Sociology Of The Black Experience

John H Stanfield II

Sociology Of The Black Experience:

Sociology of the Black Experience Daniel C. Thompson, 1974-07-09 **Transcending the Color Line** Bobby E. Mills, 2014-09-16 *Transcending the Color Line* by sociologist and professor Bobby E. Mills PhD represents a philosophical attempt to make sense out of American black collective experience. This collection of essays does not reflect traditional sociological perspectives and methodological considerations. Instead, the query is: How do we live? More importantly, what are we willing to sacrifice in order to live the way we say we want to live? In other words, these essays dig deeper to the moral and spiritual issues that lie beneath the more obvious sociological ones. Invariably, the search for moral understanding and spiritual meaning is neither easy nor popular. Yet it is the abstract, empirical, amoral, and apolitical character of traditional sociology that has all but rendered it irrelevant to the resolution of contemporary social ills. The biased theoretical assumptions of the scientific method, i.e., abstract empiricism, are the social basis for the collective bias otherwise known as the illusion of value neutrality. This collective cultural bias is the social foundation for institutional racism, sexism, theological dogmatism, i.e., denominationalism, and above all, authoritarianism. Indeed, every ism is a schism, and schisms divide. Our either/or logic fosters cultural extremism rather than a universal perspective on humanity. By digging deep to the true source of our sociological and leadership issues, these essays not only call black and white individuals accountable to the dysfunction present in our shared social experience but inspire all people to transcend the color line and become part of the solution.

Sociology of the Black Experience Daniel Calbert Thompson, 1974 **The Death of White Sociology** Joyce A. Ladner, 1998 *Afro-American Life, History and Culture*, 1985 **Rethinking Race and Ethnicity in Research Methods** John H. Stanfield II, 2016-06-03 This collection of original work demonstrates the new ways in which particular research methodologies are used, valued, and critiqued in the field of race and ethnic studies. Contributing authors discuss the ways in which their personal and professional histories and experiences lead them to select and use particular methodologies over the course of their careers. They then provide the intellectual histories, strengths, and weaknesses of these methods as applied to issues of race and ethnicity and discuss the ethical, practical, and epistemological issues that have influenced and challenged their methodological principles and applications. Through these rigorous self-examinations, this text presents a dynamic example of how scholars engage both research methodologies and issues of social justice and ethics. This volume is a successor to Stanfield's landmark *Race and Ethnicity in Research Methods*. **HUD Challenge**, 1975 **The End of Black Studies** Clovis E. Semmes, 2016-08-12 Following a history of racial oppression and segregation, Black Americans were able to move in greater numbers into previously all or predominantly White colleges and universities. However, they encountered normative structures that excluded or distorted the Black experience and denied Black perspectives. As a result, Black studies grew up reconstructing the humanity of a historically oppressed, devalued, and exploited group. Knowledge production in Black studies offers distinct insights into the strength and resiliency of the human spirit and poses exemplary

models for enlightened social change This book examines the foundational parameters and historical mission of the field of African American Studies which emerged from a broad based Black intellectual tradition defined by the metaproblem of cultural hegemony Semmes seeks to broaden our thinking about the scope and content of Black studies The End of Black Studies identifies Afrocentric or Black centered approaches to knowledge production that are distinctly different from yet inclusive of a historiographical emphasis on ancient Egypt but alternative to the claim of a singular African worldview This book will appeal to students and scholars interested in the field of Black Studies including African American studies Africana studies Africology and Pan African studies It will be a source of critical discussion for graduate seminars examining theory building and or knowledge production research and writing in Black studies The End of Black Studies has received the 2017 Outstanding Book Award from the National Council for Black Studies Read the Introduction for free online using our eBook widget Challenge ,1975 *The Black Student in the Wisconsin State Universities System* Cornelius P. Quimby,1971 **Introduction to African American Studies** Talmadge Anderson,James Benjamin Stewart,2007 There is an ongoing debate as to whether African American Studies is a discipline or multidisciplinary or interdisciplinary field Some scholars assert that African American Studies use a well defined common approach in examining history politics and the family in the same way as scholars in the disciplines of economics sociology and political science Other scholars consider African American Studies multidisciplinary a field somewhat comparable to the field of education in which scholars employ a variety of disciplinary lenses be they anthropological psychological historical etc to study the African world experience In this model the boundaries between traditional disciplines are accepted and researches in African American Studies simply conduct discipline based an analysis of particular topics Finally another group of scholars insists that African American Studies is interdisciplinary an enterprise that generates distinctive analyses by combining perspectives from d African American Religious Thought Cornel West,Eddie S.
