The Symphonic Repertoire, Volume IV A. Peter Brown, 2024-03-29 Central to the repertoire of Western art music since the 18th century the symphony has come to be regarded as one of the ultimate compositional challenges Surprisingly heretofore there has been no truly extensive broad based treatment of the genre and the best of the existing studies are now several decades old In this five volume series A Peter Brown explores the symphony from its 18th century beginnings to the end of the 20th century Synthesizing the enormous scholarly literature Brown presents up to date overviews of the status of research discusses any important former or remaining problems of attribution illuminates the style of specific works and their contexts and samples early writings on their reception The *Symphonic Repertoire* provides an unmatched compendium of knowledge for the student teacher performer and sophisticated amateur The series is being launched with two volumes on the Viennese symphony Volume IV The Second Golden Age of the Viennese Symphony Brahms Bruckner Dvor k Mahler and Selected Contemporaries Although during the mid 19th century the geographic center of the symphony in the Germanic territories moved west and north from Vienna to Leipzig during the last third of the century it returned to the old Austrian lands with the works of Brahms Bruckner Dvor k and Mahler After nearly a half century in hibernation the sleeping Viennese giant awoke to what some viewed as a reincarnation of Beethoven with the first hearing of Brahms's Symphony No 1 which was premiered at Vienna in December 1876 Even though Bruckner had composed some gigantic symphonies prior to Brahms's first contribution their full impact was not felt until the composer's

complete texts became available after World War II Although Dvořák was often viewed as a nationalist composer in his symphonic writing his primary influences were Beethoven Schubert and Brahms For both Bruckner and Mahler the symphony constituted the heart of their output for Brahms and Dvořák it occupied a less central place Yet for all of them the key figure of the past remained Beethoven The symphonies of these four composers together with the works of Goldmark Zemlinsky Schoenberg Berg Smetana Fibich Janáček and others are treated in Volume IV The Second Golden Age of the Viennese Symphony covering the period from roughly 1860 to 1930

Sharpe, 2015-01-30 This lively and lucid introduction to the philosophy of music concentrates on the issues that illuminate musical listening and practice It examines the conceptual debates relevant to the understanding and performing of music and grounds the philosophy to practical matters throughout Ideal for a beginning readership with little philosophical background the author provides an overview of the central debates enlivened by a real sense of enthusiasm for the subject and why it matters The book begins by filling in the historical background and offers readers a succinct summary of philosophical thinking on music from the Ancient Greeks to Eduard Hanslick and Edmund Gurney Chapter 2 explores two central questions what is it that makes music or to be precise some pieces of music works of art And what is the work of music per se Is it just what we hear the performance or is it something over and above that something we invent or discover Chapter 3 discusses a problem peculiar to music and one at the heart of philosophical discussion of it can music have a meaning And if so what can it be Chapter 4 considers whether music can have value Are there features about music that make it good features which can be specified in criteria Is a work good if and only

if it meets with the approval of an ideally qualified listener How do we explain differences of opinion Indeed why do we need to make judgements of the relative value of pieces of music at all This engaging and stimulating book will be of interest to students of aesthetics musical practitioners and the general reader looking for a non technical treatment of the subject
