**New Directions in Social Theory, Education and Embodiment** John Evans,Brian Davies,2014-10-29 This book exemplifies the nurturing spirit of inter discursive debate with a view to opening up new theoretical and empirical insights understanding and engagement with debates on issues relating to pedagogy policy equity and embodiment From a variety of social science perspectives an international force of contributors apply a multitude of concepts to research agendas which illustrate the multiple ways in which the body both impacts culture and is simultaneously and seamlessly positioned and shaped by it maintaining social reproduction of class and cultural hierarchies and social regulation and control They attest that once we begin to trace the flow of knowledge and discourses across continents countries regions and communities

by registering their re contextualisation both within various popular pedagogies e g newspapers film TV web pages IT and the formal and informal practices of schools families and peers we are compelled to appreciate the bewildering complexity of subjectivity and the ways in which it is embodied Indeed the chapters suggest that no matter how hegemonic or ubiquitous discursive practices may be they inevitably tend to generate both intended and unexpected affects and effects people and populations cannot easily be determined suppressed or controlled This book was originally published as a special issue of Sport Education and Society

*Aging in European Societies* Constantinos Phellas,2012-10-02 Between longer life expectancies and declining birth rates Europe s elder population is growing into a sizable minority with considerable impact on nations health systems and economies in other words global implications as well as local and regional ones Those investing in the health of older adults need a double perspective the social and clinical complexity of aging and the larger forces shaping these experiences *Aging in European Societies* examines aging trends across the continent analyzing individual and collective variables that affect the lives of older adults and drawing salient comparisons with other parts of the world An interdisciplinary panel of experts provides theory research and empirical findings with examples from the UK Cyprus Sweden and others in key areas such as family and social supports physical and cognitive changes dependence and autonomy issues and living arrangements The book s wide net approach offers insights into not only aging but aging well And of particular importance it details approaches to defining and measuring the elusive but crucial concept quality of life Included in the coverage The potential for technology to improve elders quality of life Dementia and quality of life issues Changes in functional ability with aging and over time Family networks and supports in older age Factors influencing inequalities in quality of life Late life learning in the E U Gerontologists sociologists health and cross cultural psychologists and public health policymakers will welcome *Aging in European Societies* as a springboard toward continued discussion new directions for research and improvements in policy and practice

**Gender and Food** Shelley L. Koch,2019-02-22 *Gender and Food A Critical Look at the Food System* synthesizes existing theoretical and empirical research on food gender and intersectionality to offer students and scholars a framework from which to understand how gender is central to the production distribution and consumption of food

*Everyday Eating in Denmark, Finland, Norway and Sweden* Jukka Gronow,Lotte Holm,2019-04-18 The chapters in this volume concentrate on the mundane and ordinary eating practices of the everyday showing how these are linked to change in modern society The contributors present a collection of systematic empirical results from a unique study based on representative samples of four Nordic populations Denmark Finland Norway and Sweden conducted at two time points 15 years apart The results of this unprecedented longitudinal survey leads the contributors to question many commonly held beliefs about the presumed and feared collapse of the traditional eating habits family meals and regular meal patterns As the social organization of eating is in many ways related to developments in other social institutions such as family education and work chapters provide interesting insights into contemporary society with key

topics selected for scrutiny including gender food types diet and health and cooking practices Additionally the chapters highlight changes in the gendering of food practices and signs of increasing informality around meals      Sociological Social Work Priscilla Dunk-West,Fiona Verity,2016-04-01 Sociological social work is a lifelong social work practice which is animated by a sociological perspective Social workers shorthand orientations such as strengths perspective task centred or humanistic to name but a few as a way to identify their philosophical and theoretical approaches in professional life Whilst some texts have examined sociology for social work this text instead proposes that sociological social work is a legitimate and theoretically rich orientation and this book demonstrates what sociological social work looks like in our rapidly changing world This text will equip students and practitioners with a way to think sociologically not just while they are studying but as an ever present reference for making sense of social work purpose and how this is realised in a transforming world This follows an established tradition in social work literature but this book elevates and names the importance of this approach which we argue is critically needed if social work is to achieve its agenda in transformative social political economic and environmental contexts The current landscape in which we live is one that is characterised by rapid changes which have implications for the life experiences of those with whom social workers work social justice advocacy agendas and for fulfilling the purpose of social work more generally This book is essential reading for those looking to keep up with these changes

**Challenging health inequalities** Dowler, Elizabeth,Spencer, Nick J.,2007-09-05 This book offers a unique multi disciplinary perspective on tackling health inequalities in a rich country examining the New Labour policy agenda for tackling health inequalities and its inherent challenges The book presents an overview of progress since the publication of the seminal and ambitious 1998 Acheson Inquiry into health inequalities and the theoretical and methodological issues underpinning health inequalities The contributors consider the determinants of inequality for example early childhood experience and ethnicity the factors that mediate the relationship between determinants and health nutrition housing and health behaviour and the sectoral policy interventions in user involvement local area partnership working and social work Challenging health inequalities offers a combination of broad analysis of progress from differing perspectives and will be key reading to academics students and policy makers      *Alcohol, Tobacco and Obesity* Kirsten Bell,Amy Salmon,Darlene McNaughton,2012-03-29 Although drinking smoking and obesity have attracted social and moral condemnation to varying degrees for more than two hundred years over the past few decades they have come under intense attack from the field of public health as an unholy trinity of lifestyle behaviours with apparently devastating medical social and economic consequences Indeed we appear to be in the midst of an important historical moment in which policies and practices that would have been unthinkable a decade ago e g outdoor smoking bans incarcerating pregnant women for drinking alcohol and prohibiting restaurants from serving food to fat people have become acceptable responses to the risks that alcohol tobacco and obesity are perceived to pose Hailing from Canada Australia the United Kingdom and the USA and drawing on examples

from all four countries contributors interrogate the ways in which alcohol tobacco and fat have come to be constructed as problems requiring intervention and expose the social cultural and political roots of the current public health obsession with lifestyle No prior collection has set out to provide an in depth examination of alcohol tobacco and obesity through the comparative approach taken in this volume This book therefore represents an invaluable and timely contribution to critical studies of public health health inequities health policy and the sociology of risk more broadly **Wonder Foods** Lisa Haushofer,2022-12-27 Between 1850 and 1950 experts and entrepreneurs in Britain and the United States forged new connections between the nutrition sciences and the commercial realm through their enthusiasm for new edible consumables The resulting food products promised wondrous solutions for what seemed to be both individual and social ills By examining creations such as Gail Borden s meat biscuit Benger s Food Kellogg s health foods and Fleischmann s yeast Wonder Foods shows how new products dazzled with visions of modernity efficiency and scientific progress even as they perpetuated exclusionary views about who deserved to eat thrive and live Drawing on extensive archival research historian Lisa Haushofer reveals that the story of modern food and nutrition was not about innocuous technological advances or superior scientific insights but rather about the powerful logic of exploitation and economization that undergirded colonial and industrial food projects In the process these wonder foods shaped both modern food regimes and how we think about food

Weighty Issues Jeffery Sobal,2017-09-08 Many people consider their weight to be a personal problem when then does body weight become a social problem Until recently the major public concern was whether enough food was consistently available As food systems began to provide ample and stable amounts of food questions about food availability were replaced with concerns about ideal weights and appearance These interests were aggregated into public concerns about defining people as too fat and too thin Social constructionist perspectives can contribute to the understanding of weight problems because they focus attention on how these problems are created maintained and promoted within various social environments While there is much objectivist research concerning weight problems few studies address the socially constructed aspects of fatness and thinness This book however draws from and contributes to social constructionist perspectives The chapters in this volume offer several perspectives that can be used to understand the way society deals with fatness and thinness The contributors consider historical foundations medical models gendered dimensions institutional components and collective perspectives These different perspectives illustrate the multifaceted nature of obesity and eating disorders providing examples of how a variety of social groups construct weight as a social problem Indigenous Australian Youth Futures Kate Senior,Richard Chenhall,Victoria Burbank,2021-07-08 Adolescents are at a critical life stage where they will soon be able to contribute to the wellbeing of humankind or do it great harm Consequently it is vital that the challenges and possibilities of adolescence be well understood and addressed In Australia such understanding is urgently needed with respect to Aboriginal adolescents Not only must they adjust to their changing bodies and minds but they must

negotiate these changes within a context usually characterised by racism and poverty They must also do this within intercultural environments that include the disparate and sometimes incompatible beliefs and practices of their multicultural populations The chapters in this collection address these challenges to Aboriginal adolescents in the Northern Territory and the intercultural contexts in which they take place Their discussions include the adolescents experiences with health and health care education and the criminal justice system They also address their hopes dreams plans and politics engagement with social media food preferences and nutrition engagement with language family and changing mores affecting sexual behaviour and marriage The book aims to provide readers with a greater understanding of the day to day lives of Aboriginal adolescents and some of the adults who care for or neglect them It seeks to provide readers with a better understanding of the circumstances processes and factors that affect adolescent health wellbeing and future prospects in their intercultural environments and glimpse the multiplicity of these circumstances processes and factors and the complexity of their interaction

*The Psychology of Food Choice* Richard Shepherd, Monique Raats, 2006 One of the central problems in nutrition is the difficulty of getting people to change their dietary behaviours so as to bring about an improvement in health What is required is a clearer understanding of the motivations of consumers barriers to changing diets and how we might have an impact upon dietary behaviour This book brings together theory research and applications from psychology and behavioural sciences applied to dietary behaviour The authors are all international leaders in their respective fields and together give an overview of the current understanding of consumer food choice

*Food Nations* Warren Belasco, Philip Scranton, 2014-06-03 This original collection abandons culinary nostalgia and the cataloguing of regional cuisines to examine the role of food and food marketing in constructing culture consumer behavior and national identity
