The Missionary Review ,1903 **Raising Robots to be Good** Rebecca Raper,2024-11-26 In 1941 Isaac Asimov famously introduced us to the idea of Robots with the ability to tell between right

and wrong However as his stories go on to show the Laws of Robotics weren't quite able to govern robots in a way that we would deem acceptable for humanity In recent years scientists have worked to try to understand how we might create robots with this capability robots with morals and as Robots and Artificial Intelligence Systems become more integrated into society and our lives it seems that achieving this aim is as pertinent as ever This book introduces this pursuit known as Machine Ethics and aims to outline some of the art and science behind the field including the philosophy psychology and computer science that underpins much of the research into this area After the necessary background and an exploration of the problem a new theory is proposed inspired how we might envisage moral agency developing in a child The proposal is that we need to cultivate moral development in a robot in pretty much the same way we might parent a child Raising Robots to be Good
