Slanted News:

Revealing Media Bias in News Articles Felix Hamborg, 2023-02-24 This open access book presents an interdisciplinary approach to reveal biases in English news articles reporting on a given political event. The approach named person oriented framing analysis identifies the coverage's different perspectives on the event by assessing how articles portray the persons involved in the event. In contrast to prior automated approaches, the identified frames are more meaningful and substantially present in person oriented news coverage. The book is structured in seven chapters. Chapter 1 presents a few of the severe problems caused by slanted news coverage and identifies the research gap that motivated the research described in this thesis. Chapter 2 discusses manual analysis concepts and exemplary studies from the social sciences and automated approaches mostly from computer science and computational linguistics to analyze and reveal media bias. This way it identifies the strengths and weaknesses of current approaches for identifying and revealing media bias. Chapter 3 discusses the solution design space to address the identified research gap and introduces person oriented framing analysis (PFA), a new approach to identify substantial frames and to reveal slanted news coverage. Chapters 4 and 5 detail target concept analysis and frame identification, the first and second component of PFA. Chapter 5 also introduces the first large scale dataset and a novel model for target dependent sentiment classification (TSC) in the news domain. Eventually, Chapter 6 introduces Newsalyze, a prototype system to reveal biases to non expert news consumers by using the PFA approach. In the end, Chapter 7 summarizes the thesis and discusses the strengths and weaknesses of the thesis to derive ideas for future research on media bias. This book mainly targets researchers and graduate students from computer science, computational linguistics, political science, and further social sciences who want to get an overview of the relevant state of the art in the other related disciplines and understand and tackle the issue of bias from a more effective interdisciplinary viewpoint. News Grazers Richard Forgette, 2018-01-12 How has growing media choice transformed the way we gather news? *News Grazers: Media Politics and Trust in an Information Age* offers students an integration of the emerging effects that cable news, online news, and social media have had on American politics. Author Richard Forgette, an expert on the U.S. Congress and public policy, draws on direct experimental research to argue that the diffusion of media outlets and media technologies has resulted in an increasingly fragmented and distracted news audience. This unprecedented level of media choice is not only altering who accesses the news and how they do it, more important, it is changing the news itself. With chapters on commentary, news, partisan news, breaking news, and fake news, *News Grazers* gives students the tools they need to critically analyze the ever shifting media landscape. Special attention is also paid to the effects of the media and political trust on the 2016 election.

News on the Internet David Tewksbury, Jason Rittenberg, 2012-04-19 *News on the Internet* synthesizes research on developing and current patterns of online news provision with the literature on traditional offline media to create a conceptual map for understanding the way that public affairs and news are presented and consumed on the internet. *The*

Rationalist Bias in Communication Theory Shedletsky, Leonard, 2021-06-04 While communication theory has not recognized the implications of the social intuitionist model psychologists have gathered an impressive body of evidence to support the theory In social cognition research there was the idea that human inferential processes are conscious rational logical and accurate and this belief continues somewhat in the behavioral sciences although there is evidence that it is incorrect A fresh examination is needed on just how these inferences by the receiver and the implications by the sender carried out at high speed impact our understanding of the communication process Simply put until now the default case in communication theory is the belief that we consciously reason and then we act However that may not be entirely true Rationalist Bias in Communication Theory applies social intuition theory to human communication This book explores how research has missed accounting for a critical fact about human communication in the theories of communication namely that we as humans can respond to one another and to all kinds of stimuli faster than we can deliberate By applying intuitive cognition to communication a new light can be shed on the communication process which is what the chapters prove and discuss This book is valuable for social scientists practitioners researchers academicians and students interested in new theories in communication theory

Post-Truth, Fake News and Democracy Johan Farkas, Jannick Schou, 2019-08-23 Western societies are under siege as fake news post truth and alternative facts are undermining the very core of democracy This dystopian narrative is currently circulated by intellectuals journalists and policy makers worldwide In this book Johan Farkas and Jannick Schou deliver a comprehensive study of post truth discourses They critically map the normative ideas contained in these and present a forceful call for deepening democracy The dominant narrative of our time is that democracy is in a state of emergency caused by social media changes to journalism and misinformed masses This crisis needs to be resolved by reinstating truth at the

heart of democracy even if this means curtailing civic participation and popular sovereignty Engaging with critical political philosophy Farkas and Schou argue that these solutions neglect the fact that democracy has never been about truth alone it is equally about the voice of the democratic people Post Truth Fake News and Democracy delivers a sobering diagnosis of our times It maps contemporary discourses on truth and democracy foregrounds their normative foundations and connects these to historical changes within liberal democracies The book will be of interest to students and scholars studying the current state and future of democracy as well as to a politically informed readership *Political Communication* Carsten Reinemann, 2014-07-28 Against the background of an enormous expansion and diversification of both political communication itself and scientific research into its structures processes and effects this volume gives an overview of some of the key theories and findings accumulated by political communication research over the last decades In order to do so the volume provides readers with review articles by renowned international authors on various aspects of I the normative regulatory and conceptual foundations of political communication II different situations of political communication e g elections referendums social movements media hypes crisis and war III the activities of and part played by political actors IV mass media and journalism V characteristics and typical features of media messages VI the role played by citizens as well as VII various kinds of effects on citizens Each section includes several chapters that address specific issues and research problems in the form of comprehensive overviews articles

Democracy without Citizens Robert M. Entman, 1990-09-27 The free press cannot be free Robert Entman asserts Inevitably it is dependent In this penetrating critique of American journalism and the political process Entman identifies a vicious circle of interdependence as the key dilemma facing reporters and editors To become sophisticated citizens he argues Americans need high quality independent political journalism yet to stay in business while producing such journalism news organizations would need an audience of sophisticated citizens As Entman shows there is no easy way out of this dilemma which has encouraged the decay of democratic citizenship as well as the media's continuing failure to live up to their own highest ideals Addressing widespread despair over the degeneration of presidential campaigns Entman argues that the media system virtually compels politicians to practice demagoguery Entman confronts a provocative array of issues how the media's reliance on elite groups and individuals for information inevitably slants the news despite adherence to objectivity standards why the media hold government accountable for its worst errors such as scandals and foreign misadventures only after it's too late to prevent them how the interdependence of the media and their audience molds public opinion in ways neither group alone can control why greater media competition does not necessarily mean better journalism why the abolition of the FCC's Fairness Doctrine could make things worse Entman sheds fascinating light on important news events of the past decade He compares for example coverage of the failed hostage rescue in 1980 which subjected President Carter to a barrage of criticism with coverage of the 1983 bombing that killed 241 Marines in Lebanon

an incident in which President Reagan largely escaped blame He shows how various factors unrelated to the reality of the events themselves the apparent popularity of Reagan and unpopularity of Carter differences in the way the Presidents publicly framed the incidents the potent symbols skillfully manipulated by Reagan s but not by Carter s news managers produced two very different kinds of reportage Entman concludes with some thoughtful suggestions for improvement Chiefly he proposes the creation of subsidized party based news outlets as a way of promoting new modes of news gathering and analysis of spurring the established media to more innovative coverage and of increasing political awareness and participation Such suggestions along with the author s probing media criticisms make this book essential reading for anyone concerned about the state of democracy in America
