Process Improvement in Quality Management Systems Walter R. McCollum,2004 Foreword After more than two decades since the advent of Total Quality

Management one might think there was nothing left to say regarding its application but Walter Ray McCollum shows that one would be wrong Process Improvement in Quality Management Systems Case Study of Carnegie Mellon s Capability Maturity Model CMM explores how a company can obtain Level 3 compliance where an organization s processes for management and engineering activities are formally defined documented and integrated into a standard process that is understood and followed by the organization s staff in the development and maintenance of software Once an organization has reached this level it has a foundation for continuing progress New processes and tools can be added with minimal disruption and new staff members can be easily trained to adapt to the organization s practices Numerous case studies have been enacted across industries to describe successful and unsuccessful implementation of quality management systems and programs Several generic frameworks for quality management implementation have been proposed to help organizations achieve quality productivity and gain a competitive edge However few attempts have been made to synthesize frameworks for measuring quality management practices especially with regard to managing software quality Phan 2001 found the best known work concerned with process improvement was the Software Engineering Institute Capability Maturity Model CMM However very few studies have examined the effects of process improvement on quality management systems and no studies have addressed the variables that impact the effective use of SW CMM McCollum mitigates these gaps to offer software development professionals and developers of quality management systems the information they need to enhance their effective use of SW CMM This book empowers projects teams and organizations by giving them the foundation to support reasoned choice and identify findings relative to the effects of process improvement in quality management systems using SW CMM process focus and risk management training Marilyn K Simon Ph D President Math Power *Software Process Improvement* Rory O'Connor, Nathan Baddoo, Kari Smolander, Richard Messnarz, 2008-09-08 This textbook is intended for use by SPI Software Process Improvement managers and researchers quality managers and experienced project and research managers The papers constitute the research proceedings of the 15th EuroSPI European Software Process Improvement www.eurospi.net conference in Dublin Ireland 3-5 September 2008 Since the first conference held in Dublin in 1994 EuroSPI conferences have been held in 1995 in Vienna Austria in 1997 in Budapest Hungary in 1998 in Gothenburg Sweden in 1999 in Pori Finland in 2000 in Copenhagen Denmark in 2001 in Limerick Ireland in 2002 in Nuremberg Germany in 2003 in Graz Austria in 2004 in Trondheim Norway in 2005 in Budapest Hungary in 2006 in Joensuu Finland and in 2007 in Potsdam Germany EuroSPI has established an experience library library eurospi.net which will be continuously extended over the next few years and was made available to all attendees EuroSPI has also started an umbrella initiative for establishing a European Qualification Network in which different SPINs and national ventures can join mutually beneficial collaborations EQN EU Leonardo da Vinci network project With a general assembly on 15-16-10-2007 through EuroSPI partners and networks in collaboration with the European Union supported by the EU Leonardo da Vinci Programme a European certification
