleuze Manuel Castells Luce Irigaray Naomi Woolf and Camille Paglia **Qualitative Research Design: An Interactive Approach** Joseph A. Maxwell, 2013 The Third Edition presents an approach to qualitative research design that both captures what researchers really do and provides step by step support and guidance for those embarking for the first time on designing a qualitative study *Beyond Sociology's Tower of Babel* Bernard S. Phillips, 2001 To look outside the discipline of sociology is to find little credibility given to the field as science Bernard Phillips argues that we are learning to see ever more clearly the contradiction between scientific standards and what in fact has been achieved by sociology Instead of knowledge based on the full range of our findings we have separate pieces of knowledge located within the diverse areas of the discipline and fads and fashions in the ideas and terms we use with relatively little cumulative development This has led many to question whether any scientific method can be applied to human behavior If the arguments and alternative interpretations in this book on the problematic nature of sociology s use of scientific method prove to be credible and fruitful then the implications are profound For example the conclusions drawn for every single social science study that has ever been conducted would be open to reinterpretation because they fail to take into account systematically the enormous complexity involved within any given instance of human behavior Our present approach assumes implicitly that the pieces of the human jigsaw puzzle can at some point be put together so as to yield a coherent picture Yet as Phillips shows if each piece is itself deficient then no coherent picture emerges when we attempt to put the pieces together Refusing to take the current fragmentation of sociology as inevitable Phillips offers a clear vision through a series of heuristic web images of how sociologists might achieve the cumulative development and credibility that are the hallmarks of any science His research draws heavily on the works of classical and contemporary theorists philosophers and historians of science as

well as on postmodernist critiques and responses to postmodernism This reconstruction will be useful for courses in method in the study of the classical tradition of sociology Bernard Phillips was introduced to sociology at Columbia University by C Wright Mills A former professor of sociology at Boston University cofounder of the ASA Section on Sociological Practice and founder of the Sociological Imagination Group his publications emphasize methodology and theory *Introduction to Politics and Society* Shaun Best,2002-02-15 *Introduction to Politics and Society* draws on examples from popular political culture in order to convey how politics operates in the contemporary world Examples illustrate the meaning of theories and show the relevance of central theoretical debates Planned and developed with an eye to the needs of students the book is an extraordinary resource for undergraduate teaching and study needs It will be required reading for undergraduate students in sociology politics and social policy Digital Sociology Noortje Marres,2017-05-11 This provocative new introduction to the field of digital sociology offers a critical overview of interdisciplinary debates about new ways of knowing society that are emerging today at the interface of computing media social research and social life Digital Sociology introduces key concepts methods and understandings that currently inform the development of specifically digital forms of social enquiry Marres assesses the relevance and usefulness of digital methods data and techniques for the study of sociological phenomena and evaluates the major claim that computation makes possible a new science of society As Marres argues the digital does much more than inspire innovation in social research it forces us to engage anew with fundamental sociological questions We must learn to appreciate that the digital has the capacity to throw into crisis existing knowledge frameworks and is likely to reconfigure wider relations This timely engagement with a key transformation of our age will be indispensable reading for undergraduate and graduate students taking courses in digital sociology digital media computing and society Digital Approaches to Inclusion and Participation in Cultural Heritage Danilo Giglitter, Luigina Ciolfi, Eleanor Lockley, Eirini Kaldeli,2023-02-24 This edited book brings together best examples and practices of digital and interactive approaches and platforms from a number of projects based in European countries to foster social inclusion and participation in heritage and culture It engages with ongoing debates on the role of culture and heritage in contemporary society relating to inclusion and exclusion openness access and bottom up participation The contributions address key themes such as the engagement of marginalised communities the opening of debates and new interpretations around socially and historically contested heritages and the way in which digital technologies may foster more inclusive cultural heritage practices They will also showcase examples of work that can inspire reflection further research and also practice for readers such as practice focused researchers in both HCI and design Indeed as well as consolidating the achievements of researchers the contributions also represent concrete approaches to digital heritage innovation for social inclusion purposes The book s primary audience is academics researchers and students in the fields of cultural heritage digital heritage human computer interaction digital humanities and digital media as well as practitioners in the cultural sector **Interactive Approaches to Water**

Governance in Asia Kenji Otsuka, 2019-01-12 This book applies interactive perspectives which have historically mainly been discussed in the context of Western European countries to case studies on water governance in Asia. It examines how these perspectives can be used to reveal complex and dynamic interactions in water governance in Asia and how interactions between policies and practices as well as those between formal institutes and emerging informal institutes come to pass. In two introductory chapters and seven case studies in Asia (two from China and each one from Japan, Thailand, the Philippines, Indonesia, and India), the book reveals the interactive forms currently emerging in Asia under hierarchical but often fragmented administrative systems. In addition, it explores emerging hybrid forms of interactive governance which bring together governmental and non-governmental actors and discusses how the expected role of government and roles of non-governmental actors could be changed to solve problems in a more cooperative manner. In this context, researchers from outside the locality could play an important role helping facilitate such forms of interactive governance. The book offers extensive information on the essential features of interactive forms and on the role of such transdisciplinary approaches, making it a valuable resource not only for scholars and university students but also for policymakers and grass roots practitioners directly involved in the interactive process of water governance. *Social Theorists of Morality* Owen

Abbott, 2025-01-29 This book provides an interdisciplinary series of essays on key social theorists of morality. It explores contributions to social moral theorising made by W. E. B. Du Bois, G. H. Mead, Jane Addams, Alasdair MacIntyre, Carol Gilligan, Seyla Benhabib, Kwame Anthony Appiah, and Jonathan Haidt. It thus seeks to integrate alternative voices at the foundations of sociological theorising about morality while entering into dialogues with post-Enlightenment moral philosophy and contemporary moral psychology. In so doing, it engages with perspectives of pragmatism, virtue ethics, care ethics, feminist critiques, and moral foundations theory. The essays discuss key topics in social theories of morality, including moral action, socialisation, habit, and reflexivity; relationships, emotion, self-identity, racism, and colonialism; universalism and innateness. It centres crucial but often overlooked questions of moral power and assesses the relationship between moral theorising and normative argument. The essays are conjoined by a running theme of moral agency: how it is constituted and how it is enacted, which orientates the book's arguments and critiques. **(Un)Believing in Modern Society** Jörg Stolz, Judith

Könemann, Mallory Schneuwly Purdie, Thomas Englberger, Michael Krüggeler, 2016-06-23 This landmark study in the sociology of religion sheds new light on the question of what has happened to religion and spirituality since the 1960s in modern societies. Exposing several analytical weaknesses of today's sociology of religion, *Unbelieving in Modern Society* presents a new theory of religious secular competition and a new typology of ways of being religious secular. The authors draw on a specific European society, Switzerland, as their test case, using both quantitative and qualitative methodologies to show how the theory can be applied. Identifying four ways of being religious secular in a modern society (institutional, alternative, distanced, and secular), they show how and why these forms have emerged as a result of religious secular

competition and describe in what ways all four forms are adapted to the current individualized society Contemporary Perspectives on Social Capital in Educational Contexts RoSusan D.
