Critiques of Knowing Lynette Hunter,2002 *Situated Textualities* Lynette Hunter,1999 **Critiques of Knowing**

Lynette Hunter,2002-03-11 Critiques of Knowing explores what happens to science and computing when we think of them as texts Lynette Hunter elegantly weaves together vast areas of thought rhetoric politics AI computing feminism science studies aesthetics and epistemology Critiques of Knowing shows us that what we need is a radical shake up of approaches to the arts if the critiques of science and computing are to come to any fruition *Stereotypes and Violence* Oliver Betts,Andrew Fuyarchuk,Biba Hadziavdic,Hilde Hoffmann,Barbara Manthe,Benjamin Nickl,Bojan Perovic,Sylvia Sadzinski,Victoria Shmidt,2017-04-20 Stereotypes are dangerous especially when they are used by demagogues Slogans which remind the historian of darker times in human history however reappear again in a growing number As companions of the rise of right wing forces in Europe they make up ground in more and more regions and gain momentum in the political debate It consequently seems to be more than important to focus on and closer analyze the interrelationship between stereo types and violence in modern societies The fourth volume of Global Humanities tries to achieve such a broader analysis and provides reading in the fields of history political science gender and media studies The authors show and emphasize in which ways the two above named factors are interacting with each other and influencing the popular opinion in modern nation states Topics that are covered include Anti Italian riots in Zurich at the end of the 19th century a discussion of the interrelationship of racism and violence in Germany since the 1980s and an analysis of gender based violence in Serbia In addition the persistence of stereo types in entertainment is closely studied by taking a look on Sinti and Roma depictions in current European films Sentient Performativities of Embodiment Lynette Hunter,Elisabeth Krimmer,Peter Lichtenfels,2016-05-05 This collection offers writings on the body with a focus on performance defined as both staged performance and everyday performance Traditionally theorizations of the body have either analyzed its impact on its socio historical environment or treated the body as a self enclosed semiotic and affective system This collection makes a conscious effort to merge these two approaches It is interested in interactions between bodies and other bodies bodies and environments and bodies and objects

This book discusses affective practices in performance through the study of four contemporary performers Keith Hennessy Ilya No Caro Novella and duskin drum to suggest a tentative rhetoric of performativity generating political affect and permeating attempts at social justice that are often alterior to discourse The first part of the book makes a case for the political work done alongside discourse by performers practising with materials that are not known in ways that are directly relevant to people carrying out their daily lives In the second part of the book four case study chapters circle around figures of irresolvable paradox hendiadys enthymeme anecdote allegory that gesture to what is not known to study strategies for processes of becoming knowing and valuing These figures also shape some elements of these performances that make up a suggested rhetorical stance for performativity

The Rhetorics of Feminism Lynne Pearce,2013-04-15 Is it possible that changes in rhetorical practice could alter not just how thought is expressed but also how it is made Through a close stylistic and rhetorical analysis of contemporary feminist writing from the cultural theory of Judith Butler to the popular journalism of Naomi Wolf and Germaine Greer Lynne Pearce demonstrates how feminist thought is created as well as communicated through the frameworks in which it is presented By linking rhetorical innovation with feminist epistemology in such a direct way this is a book that will be of immense methodological as well as theoretical interest to readers providing valuable insight into the often mysterious processes of conception and composition

Cultural Studies ,2016-09-12 This volume claims that interdisciplinarity and translation constitute the two main challenges for cultural studies today These conceptual issues inter and trans express themselves within specific historical and cultural contexts Interdisciplinarity is linked with the ongoing process of the institutionalisation of cultural studies in national academies but also increasingly internationally comparatively and to a certain extent even globally cf cultural

studies of global culture Translation concerns cultural studies both as an object or product and as a subject or producer of translation processes Cultural studies is the result of translation translates and is being translated The essays in this volume therefore relate these various ongoing cultural linguistic and institutional translation processes to political and ethical issues of internationalisation and globalisation The contributions draw their originality and strength from strategically crossing disciplinary and national boundaries They deliberately ignore the question of what may be proper to cultural studies and instead problematise the notions of propriety and belonging As a reading practice cultural studies in these pages is performed through adaptations and combinations of theory and critical practice The volume should be of interest to everyone concerned with cultural studies role in promoting intellectual debate within an increasingly international and globalised public sphere
