Sociology for the Twenty-first Century Timothy Jon Curry, Robert M. Jibou, Kent P. Schwirian, 2002 For freshman level courses in Introductory Sociology With a strong critical thinking focus this text encourages students to think about tomorrow and the next century from a sociological viewpoint This text introduces students to sociology using an eclectic approach that is tied together by systematically highlighting two aspects of social change 1 the change or contrast between social life organized around personal communal relations and social life organized around impersonal associational relations and 2 the ongoing social processes and the implications they have for life in the twenty first century **Digital Sociology in Everyday Life** Jessie Daniels, Karen Gregory, Tressie McMillan Cottom, 2016-11-18 Digital technologies digital media and mobile technologies now shape the experience of everyday life in the Western world yet the way our quotidian lives are enmeshed with these technologies is far from clearly understood Through studies of the digital everyday sociologists are beginning to reinvigorate the sociological imagination in light of digitization Chapters in this Byte cover topics such as designing a research framework and how to work ethically as a digital researcher continually interrogating one's position as a researcher and reflecting on the process of knowledge creation Cumulatively they highlight the value of sociological theory for understanding our digital world *Annotated Instructors Edition* John J. Macionis, 2002-01-10 Japanese Religions on the Internet Erica Baffelli, Ian Reader, Birgit Staemmler, 2013-05-13 Japanese Religions on the Internet draws attention to how religion is being presented represented and discussed on the Japanese Internet Its intention is to contribute to wider discussions about religion and the Internet by providing an important example based on one of the Internet's most prominent languages of how new media technologies are being used and are impacting on religion in the East Asian context while also developing further our understandings of religion in a technologically advanced country Scholars studying the relationship of

religion and the Internet can no longer work on prevailing notions that have thus far characterised the field such as the assumption that the Internet is a Western centric phenomenon and that studies of English language sites relating to religion can provide a viable model for wider analyses of the topic Despite this growing amount of research on religion and the Internet comparatively little has focused on non Western cultures The general field of study relating to religion and the Internet has paid scant attention to Asian contexts The field needs a full length and comprehensive study that focuses on the Japanese religious world and the Internet not merely to redress the imbalances of the field thus far but also because such studies will be central to the emerging field of the study of religion and the Internet in future They will provide important means of developing new theories constructing new paradigms and understanding the underlying dynamics of this new media form
