**Many Wests** David M. Wrobel, Michael C. Steiner, 1997 What does it mean to live in the West today Do people tend to identify with states with regions or with the larger West This book examines the development of regional identity in the American West demonstrating that it is a regionally diverse entity made up of many different wests Great Plains Southwest Rocky Mountains and more in which American regionalism finds its fullest expression These fourteen original essays tell how a sense of place emerged among residents of various regions and how a sense of those places was developed by people outside of them Wrobel and Steiner first offer a compelling overview of the West's regional nature then thirteen other rising or renowned scholars from history American Studies geography and literature tell how regional consciousness formed among inhabitants of particular regions All of the essays address the larger issue of the centrality of place in determining social and cultural forms and individual and collective identities Some focus on race and culture as the primary influences on regional consciousness while others emphasize environmental and economic factors or the influence of literature Some even examine western regionalism in areas that lie beyond the West as it has traditionally been conceived Each of the contributors believes that where a people live helps determine what they are and they write not only about the many wests within the larger West but also about the constant state of flux in which regionalism exists Many books speak of the West as a place but few others deal with the West's different places Many Wests presents a vision of the West that reflects both the common heritage and unique character of each major subregion building on the revisionist impulse of the last decade to help redirect New Western History toward an appreciation of regional diversity and integrate scholarship in the regional subfields It is a book for everyone who lives in studies or loves the West for it confirms that it is home to very different peoples economies histories and regions *Northwest Lands, Northwest Peoples* Dale D. Goble, Paul W. Hirt, 2012-03-15 It can be said that all of human history is environmental history for all human action happens in an environment in a place This collection of essays explores the environmental history of the Pacific Northwest of North America addressing questions of how humans have adapted to the northwestern landscape and modified it over time and how the changing landscape in turn affected human society economy laws and values Northwest Lands and Peoples includes essays by historians anthropologists ecologists a botanist geographers biologists law professors and a journalist It addresses a wide variety of topics indicative of current scholarship in the rapidly growing field of environmental history *Snake*, 1995 **Irrigated Eden** Mark Fiege, 2009-11-23 Irrigation came to the arid West in a wave of optimism about the power of water to make the desert bloom Mark Fiege's fascinating and innovative study of irrigation in southern Idaho's Snake River valley describes a complex interplay of human and natural systems Using vast quantities of labor irrigators built dams excavated canals laid out farms and brought millions of acres into cultivation But at each step nature rebounded and compromised the intended agricultural order The result was a new and richly textured landscape made of layer upon layer of technology and intractable natural forces one that engineers and

farmers did not control with the precision they had anticipated Irrigated Eden vividly portrays how human actions inadvertently helped to create a strange and sometimes baffling ecology Winner of the Idaho Library Association Book Award 1999 Winner of the Charles A Weyerhaeuser Award Forest History Society 1999 2000 **Idaho Yesterdays** ,2000

*The People's Home Journal* ,1922 **Public Works Appropriations for 1960** United States. Congress. House Appropriations,1959 **Pathfinders of the Great Plains** Lawrence Johnstone Burpee,1915 **Encyclopedia of the Great Plains Indians** David J. Wishart,2007-03-01 Until the last two centuries the human landscapes of the Great Plains were shaped solely by Native Americans and since then the region has continued to be defined by the enduring presence of its Indigenous peoples The Encyclopedia of the Great Plains Indians offers a sweeping overview across time and space of this story in 123 entries drawn from the acclaimed Encyclopedia of the Great Plains together with 23 new entries focusing on contemporary Plains Indians and many new photographs Here are the peoples places processes and events that have shaped lives of the Indians of the Great Plains from the beginnings of human

habitation to the present not only yesterday's wars, treaties and traditions but also today's tribal colleges, casinos and legal battles. In addition to entries on familiar names from the past like Sitting Bull and Crazy Horse, new entries on contemporary figures such as American Indian Movement spiritual leader Leonard Crow Dog and activists Russell Means and Leonard Peltier are included in the volume. Influential writer Vine Deloria Sr, Crow medicine woman Pretty Shield, Nakota blues rock band Indigenous and the Nebraska Indians baseball team are also among the entries in this comprehensive account. Anyone wanting to know about Plains Indians past and present will find this an authoritative and fascinating source.

Country, Native Title and Ecology Jessica K. Weir, 2012-03-01. Country, native title and ecology all converge in this volume to describe the dynamic intercultural context of land and water management on Indigenous lands. Indigenous people's relationships with country are discussed from various speaking positions including identity and knowledge, the homelands debate, water planning, climate change and market environmentalism. The interdisciplinary chapters range from an ethnographic description of living waters in the Great Sandy Desert, negotiating the eradication of yellow crazy ants in Arnhem Land, and legal analysis of native title rights in emerging carbon markets. A recurrent theme is the contentions over meaning, knowledge and authority. Because this volume is scholarly, original and very timely, it represents a key resource and reference work for land and sea managers, policy makers, scholars of the interface between post-native title responsibilities, NRM objectives and appropriate heritage protocols, and students based in the social sciences, natural sciences and humanities. It is rare for volumes to have this much cross-academy purchase, and for this reason alone, it will have ongoing worth and value as a seminal collection.
