**The Military Revolution in Sixteenth-century Europe** David Eltis, 1995 This ground breaking study represents a new twist in the already complicated debate on military change in the early modern period Previous writers have for the most part defined a military revolution focused on the seventeenth or even early eighteenth centuries Eltis suggests that key developments in training organization tactics and siege warfare occurred in the sixteenth century and taken together these innovations constitute a military revolution changing the face of war In England these changes came later than in the rest of Europe and in Ireland later still English writers in their anxiety to spur their countrymen to adopt the new methods produced some of the most useful manuals of sixteenth century Europe These together with Italian Spanish French and German texts form the main basis of David Eltis's study allowing the ideas of contemporaries to be set alongside accounts of actual military conditions in explaining one of the turning points of world military development
