FutureShop Daniel Nissanoﬀ, 2007-06-26 FutureShop is a book about change. In particular it's about how our consumer culture is rapidly evolving to allow us to live better, richer lives for less. The catalyst to this change is eBay and similar sites that are quickly growing into mainstream shopping venues and creating unprecedented levels of liquidity for our everyday goods. The wave of the future will be temporary ownership: consumers will be able to buy what they really want because they'll be able to easily sell it when they are ready to upgrade to the next item on their wish list. Veteran Web entrepreneur Daniel Nissanoﬀ's invaluable heads-up explores why this change is taking place and discusses what consumers and businesses can do in order to benefit from this new paradigm. *The Delineator* R. S. O'Loughlin, H. F. Montgomery, Charles Dwyer, 1927

DigiMarketing Kent Wertime, Ian Fenwick, 2011-12-19 We are all DigiMarketers now or we should be. The authors have for the first time provided a lucid, hype-free, business-based and practical guide to the new age of marketing. It is a kind of digital Baedeker which should be on every businessman's bookshelf. Miles Young, Chairman Ogilvy Mather Asia Pacific. The digital frontier is now the center of our universe. As Kent Wertime and Ian Fenwick show, marketers must seize this digital opportunity to accelerate their market growth. John A. Quelch, Senior Associate Dean and Lincoln Filene Professor of Business Administration, Harvard Business School. Too many advertisers are stuck in the primordial soup when it comes to their digital marketing strategy. However, they need to evolve fast if they are to survive in a multi-channel landscape. This timely book acts like an *Origin of the Species*, steering hesitant brand owners through the complexities of the digital ecosystem. An impressive blend of academic theory, professional insight and practical advice. Paul Kemp, Robertson Co. founder, Editorial Director, Contagious. www.contagiousmagazine.com. DigiMarketing: The Essential Guide to New Marketing. Digital Media is a clear call for companies to evolve their marketing practice. This book is essential reading for anyone seeking a roadmap to the future of business. Dipak C. Jain, Dean, Kellogg School of Management. The rise of conversational media, new forms of distribution from blogs to mobile platforms, challenge traditional approaches to marketing and require every business to have a transition plan. Kent Wertime and Ian Fenwick have written a book that is required reading for any marketers interested in successfully making that transition. John Battelle, CEO and Founder, Federated Media Publishing and Author, *The Search*. Kent Wertime and Ian Fenwick have written the definitive guide to marketing in the digital age. But DigiMarketing does more than educate marketing professionals. It describes the new media landscape brilliantly, making it an essential read for anyone who hopes to understand the most important technological revolution of the past fifty years. I wore out three yellow highlighters before realizing that every sentence and every paragraph is worth committing to memory. Norman Pearlstine, Former Editor in Chief, Time Inc. and Managing Editor, *The Wall Street Journal*. Senior Advisor, Telecommunications Media, The Carlyle Group.

Hothead Stephen Cushman, 2018-04-04 *Hothead* is a haibun patterned book-length declamation in which no topic is off-limits: Buddha, Jesus, Lincoln, America, global warming, eros, mental illness, the natural world, technology, the aging body.

Cushman's poetry shows us how to live in a world in which it is difficult to balance the place where light and dark meet. With an outmoded laptop named Patience as his daily consort, the speaker navigates through themes of love, politics, and belief. There's got to be someone, Cushman writes, exploring the way, and the speaker of *Hothead* steps in to fill those shoes with intelligence, endurance, moxie, and humility.

Powered by Plants Clive Gifford, 2022-08-02 Following on from the incredible *Invented by Animals* and *Built by Animals*, *Powered by Plants* introduces us to the wondrous plants whose ingenious features have inspired innovations in human technology. Plants exhibit an incredible range of diversity in their shape, structures, and how they interact with other living things and their environment. Some of this great diversity is being increasingly studied and copied, inspiring innovation in science, design, engineering, and technology. This book guides readers through a startling collection of fascinating vegetation, from towering cottonwood trees with wind power potential to slippery meat-eating assassins of the plant world and the fast-growing aquatic plant which helps propel ships farther using less energy. Learn surprising applications and spin-offs of both exotic species, including the world's largest flower that generates its own heat, and more familiar plants such as bamboo, coconut, and maize, all depicted in colourful, engaging fashion. Colourful and lively illustrations and pop-out fact boxes bring the science in this book to life, and *Powered by Plants* shows us how much we can learn from studying the myriad magnificence of the natural world. Other fascinating books in this series are *Built by Animals* and *Invented by Animals*.

Disability, Duplicity and the Formative Cultural Identity Politics of Generation X David Bolt, 2023-09-21 Disability is history and futurity; culture and society practice and theory; work and play; an immense desire for life by which body and mind are dragged, kicking and screaming, into each and every new day. Using autocritical discourse analysis, a new hybrid research method that combines aspects of the established methods of critical discourse analysis (CDA) and autoethnography, this book explores the formative cultural identity politics of disability via cultural stations of UK popular culture. These cultural stations include action figures, children's books, television miniseries, comics, comedy films, teenage drama, and sitcoms; the punk rock movement and alternative comedy. Although the cultural stations range from toys and comics to aggressive music and chaotic sitcoms, all are considered with a focus on the language and tropes of disability. Indeed, most of the works are not remembered as portrayals of disability, but the book's analysis reveals, flash if not fleeting representations that when centralised, clarify patterns of duplicity. Via the language of power and the power of language, all these texts are found to have contributed to the formative cultural identity politics of disability. It will be of interest to all scholars and students of disability studies, sociology, toy studies, comic studies, humour studies, television studies, popular music studies, gender studies, literary studies, and cultural studies.
