Sociology Full Circle:

Sociology Full Circle William Feigelman, Sociology Full Circle William Feigelman, 1976 **Unhastening Science** Dick Pels, 2003-01-01 This book offers a new account of what makes science special among other human pursuits critically engaging with a variety of approaches especially constructivist and relativist studies of science and technology It focuses on the studied lack of haste of science its relative freedom from stress and its socially sanctioned withdrawal from the swift pace of ordinary life Unhastening Science offers a balanced and thoughtful argument which emphasizes the dangers of cossetting science from the scourge of internal competition while at the same time highlighting the need for distance between the process of scientific thought and the faster machinery of politics business sports and the media **Sociology** John Bascom, 1887 Science for Agriculture Wallace E. Huffman, Robert E. Evenson, 2008-02-28 Science for Agriculture was the first thorough quantitative and analytical treatment of the history of the U S agricultural research system and as such has served as the foundation for research over the 10 years since its publication The benefits from public and private investment in agricultural research are immense and should be understood by every student of the agricultural science system in the United States The second edition updates important landmarks components characteristics and trends of the U S system for developing and applying science to increase the productivity and advancements of agriculture Science for Agriculture 2e is essential reading for agriculture educators and researchers Land Grant administrators food and agri industry R D and all others who need to understand the factors that will influence future public agricultural research policy **The Course of Human History** Johan Goudsblom, Eric Lionel Jones, Stephen Mennell, 1996 This text explores four major features of human society in their ecological and historical context the origins of priests and organised religion the rise of military men in an agrarian society economic expansion and growth and civilising and decivilising trends over time *Place and Politics* John A. Agnew, 2014-10-03 The first part of the book is concerned with developing the place perspective Three dimensions of place are put forward locale and sense of place describe the objective and subjective dimensions of local social arrangements within which political behaviour is realized location refers to the impact of the macro order to the fact that a single place is one among many and that the social life of a place is embedded in the workings of the state and the world economy The second part of the book provides detailed examinations of American and Scottish politics using the place perspective Contrary to the view that place or locality is important only in traditional societies this book argues that place is of continuing significance in even the most advanced societies **The Aesthetic Dimension of Visual Culture** Jakub Stejskal, 2010-08-11 How can aesthetic enquiry contribute to the study of visual culture There seems to be little doubt that aesthetic theory ought to be of interest to the study of visual culture For one thing aesthetic vocabulary has far from vanished from contemporary debates on the nature of our visual experiences and its various shapes a fact especially pertinent where dissatisfaction with vulgar value relativism prevails Besides the very question ubiquitous in the debates on

visual culture of what is natural and what is acquired in our visual experiences has been a topic in aesthetics at least since the Enlightenment And last but not least despite attempts to study visual culture without employing the concept of art there is no prospect of this central subject of aesthetic theory ebbing away from visual studies The essays compiled in this volume show a variety of points of intersection and involvement between aesthetics and visual studies some consider the future of visual art some the conditions and characteristics of contemporary visual aesthetic experience while others take on the difficult question of the relation between visual representation and reality What unites them is their authors willingness to think about contemporary visual culture in the conceptual frame of aesthetics This book will be of great interest to students and scholars of philosophical aesthetics art history and cultural studies

Ethnomethodology's Program Harold Garfinkel, 2002 Since the 1967 publication of *Studies in Ethnomethodology* Harold Garfinkel has indelibly influenced the social sciences and humanities worldwide This new book the long awaited sequel to *Studies* comprises Garfinkel's work over three decades to further elaborate the study of ethnomethodology Working out Durkheim's Aphorism the title used for this new book emphasizes Garfinkel's insistence that his position focuses on fundamental sociological issues and that interpretations of his position as indifferent to sociology have been misunderstandings Durkheim's aphorism states that the concreteness of social facts is sociology's most fundamental phenomenon Garfinkel argues that sociologists have for a century or more ignored this aphorism and treated social facts as theoretical or conceptual constructions Garfinkel in this new book shows how and why sociology must restore Durkheim's aphorism through an insistence on the concreteness of social facts that are produced by complex social practices enacted by participants in the social order Garfinkel's new book like *Studies* will likely stand as another landmark in sociological theory yet it is clearer and more concrete in revealing human social practices

Problem of the Century Elijah Anderson, Douglas Massey, 2001-07-19 In 1899 the great African American scholar W E B DuBois published *The Philadelphia Negro* the first systematic case study of an African American community and one of the foundations of American sociology DuBois prophesied that the color line would be the problem of the twentieth century One hundred years later *Problem of the Century* reflects upon his prophecy exploring the ways in which the color line is still visible in the labor market the housing market education family structure and many other aspects of life at the turn of a new century The book opens with a theoretical discussion of the way racial identity is constructed and institutionalized When the government classifies races and confers group rights upon them is it subtly reenforcing damaging racial divisions or redressing the group privileges that whites monopolized for so long The book also delineates the social dynamics that underpin racial inequality The contributors explore the causes and consequences of high rates of mortality and low rates of marriage in black communities as well as the way race affects a person's chances of economic success African Americans may soon lose their historical position as America's majority minority and the book also examines how race plays out in the sometimes fractious relations between blacks and immigrants The final part of the book shows how the color line

manifests itself at work and in schools Contributors find racial issues at play on both ends of the occupational ladder among absentee fathers paying child support from their meager earnings and among black executives prospering in the corporate world In the schools the book explores how race defines a student's peer group and how peer pressure affects a student's grades Problem of the Century draws upon the distinguished faculty of sociologists at the University of Pennsylvania where DuBois conducted his research for The Philadelphia Negro The contributors combine a scrupulous commitment to empirical inquiry with an eclectic openness to different methods and approaches Problem of the Century blends ethnographies and surveys statistics and content analyses census data and historical records to provide a far reaching examination of racial inequality in all its contemporary manifestations *Frontiers of Social Theory* George Ritzer,1990 This book presents essays reflecting the current state and near term prospects of sociological theory *Sociologists' Tales* Katherine Twamley,Mark Doidge,Andrea Scott,2015-04-15 Sociologists Tales brings together the thoughts and experiences of key UK sociologists from different generations of British sociology in reflecting on why they have chosen a career in sociology how they have managed to do it and what advice they would offer the next generation **Agency and Structure (RLE Social Theory)** Piotr Sztompka,2014-08-21 A striking feature of the human condition is its dual contradictory inherently split character on the one hand autonomy and freedom on the other constraint and dependence on social structure This volume addresses this central problem of the linkage between human action and social structure in sociological and social science theory Contributions cover several different approaches to the agency structure problematic and represent the work of a number of leading international sociologists Their efforts point to a reorientation of social theory both on philosophical and methodological levels Introducing Sociological Theory Darren O'Byrne,2013-11-26 Introducing Sociological Theory offers a comprehensive navigable and highly readable introduction to the main schools of thought in sociology along with the philosophical ideas that underpin them 8 broad theoretical traditions or perspectives are explained helping you to recognize the scope and range of sociological theory and to think sociologically and see the social world in different ways The author skilfully and revealingly engages with each theoretical perspective showing what it actually means why it utilises certain concepts over others and how it generates and derives from evolving traditions of sociological thought Introducing Sociological Theory is an essential text for all sociology students and of key interest more broadly within the social sciences and humanities **Rural Sociologists at Work** Johannes Hans Bakker,2015-10-05 This collection of original chapters written by prominent social scientists elucidates the theory and practice of contemporary rural sociology The book applies lessons from the careers of sociologists and their field research endeavors covering a wide range of topics agricultural production processing and marketing international food security and rural development degradation of the bio physical environment across borders and the study of community family health and many other issues in an increasingly globalized world The authors candid accounts provide insight into possibilities for enhancing opportunity and equality and serving basic
