American Rehabilitation, 1986

Sexual Orientation and Gender Expression in Social Work Practice Deana F. Morrow, Lori Messinger, 2006-04-02 Al

Jazeera and other satellite television stations have transformed Arab politics over the last decade. By shattering state control over information and giving a platform to long stifled voices, these new Arab media have challenged the status quo by encouraging open debate about Iraq, Palestine, Islamism, Arab identity, and other vital political and social issues. These public arguments have redefined what it means to be Arab and reshaped the realm of political possibility. As Marc Lynch shows, the days of monolithic Arab opinion are over. How Arab governments and the United States engage this newly confident and influential public sphere will profoundly shape the future of the Arab world. Marc Lynch draws on interviews conducted in the Middle East and analyses of Arab satellite television programs, op-ed pages, and public opinion polls to examine the nature, evolution, and influence of the new Arab public sphere. Lynch, who pays close attention to what is actually being said and talked about in the Arab world, takes the contentious issue of Iraq, which has divided Arabs like no other issue, to show how the media revolutionized the formation and expression of public opinion. He presents detailed discussions of Arab arguments about sanctions and the 2003 British and American invasion and occupation of Iraq. While Arabs strongly disagreed about Saddam's regime, they increasingly saw the effects of sanctions as a potent symbol of the suffering of all Arabs. Anger and despair over these sanctions shaped Arab views of America, their governments, and themselves. Lynch also suggests how the United States can develop and improve its engagement with the Arab public sphere. He argues that the United States should move beyond treating the Arab public sphere as either an enemy to be defeated or an object to be manipulated via public relations. Instead of wasting vast sums of money on a satellite television station nobody watches, the United States should enter the public sphere as it really exists.

Policy Analysis and Research Technology Thomas M. Meenaghan, Keith Michael Kilty, 1994. This book examines policy analysis and research technology within the framework of the context and purposes of research. The authors analyze the relations between intervention, inquiry, and the larger social-political context. Stressing values and ethics, curriculum integration, and emphasis on groups at risk, they present an analysis of social-political, cultural, and economic issues that transcends research methodology.
