Sociology On The Net 2001

Sociology On The Net 2001:

A History of Sociology in Britain A. H. Halsey, 2004-03-18 This is the first ever critical history of sociology in Britain written by one of the world's leading scholars in the field. Renowned British sociologist A. H. Halsey presents a vivid and authoritative picture of the neglect, expansion, fragmentation and explosion of the discipline during the past century. He is well equipped to write the story, having lived through most of it and having taught and researched in Britain, the USA and Europe. The story begins with L. T. Hobhouse's election to the first chair in sociology in London in 1907 but traces earlier origins of the discipline to Scotland and the English provinces. There is a lively account of the nineteenth century battles between literature and science for the possession of the third culture of social studies, setting the context for a narrative history of rapid expansion in the second half of the twentieth century. LSE had a virtual monopoly before World War II. The educational establishment of Oxford and Cambridge opposed its introduction into the undergraduate curriculum. Only the expansion of sociology to the Scottish, Welsh, provincial and new universities after the Robbins Report of 1963 brought reluctant acceptance of the subject to Oxford and Cambridge. The student troubles of 1968 are then described and the subsequent doubts, confrontations and cuts of the 1970s and 80s. Then paradoxically by a Conservative Government there was a new university expansion incorporating polytechnics and other colleges with a consequent doubling of both staff and students in the 1990s. Yet the end of the century left sociology riven by intellectual conflict. It had survived the Marxist subversions of the 70s and the feminist invasion. Yet the renewed challenges of various forms of relativism, especially ethnography, methodology and post modernism still threatened and at root the war was as it began between a scientific quantifying and explanatory subject and a literary interpretative set of cultural studies. **Social Network Analysis** Christina

Prell, 2011-10-26 We live in a world that is paradoxically both small and vast; each of us is embedded in local communities and yet we are only a few links away from anyone else in the world. This engaging book represents these interdependencies, positive and negative consequences, their multiple effects and the ways in which a local occurrence in one part of the world can directly affect the rest. Then it demonstrates precisely how these interactions and relationships form. This is a book for the social network novice learning how to study, think about and analyse social networks; the intermediate user not yet familiar with some of the newer developments in the field; and the teacher looking for a range of exercises as well as an up to date historical account of the field. It is divided into three clear sections: 1. historical, traditional and current analytical procedures and fundamental mathematical equations needed to get a foothold in the field. **The Handbook of**

Technology and Social Inclusion Mark Warschauer, 2004-09-17 Much of the discussion about new technologies and social equality has focused on the oversimplified notion of a digital divide Technology and Social Inclusion moves beyond the limited view of haves and have nots to analyze the different forms of access to information and communication technologies Drawing on theory from political science economics sociology psychology communications education and linguistics the book examines the ways in which differing access to technology contributes to social and economic stratification or inclusion The book takes a global perspective presenting case studies from developed and developing countries including Brazil China Egypt India and the United States A central premise is that in today's society the ability to access adapt and create knowledge using information and communication technologies is critical to social inclusion This focus on social inclusion shifts the discussion of the digital divide from gaps to be overcome by providing equipment to social development challenges to be addressed through the effective integration of technology into communities institutions and societies What is most important is not so much the physical availability of computers and the Internet but rather people's ability to make use of those technologies to engage in meaningful social practices
