in central London each with a key theme such as Competition between the church crown and city for control Changing fortunes of particular districts Radical reform between 1840 and 1880 Individual creativity and entrepreneurship Hospitals unavoidable choice between merger or migration Transformation of health care trades into professions Development of primary care The book takes as much interest in one of the six ambulance stations build in 1915 by the London County Council as it does in the grandest teaching hospital Although some important buildings have been destroyed and others are threatened many remain The walks aim to help preserve our legacy as increasingly former health care buildings are converted into hotels offices homes and shops Awareness of their original functions is in danger of being lost The book also aims to increase our understanding of the current challenges we face in trying to improve health care For there are many lessons to be learnt from the past Packed full of curious and surprising facts about medicine and beautifully illustrated with maps photographs and images this is the perfect guide book for anyone with a passion for urban walks the history of London and of course medicine
