Social Conflict And Environmental Law:

Social Conflict and Environmental Law Allan Greenbaum,Alex Wellington,Ellen Baar,1995 Social Conflict and Environmental Law Allan Jacob Greenbaum,Alex Wellington,Ellen Baar,1995 *Environmental Crime and Social Conflict* Professor Nigel South,Professor Rob White,Professor Avi Brisman,2015-03-28 This collection of original essays stimulates new understandings of the relationships between humans and nature through critical evaluation of environmental destruction and degradation associated with social conflicts occurring around the world The chapters are largely informed by green criminology perspectives and provide a systematic and comprehensive introduction to a topic that to date has received little attention within criminology **Social Conflicts and Collective Identities** Patrick G. Coy,Lynne M. Woehrle,2000 Despite the ubiquity of conflict gaps remain in our knowledge of what influences its escalation and resolution How collective identity formation impacts social conflicts is taken up in this text ranging from church and community disputes to international trade disputes and wars **Natural Resources and Social Conflict** M. Schnurr,L. Swatuk,2012-03-02 This volume brings together international scholars reflecting on the theory and practice of international security human security natural resources and environmental change It contributes by centring the margins and privileging alternative conceptions and understandings of environmental in security **Development of Environment Laws in India** Kanchi Kohli,Manju Menon,2022-02-03 Presents dynamic interactions between the judiciary executive and parliamentary structures in shaping environment law in neoliberal India Environmental Law in India Ram Babu Singh,Suresh Misra,1996 Papers presented at the National Symposium on Environmental Ethics held at New Delhi during 1 3 March 1992 **Social Conflict and Environmental Law** Allan Jacob Greenbaum,Alex Wellington,Ellen Baar,1994 *Forging a Socio-Legal Approach to Environmental Harms* Tiffany Bergin,Emanuela Orlando,2017-06-14 Environmental harms exert a significant toll and pose substantial economic costs on societies around the world Although such harms have been studied from both legal and social science perspectives these disciplinary specific approaches are not on their own fully able to address the complexity of these environmental challenges Many legal approaches for example are limited by their inattention to the motivations behind environmental offences whereas many social science approaches are hindered by an insufficient grounding in current legislative frameworks This edited collection constitutes a pioneering attempt to overcome these limitations by uniting legal and social science perspectives Together the book s contributors forge an innovative socio legal approach to more effectively respond to and to prevent environmental harms around the world Integrating theoretical and empirical work the book presents carefully selected illustrations of how legal and social science scholarship can be brought together to improve policies The various chapters examine how a socio legal approach can ultimately lead to a more comprehensive understanding of environmental harms as well as to innovative and effective responses to such environmental offences **Environmental Crime in Transnational Context** Toine Spapens,Rob White,Wim Huisman,2016-06-10 Environmental

crime is one of the most profitable and fastest growing areas of international criminal activity. The increasing cross border scope of environmental crimes and harms is one of the reasons why governments and the enforcement community have trouble in finding the proper responses. Law enforcement cooperation between western industrialized states is often time consuming and problematic and the problems increase exponentially when environmental criminals take advantage of situations where government and law enforcement are weak. This book provides an overview of the developments and problems in the field of transnational environmental crimes and harms addressing these issues from perspectives such as enforcement, deterrence, compliance and emission trading schemes. Divided into four parts, the authors consider global issues in green criminology, responses to transnational environmental crimes and harms, alternative methods to combat environmental crime and specific types of crimes and criminological research. Discussing these topics from the view of green criminology, sociology and governance, this book will be of great interest to all those concerned about the transnational dimensions of crime and the environment.

Armed Conflict and Environmental Damage Dr. U C Jha, 2014-08-01. Armed conflict and military activities have serious adverse impacts on the environment. Modern weaponry, troop movements, landmines, hazardous military waste and the destruction of forests for military use are a few sources of harm to the environment both during armed conflict and peacetime military activities. Ecological assaults in combat areas are often kept a secret by the government, resulting in even greater humanitarian and environmental harm. Environmental degradation is increasingly being recognized as one of the most significant challenges of the 21st century and its effects are being felt worldwide. Both domestic and international legislations have been inadequate in mitigating the impact of military activities. This book provides details of the environmental destruction wreaked during international and non international armed conflicts and argues that the existing legal regime for the protection of the environment during armed conflict requires substantial modification. It puts forward the view that though it is inconceivable to impose an absolute ban on environmental damage during military operations, strengthening and clarifying the existing laws protecting the environment in times of conflict and enforcing environment friendly practices among military forces could go a long way in protecting natural assets of our earth.

Environmental Protection and Transitions from Conflict to Peace Carsten Stahn, Jens Iverson, Jennifer S. Easterday, 2017-10-13. This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Environmental protection is fundamental for the establishment of sustainable peace. Applying traditional legal approaches to protection raises particular challenges during the transition from conflict to peace. In the *jus post bellum* context, protection of the environment and natural resources needs to be considered in tandem with a broad range of simultaneously applicable normative frameworks such as human rights, transitional justice, arms control, disarmament, UN law and practice, development and domestic law. While certain multilateral environment agreements such as the Convention

Concerning the Protection of the World Cultural and Natural Heritage protect the environment international humanitarian law and international criminal law continue to treat environmental protection largely from an anthropocentric perspective This book is the first targeted work in the legal literature that investigates environmental challenges in the aftermath of conflict Addressing these challenges it brings together academics policy makers and practitioners from different disciplines to clarify policies and practices of environmental protection and key normative frameworks It draws on experiences and practices in post conflict settings to specify substantive principles and techniques to remedy and prevent harm

Environmental Protection in Transition John Clark, Daniel H. Cole, 2017-07-05 This book takes an interdisciplinary look at environmental protection during Poland's transition to market democracy The contributors are recognised experts in their fields making this an authoritative volume combining the perspectives of economists legal scholars political scientists and sociologists **Environment and Human Well-being** Don Melnick, 2005 Tigers without Teeth Scott Wilson, 2015-03-19

This compelling book analyzes the rise of civil society and legal contentiousness in contemporary China Scott Wilson examines how Chinese AIDS carriers and pollution victims relying on weak laws and judicial institutions pursue justice and protection of their rights in Chinese courts and civil society In exploring the politics of justice in China the author contends that civil society and legal rights advance when their organizers have support from pockets of the Chinese Communist Party resources from international groups and the backing of protesters Even lawsuits that fail in the courts can raise societal consciousness of social issues and can lead to revised state policies to address the substantive claims of disadvantaged citizens Underlying the politics of justice is the regime's attempt to balance commitments to legal development and its interest in regime stability Wilson argues that the Chinese state has looked more favorably upon pollution victims civil society organizations and lawsuits than those of AIDS carriers Going beyond the standard overviews of China's legal system Tigers without Teeth is unique in its close comparison of legal activism on two sensitive and politically relevant social issues It provides important insights into the development of civil society as well as highlighting limitations to the pursuit of justice as the system balances between the development of rule of law and regime stability UN Millennium Development Library: Environment and Human Well-being UN Millennium Project, 2012-05-16 The Millennium Development Goals adopted at the UN Millennium Summit in 2000 are the world's targets for dramatically reducing extreme poverty in its many dimensions by 2015 income poverty hunger disease exclusion lack of infrastructure and shelter while promoting gender equality education health and environmental sustainability These bold goals can be met in all parts of the world if nations follow through on their commitments to work together to meet them Achieving the Millennium Development Goals offers the prospect of a more secure just and prosperous world for all The UN Millennium Project was commissioned by United Nations Secretary General Kofi Annan to develop a practical plan of action to meet the Millennium Development Goals As an independent advisory body directed by Professor Jeffrey D Sachs the UN Millennium Project submitted its recommendations

to the UN Secretary General in January 2005 The core of the UN Millennium Project's work has been carried out by 10 thematic Task Forces comprising more than 250 experts from around the world including scientists development practitioners parliamentarians policymakers and representatives from civil society UN agencies the World Bank the IMF and the private sector This report lays out the recommendations of the UN Millennium Project Task Force on Environmental Sustainability It identifies key environmental challenges such as degradation of land watersheds and marine fisheries deforestation pollution and climate change The Task Force proposes specific interventions and policy changes required to improve environmental management at the country regional and international level These bold yet practical approaches will help countries make progress towards environmental sustainability by 2015

Innovations in Environmental Legislation and Justice: Environmental and Water-Energy-Food Nexus Laws Norouzi, Nima, Movahedian, Hussein, 2023-04-12 Human health has been protected from environmental contamination by national laws throughout history but there are still many areas of international environmental law that are underdeveloped Even though numerous international environmental treaties have been established effective agreements remain difficult to achieve for a variety of reasons Because environmental problems disregard political boundaries they can only be adequately addressed by a wide range of governments some of which may have serious disagreements on important points of policy The knowledge gap between legal developments designed to achieve environmental objectives and the practical scientific and technical applications must be bridged Environmental and energy law should be explored from a wide range of perspectives and approaches to gain insight into how the law is designed to tackle particular environmental problems *Innovations in Environmental Legislation and Justice: Environmental and Water-Energy-Food Nexus Laws* examines the development and application of international environmental laws and regulations dealing with global air water and land pollution By adopting a multi disciplinary approach to environmental and energy law the book embraces all readerships and goes a step further to address the often thorny problem of improving communication between scientists and engineers and law and policymakers Covering topics such as environmental justice green constitutions and climate change this book is ideal for policymakers government officials legal professionals environmentalists students academicians researchers and more

Environmental Protection Policy and Experience in the U.S. and China's Western Regions Sujian Guo, Joel Jay Kassiola, Jijiao Zhang, 2010-01-01 Environmental scholars and specialists from U S and China provide insightful comparisons and analyses of environmental protection policy and experience in the U S and China's western regions A special focus is provided on the lessons of the U S experience for environmental protection in China's western regions the biological and environmental challenges facing China in the western regions and responses and strategies China has adopted in coping with them

Contentious Agency and Natural Resource Politics Markus Kröger, 2013-11-26 The looming depletion of non renewable resources has increased the global land grab in the past decade So far however the question of how and when people can influence economic outcomes

has received little attention in the study of social movements Based on in depth ethnographic field research since 2003 in the industrial forestry expansion frontiers in Brazil and elsewhere in the global South this book presents a novel theory to explain how the interaction between resistance companies and the state determines investment outcomes The promotion of contentious agency by organizing and politicizing campaigning protesting networking and engaging in state and corporate remediated politics whilst maintaining autonomy is central to explaining how impacted people influence resource flows and block or slow projects they deem harmful to their livelihoods and the environment The conflicts between globalizing paper and pulp corporations and the landless peasants indigenous communities and other parties with alternative projects for the planet s future are studied to illustrate how a great transformation can be built upon progressive counter movements This systematic comparison of several cases illustrates the broader principles and problems endemic to the global political economy Contentious Agency and Natural Resource Politics will be of strong interest to students and scholars of international relations international political economy environmental studies environmental politics sociology and social movement studies

The Quality of Life in Contemporary China Peilin Li, 2022-03-06 This book introduces a multidimensional system that evaluates quality of life in China by pursuing a quantitative and analytical approach A host of factors including economic conditions and individual wellbeing can affect people s satisfaction with their lives In addition to GDP associated indicators sociological and environmental factors are also relevant when it comes to evaluating quality of life Providing a general framework while also considering gender education and geographical differences in assessing quality of life the book offers policy suggestions for improving both individual quality of life and the health of society as a whole
