**War and German Memory** K. Michael Prince, 2009-01-01 Germans often claim that we have learned the lessons of our history But what precisely are the lessons they have drawn from their Nazi era past What experiences from that time continue to hold significant meaning for Germans today and how have those experiences shaped postwar German cultural identity Though Germans have come to recognize the evils of Nazism for them its primary evil derived from the war it unleashed and the hardships death and destruction that the war wrought on the Germans themselves and less from the losses and suffering it caused others Recent public discussion about the Allied bombing campaign against Germany the expulsion of Germans from Eastern Europe and other German experiences during and following the Second World War have revealed what some see as an emerging tendency among Germans to perceive themselves as much the victims of wartime acts as other peoples Through a survey of postwar literature film and other popular media as well as public commemorations and other means of memorializing and discussing the past K Michael Prince demonstrates that the theme of German suffering has been an abiding and even overriding element of postwar German historical memory and a chief component of German cultural identity While academics have focused their attention on Nazism atrocity and genocide and while Germany's official ceremonies and other acts of public memory have been similarly directed it was the wartime sufferings of average Germans that have remained at the core of German historical consciousness influencing their attitudes toward war in general and shaping Germany's role in world affairs

Rousseau's Republican Romance Elizabeth Rose Wingrove, 2000-02-22 In Rousseau's Republican Romance Elizabeth Wingrove combines political theory and narrative analysis to argue that Rousseau's stories of sex and sexuality offer important insights into the paradoxes of democratic consent She suggests that despite Rousseau's own protestations man and citizen are not rival or contradictory ideals Instead they are deeply interdependent Her provocative reconfiguration of republicanism introduces the concept of consensual nonconsensuality a condition in which one wills the circumstances of one's own domination This apparently paradoxical possibility appears at the center of Rousseau's republican polity and his romantic dyad in both instances the expression and satisfaction of desire entail a twin experience of domination and submission Drawing on a wide variety of Rousseau's political and literary writings Wingrove shows how consensual nonconsensuality organizes his representations of desire and identity She demonstrates the inseparability of republicanism and accounts of heterosexuality in an analysis that emphasizes the sentimental and somatic aspects of citizenship In Rousseau's texts a politics of consent coincides with a performative politics of desire and of emotion Wingrove concludes that understanding his strategies of democratic governance requires attending to his strategies of symbolization Further she suggests that any understanding of political practice requires attending to bodily practices

Sadat and After Raymond William Baker, 1990 Most analyses of Egyptian politics present the limitations and failures of official political life as the complete story of politics in Egypt Raymond Baker's direct observation of Egyptian politics has convinced him that alternative political groups have sustained themselves and carved out spaces for promising political action despite official efforts at containment In this compelling study Baker recreates the public worlds of eight groups on the periphery of Egyptian politics They range in their political stances from Communists to the Muslim Brothers and include shifting clusters

of critical intellectuals who gather around influential journals or in research centers as well as the quiescent aestheticists of the Wissa Wassef community Taken together the experiences of Egyptians in alternative groups reveal that Egyptians are more than the objects of diverse external pressures and more than the sufferers from multiple internal problems They are also creative political actors who have stories to tell about the human potential to struggle for humane values and goals in the modern world In examining Egypt from the margins rather than from the center Baker proposes a new direction for Third World political studies He suggests a way out of the impasse in the current development literature which is fixed on a scientific study of causes and determinants by focusing on actual political struggles and alternative political visions

**Decolonial Aesthetics of Blackness in Contemporary Art** Nkosinkulu, Zingisa, 2024-09-13 Decolonial aesthetics of Blackness in contemporary art challenge and redefine traditional narratives offering a profound critique of historical and ongoing injustices. This approach emphasizes the reclamation and celebration of Black cultural identities through innovative artistic expressions that resist colonialist frameworks and oppressive stereotypes. By emphasizing the experiences and perspectives of Black artists, decolonial aesthetics challenge the power structures presented in art history and highlight the significance of autonomy, representation, and authenticity.
